have the entire management of
and superintendence over the
affairs, concerns and property
of the said University ; and in all cases unprovided for
by this Act, it shall be lawful for the Chancellor, Vice-
Chancellor, and Fellows to act in such manner as shall
appear to them best calculated to promote the purposes
Bye-Laws. intended by the said University.

The said Chancellor, Vice-Chancellor, and Fellows
shall have full power from time to time to make and
alter any bye-laws and regulations (so as the same be
not repugnant to law or to the general objects and
provisions of this Act) touching the examination for
degrees and the granting of the same ; and touching
the examination for honors and the granting of marks
of honor for a higher proficiency in the different branch-
es of Literature, Science, and Art ; and touching

the qualifications of the candidates for degrees and the previous course of instruction to be followed by them, and the preliminary examinations to be submitted to by them; and touching the mode and time of convening the meetings of the Chancellor, Vice-Chancellor, and Fellows; and, in general, touching all other matters whatever regarding the said University. And all such bye-laws and regulations, when reduced into writing, and after the common seal of the said University shall have been affixed thereto, shall be binding upon all persons, members of the said University, and all candidates for degrees to be conferred by the same, provided such bye-laws and regulations shall have been first submitted to and shall have received the approval of the Governor-General of India in Council.

IX. All questions which shall come before the Chancellor, Vice-Chancellor, and Fellows shall be decided at a meeting of the Senate by the majority of the members present; and the Chairman at any such meeting shall have a vote, and, in case of an equality of votes, a second or casting vote. No question shall be decided at any meeting, unless the Chancellor, or Vice-Chancellor, and five Fellows, or, in the absence of the Chancellor and Vice-Chancellor, unless six Fellows at the least, shall be present at the time of the decision. At every meeting of the Senate, the Chancellor, or in his absence the Vice-Chancellor, shall preside as Chairman; and, in the absence of both, a Chairman shall be chosen by the Fellows present, or the major part of them.

X. The said Chancellor, Vice-Chancellor, and Fellows for the time being shall have full power from time to time to appoint, and as they shall see occasion, to remove all Examiners, Officers, and servants of the said University.

XI. The said Chancellor, Vice-Chancellor, and Fellows, shall have power, after examination, to confer the several degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, and Master of Civil Engineering; they shall also have power, after examination, to confer upon the candidates for the said several degrees, marks of honor for a high degree of proficiency in the different branches of Literature, Science, and Art, according to rules to be determined by the bye-laws to be from time to time made by them under the power in that behalf given to them by this Act.

XII. Except by special order of the Senate, no person shall be admitted as a candidate for the degree of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, or Master of Civil Engineering, unless he shall present to the said Chancellor, Vice-Chancellor, and Fellows, a certificate from one of the Institutions authorized in that behalf by the Governor-General of India in Council, to the effect that he has completed the course of instruction prescribed by the Chancellor, Vice-Chancellor, and Fellows of the said University, in the

bye-laws to be made by them under the power in that behalf given by this Act.

XIII. The said Chancellor, Vice-Chancellor, and Examination for de- Fellows shall cause an examination for degrees. greees. tion for degrees to be held at least once in every year; on every such examination the candidates shall be examined either by Examiners appointed for the purpose from among the Fellows by the said Chancellor, Vice-Chancellor, and Fellows, or by other Examiners so to be appointed; and on every such examination, the candidates, whether candidates for an ordinary degree or for a degree with honors, shall be examined on as many subjects and in such manner as the said Chancellor, Vice-Chancellor, and Fellows shall appoint.

XIV. At the conclusion of every examination of Grant of degrees. the candidates, the Examiners shall declare the name of every candidate whom they shall have deemed entitled to any of the said degrees, and his proficiency in relation to other candidates; and also the honors which he may have gained in respect of his proficiency in that department of knowledge in which he is about to graduate; and he shall receive from the said Chancellor a certificate, under the seal of the University of Calcutta and signed by the said Chancellor or Vice-Chancellor, in which the particulars so stated shall be declared.

XV. The said Chancellor, Vice-Chancellor, and Fees. Fellows shall have power to charge such reasonable fees for the degrees to be conferred by them, and upon admission into the said

University and for continuance therein, as they, with the approbation of the Governor-General of India in Council, shall from time to time see fit to impose. Such fees shall be carried to one General Fee Fund for the payment of expenses of the said University, under the directions and regulations of the Governor-General of India in Council, to whom the accounts of Annual Accounts. income and expenditure of the said University shall once in every year be submitted for such examination and audit as the said Governor-General of India in Council may direct.

ACT No. XLVII. OF 1860.

Passed on the 6th October, 1860.

An Act for giving to the Universities of Calcutta, Madras, and Bombay the power of conferring Degrees in addition to those mentioned in Acts II., XXII. and XXVII. of 1857.

WHEREAS it is expedient to give to the Universities of Calcutta, Madras, and Bombay established under Acts II., XXII. and XXVII. of 1857, the power of conferring Degrees other than the Degrees in that Act expressly provided for. It is enacted as follows :—

I. It shall be competent to the Chancellor, Vice-Chancellor, and Fellows of the Universities of Calcutta, Madras, or Bombay respectively, to confer such Degrees and to grant such Diplomas or Licenses in respect of De-

grees, as the said Chancellor, Vice-Chancellor, and Fellows of any such University shall have appointed or shall appoint by any Bye-laws or Regulations made and passed or to be made or passed by them in the manner provided in the said Acts and submitted to and approved by the Governor-General in Council as far as regards the University of Calcutta, or by the Governor in Council of Madras or Bombay as regards the Universities of Madras and Bombay respectively.

II. All the provision contained in the said Acts II. XXII. and XXVII. of 1857,
Construction, with respect to the Degrees, therein mentioned and to the examinations for those Degrees shall apply to any Degrees which may be conferred under this Act and to the examinations for such Degrees.

III.

BYE-LAWS.

THE SENATE.

1. THE Senate* as constituted by Act No. II. of 1857, shall meet ordinarily once a year, on the third Saturday in† April, and at other times when convened by the Vice-Chancellor.

2. The Vice-Chancellor shall convene a meeting of the Senate on the requisition of any six of the Members.

3. Nine Members of the Senate shall constitute a quorum, and all questions shall be decided by a majority of the votes of the Members present.

THE FACULTIES.

1. The Senate shall be divided into four Faculties, namely, Arts, Law, Medicine, and Engineering. Every Member of the Senate shall be a Member of one Faculty at least, and any Member of the Senate may be a Member of more than one Faculty.

2. The Faculties shall be appointed by the Senate at its Annual Meeting.

3. Each Faculty shall elect its own President. Every Meeting of a Faculty shall be convened by its President, or in his absence, by the Senior Fellow belonging to that Faculty.

† The Syndicate have power to alter all dates.

4. If any Faculty omit to elect a President before the Annual Meeting of the Senate, or, in case the office should become vacant during the year, to elect a President for the rest of the year, within one month after the vacancy occurs, the Vice-Chancellor may appoint any Member of such Faculty to be its President.

5. Three Members of any Faculty shall constitute a quorum of that Faculty.

THE SYNDICATE.

1. The Executive Government of the University shall be vested in a Syndicate, consisting of the Vice-Chancellor and six of the Fellows who shall be elected for one year by the several Faculties, in the following proportions:—

Three by the Faculty of Arts.

One by the Faculty of Law.

One by the Faculty of Medicine.

One by the Faculty of Engineering.

2. The elections both of the Presidents of the Faculties and of the Members of the Syndicate shall take place before the Annual Meeting of the Senate, and the names of the persons elected shall be declared at such Meeting.

3. The Syndicate shall meet ordinarily once a month, and at other times when convened by the Vice-Chancellor.

4. All Members of the Syndicate must be resident in or near Calcutta. If any Member be temporarily

absent from Calcutta, the President of his Faculty may appoint a Member to officiate during his absence. Should the period of absence exceed three months, the Vice-Chancellor may declare his place vacant.

5. On every vacancy in the Syndicate, caused by death, resignation, absence from Calcutta, or otherwise, the Faculty, by whom the Member causing the vacancy was elected, shall proceed to elect a new Member for the remainder of the current year.

6. If any Faculty omit to elect a Member of the Syndicate within one month after a vacancy occurs, the Vice-Chancellor may appoint one from among the Members of that Faculty.

7. Four Members of the Syndicate shall constitute a quorum, and all questions shall be decided by a majority of the votes of the Members present.

8. The Vice-Chancellor, or, in his absence, the Senior* Fellow present shall preside at all Meetings of the Syndicate, and if the votes, including that of the President, are equally divided, the President shall have a casting vote.

9. - II. Mechanical Philosophy.
- III. Natural and Experimental Science.
- IV. Construction.
- V. Drawing.
- VI. Geodesy.

I. MATHEMATICS.

Arithmetic.

Algebra.

Simple and Quadratic Equations, Ratio, Proportion and Variation, Arithmetical and Geometrical Progression.

Binomial Theorem.

Logarithms.

Euclid—Books 1, 2, 3, 4, 6, and 11 to Prop. 21, with deductions.

Conic Sections, treated Geometrically.

Trigonometry.

As far as the solution of all cases of plane triangles.

Mensuration.

Mensuration of Surfaces and Solids.

II. MECHANICAL PHILOSOPHY.

Statics.

Composition and Resolution of forces, Centre of Gravity.

Mechanical Powers.

Friction.

Dynamics.

General Laws of motion.

Motion of Falling Bodies in free space and down inclined planes.

Vibration of simple pendulums.

Collision of Bodies.

Hydrostatics.

Equilibrium of Fluids.

Specific Gravity.

Equilibrium of floating bodies.

Centre of pressure.

Elastic fluids.

Principles of the Barometer and Thermometer and application to determine heights of mountains ; of the Air-pump, Condenser, Pump, Siphon, and Hydrostatic Press.

Hydrodynamics.

Motion of fluids through a small orifice.

Percussion and Resistance of Fluids.

Optics.

Laws of reflection, refraction, and radiation from Plane and Spherical Surfaces. Formation of Images ; simple and compound Lenses ; the Eye, Principles of the Sextant, Telescope, and Microscope.

III. NATURAL AND EXPERIMENTAL SCIENCE.

Chemistry.

The elements of inorganic Chemistry, as laid down in Chambers's Course, and as applied to the preparation of wrought-iron, steel and cements.

Heat.

Elementary laws of Heat, with reference to steam and combustion of fuel.

Mineralogy.

Physical Characteristics of Minerals.

Physical Geography.

With special reference to that of India.

Selection of Line, Cuttings and Embankments, Tunnels, Gradients, Curves.

*The practice of Bridge Building.**Carpentry.*

Scarfs, Joints, Centres for Bridges, Roofs.

Hydraulic Works.

Flow of water in pipes and open channels, and over Weirs ; Tanks ; Canals ; Sluices ; Locks.

Strength of Materials.

Resistance of Iron and Wood to compression, tension, transverse and longitudinal strains and detrusion. Deflection of Beams. Various forms of Beams, Solid, and Hollow.

Stability of Structures.

As applied to retaining walls, bridges, abutments, walls of Buildings, and framed structures.

Mechanism.

Motion ; Machines ; advantage and uses of.

Elementary forms ; Levers ; Cranks ; Rolling contacts ; Sliding contacts ; Mechanism for modifying motion ; Accumulation and Regulation of motion.

Sources of power—Gravity, Wind, Heat, Muscular action.

The Steam Engine in detail.

Hydraulic Machines—Water wheels and Turbines.

Designs.

An original design for a work on given data, with report, specification, and estimate.

V. DRAWING.

Geometrical, Mechanical, Engineering and Architectural, Perspective, Isometrical perspective, Topographical and Landscape Drawing.

(Attested specimens, of each kind, to be submitted to the Examiners, in addition to the specimens to be executed during the Examination, to which marks will be assigned.)

VI. GEODESY.

Use of the Scales, Prismatic Compass, Level, Theodolite, and Plane Table.

Topographical Surveying of limited areas.

Practice of levelling.

Route Surveying and laying out curves.

(Attested Surveys, executed by the candidate, will be submitted to the Examiners, to which marks will be assigned.)

6. The Examination shall be conducted by means of printed papers, and a paper of questions shall be set in each of the following subjects—

Arithmetic and Algebra.

Geometry and Conic Sections.

Practical Trigonometry, Logarithms and Mensuration.

Statics and Dynamics.

Hydrostatics and Optics.

Chemistry and Heat.

Mineralogy and Physical Geography.

Practice of Building.

Earthworks and Construction of Roads and Railways.

Carpentry and Mechanism.

Hydraulic Works.

Strength of Materials and Stability of Structures.

Drawing and Geodesy.

AFFILIATION.

1. Institutions or departments of Institutions may be affiliated in Arts, Law, Medicine, and Civil Engineering.

2. The power of affiliating rests, under the sanction of the Governor-General of India in Council, with the Syndicate, to whom all applications for affiliation must be addressed through the Registrar.

In the case of a Government Institution, application must be made by the Director of Public Instruction or other Chief Educational officer of the province in which the Institution is situated.

In the case of any other Institution, application must be made by the chief controlling authority of such Institution.

Every application must be countersigned by two Members of the Senate, and, if thought necessary in the case of distant Institutions, by the Secretary to the

Government of the Province in which the Institution is situated.

3. The application must contain :—

(a) A declaration that the Institution has the means of educating up to the standard under which it desires to be affiliated.

(b) A statement shewing the provision made for the instruction of the students up to the same standard.

(c) Satisfactory assurance that the Institution will be maintained on the proposed footing for 5 years at least.

4. The Syndicate may, with the sanction of the Governor-General of India in Council, at any time, withdraw the privilege of affiliation from any Institution.

Presidency College.

AFFILIATED, 1857.

The Presidency College was established on the 15th June, 1855, under orders from the Hon'ble the Court of Directors in their Despatch No. 62, dated 13th September, 1854, and is under the control of the Director of Public Instruction of Bengal.

The College is open to all classes of the community, and the course of instruction is adapted to the requirements of the University for Degrees in Arts, Law and Civil Engineering.

General Department.—Students who have passed the University Entrance Examination are admissible to this Department.

There is an admission fee of 10 Rs. and the monthly tuition fee is also 10 Rs., except in the case of students holding Junior Scholarships who pay only 5 Rs. a month.

Seven Scholarships, founded in commemoration of the donors whose names they bear, are attached to the College, and are tenable by Graduates in Arts for one year after taking the Degree of B. A. viz.

The Burdwan Scholarship,...	value 50 Rs. a month.
„ Dwarkanath Tagore „ „	50 Rs. „
„ Bird Scholarship,	„ 40 Rs. „
„ Ryan „	„ 40 Rs. „
Three Hindu Coll. Scholarships, „	30 Rs. „

Law Department.—Students are admissible to this Department who have passed the First Examination in Arts. Candidates for admission, who are not already members of the General Department, are required to pay an Entrance fee of 10 Rs. During the first two years, students pay a monthly tuition fee of 5 Rs., and during the third year they pay 10 Rs. a month.

Civil Engineering Department.—Students are admissible to this Department, who have passed the University Entrance Examination. The Entrance fee is 10 Rs., and the monthly tuition fee 5 Rs. There are two Scholarships each worth 10 Rs. a month, attached to this Department, which were founded in memory of the late Major General Forbes. These Scholarships are tenable for one year, and are awarded after the annual College Examination in May to the most deserving students in the second year class. Five Government Scholarships, each worth 50 Rs. a month and tenable for two years, are available annually for students who pass the University Examinations for the Licence in Civil Engineering, or the degree of B. C. E. Holders of these Scholarships receive practical training, (1) in the Government Survey Department for six months; (2) in Government workshops for six months; (3) in Government works in progress for one year. Other students, who pass the University Examina-

tions but for whom no Scholarships are available, are allowed to go through the same course of practical training free of charge.

Medical College of Bengal.

AFFILIATED 1857.

1. The Medical College of Bengal was founded by Lord William Bentinck, in the year 1835.

The government of the College and Hospital is vested in the Principal, aided by a Consultative Council, composed of all the Professors, subject to the general control of the Director of Public Instruction.

THE PRIMARY OR ENGLISH CLASS.

This class consists of Scholarship-holders, free Students and paying Students. The number of free Students in the College, at one time, is limited to 50, and nomination to the free list has been left, by the Director of Public Instruction, in the hands of the Principal.

Free presentations are made entirely with reference to the ability of applicants, as shown by the position they may have held at the Entrance Examination in Arts of the University, or by possession of Scholarships from other Colleges.

Paying Students are required to pay an admission fee of Rs. 15, and 5 Rs. per mensem during their stay in the College.

They are required to follow the curriculum of the College as laid down for the primary or English class, and are subject to the same rules regarding discipline.

Students who do not intend to graduate at the Calcutta University, or who are desirous of attending single courses of lectures, may enter as casual students; they are not required to follow the College curriculum, but in other respects are amenable to the College Regulations. If they enter for more than a single course of lectures, they

are required to comply with the rules which regulate the admission of other applicants to the primary class.

Casual students pay in advance fees of Rs. 40 for each course of lectures and Rs. 60 for each six months' attendance on the different departments of hospital practice.

The expenditure on Scholarships of the primary class is limited to Rupees (400) four hundred a month, and this sum is ordinarily distributed among the students of the five years as follows :

To *Students of the 4th and 5th years, 14			
Senior Scholarships at 12 Rupees a month,	168	0	0
To Students of the 3rd year, 8 Junior			
Scholarships at 8 Rs. a month,	64	0	0
To Students of the 3rd year, 5 augmentation			
Scholarships at 8 Rs. a month,	40	0	0
To Students of the 2nd year, 8 Junior			
Scholarships, at 8 Rs. a month,	64	0	0
To Students of the 1st year, ditto ditto ditto,	64	0	0
<hr/>			
Total, per mensem,	Rs. 400	0	0

The Senior Scholarships are awarded according to the results of the "First Licentiate Examination." But they are not awarded to Students who gain University Scholarships at such Examination. They are tenable for two years, on condition that the conduct and progress of the holder are satisfactory.

The Junior Scholarships are awarded either upon the published results of the University Entrance Examination, or on a Special Examination to be held for the purpose, according as may be found from time to time most

* For Students of these two years, University Scholarships are also available, and, for those of the 5th year, the Goodeve Scholarship likewise.

convenient. They are tenable for three years, on the like condition as above.

In the event of a Scholarship being forfeited, the amount already drawn is not liable to be refunded by the holder.

Any Scholarship falling vacant by the death, resignation, &c. of the holder, may be awarded to Students of the same term, next in order of merit, who may be without a Scholarship, and may be possessed of the requisite qualifications.

The Goodeve Scholarship (value Rs. 12 a month) may be held in conjunction with any Scholarship awarded under these Rules.

Students of this class, excepting casual students, are required to follow the subjoined curriculum, which is framed for obtaining the Calcutta University Licence in Medicine and Surgery.

3. If duly qualified, the Student receives a certificate, signed by the Principal, the Professors of Medicine, Surgery, Materia Medica, and Anatomy, and by the native teachers of these subjects, declaring that he is sufficiently versed in Anatomy, Materia Medica, Practice of Medicine and Surgery, to qualify him for the office of native Doctor.

4. The Students of this class are all natives, chiefly Mussulmans, and are duly enlisted as Soldiers from the date of their joining the College. They are destined for employment chiefly in Military, but also in civil hospitals and dispensaries.

THE BENGALI CLASS.

The instruction of this class is conducted in the Bengali language.

The course of Study is not prescribed by the University, but is in accordance with the orders of Government.

The course of Study of this class is precisely similar to that of the Hindustani class, the only difference being that the Bengali language is employed, instead of the Urdu, as a medium of communication.

The Students remain the same time in the College, undergo similar Examinations, and obtain the same description of certificate of qualification.

The Students of this class are destined for employment as native doctors in the civil hospitals of Bengal, whilst many engage in private practice, instead of entering Government service.

Sanskrit College, Calcutta.

AFFILIATED, 1860.

This Institution is supported by Government, and is under the control of the Director of Public Instruction, Lower Bengal. It was founded in 1824, for the encouragement of the study of the Sanskrit language and literature, and at first Sanskrit was studied exclusively.

The College is open to all respectable Hindus, without any distinction of caste. The Schooling fee is two Rupees per month. The upper students read the University Course. There are twenty senior Scholarships, varying from ten to twenty Rupees per month, and ten Junior Scholarships of eight Rupees each.

All the students, with the exception of the two last classes, learn Sanskrit and English.

A valuable Sanskrit Library of Manuscripts and printed works is attached to the College, and a Government grant of 600 Rupees for annum is chiefly applied to the purchase of standard English and Sanskrit works.

Hooghly College.

AFFILIATED, 1857.

This Institution was founded in 1836, and is mainly supported from funds bequeathed by Mohammed Moshim, a wealthy Mahomedan gentleman who, dying without heirs, in the year 1806, left his large property, yielding an annual income of 45,000 Rupees, to Mahomedan Trustees "for the service of God." Owing to the misappropriation of the Funds, Government assumed the office of Trusteeship. The right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation extended over many years, during which the annual income accumulated, forming a surplus of Rs. 861,100. This fund was devoted to the foundation and endowment of the Hooghly College, and was further increased by a portion of the original Zemindari that became available on the death of one of the Mootawallees of the Hooghly Imambarah, an Institution which also derives its support from Mahomed Moshim's Legacy. Another source of increase to the College endowment has been the accumulation of unexpected income, so that at present it yields not less than Rs. 51,000 per annum.

The College consists of three departments, an English, an Arabic, and a Law Department, and is under the control of the Director of Public Instruction, Lower Bengal. The English Department is open to all students who have passed the University Entrance Examination, the fees being one rupee per mensem for Mahomedans, and Rs. 4 for all others. In the Law Department, the fee is Rs. 2 per mensem.

In 1846 a sum of Rs. 5,000 was given by Ranee Kuttiannee, a large landed proprietress for the foundation of a Senior

Scholarship in the Hooghly College, to be competed for by the students of this Institution alone. Owing to some misapprehension, the Scholarship remained unawarded for some years during which the principal was considerably increased by the accumulation of interest, so that it now yields an income of about Rs. 320 per annum; this being more than sufficient to support the existing Scholarship of Rs. 16 per mensem, it has been determined to open another, equal in value, as soon as the yearly savings afford an adequate fund.

Two Junior Scholarships of 8 rupees per mensem are attached to the Collegiate and Zemindary Scholarship. Branch Schools, preference being given to students of the latter. These Scholarships were founded in 1843, and are supported by the surplus of the liberal contributions made by wealthy Zemindars* of the district for the purpose of building the Branch School.

Dacca College.

AFFILIATED, 1857.

This College is supported by Government, and is under the control of the Director of Public Instruction, Lower Bengal.

It was originally opened as a School, by the General Committee of Public Instruction, in the year 1835. In 1841, it was converted into a College, when a Principal was appointed, and an increase made to the staff of teachers. The College building was erected, partly by public subscription, in the same year, at a cost of Co.'s Rs. 36,679.

Any person, who has passed the University Entrance Examination, may be admitted. Students pay a monthly fee of Rupees 3-8.

A silver Medal, called the Donnally prize, is awarded annually, of the value of the interest on Rs. 1,000, subscribed by the native assistants of the late Abkarree Commissioner's office, in memory of the late Mr. A. F. Donnally.

**Kishnaghur College.**

AFFILIATED, 1857.

This College was founded by Government, in 1845, and is under the control of the Director of Public Instruction, Lower Bengal.

Any person, who has passed the University Entrance Examination, may be admitted. Students pay a monthly fee of Rupees 3-8.

The College building is a noble edifice, standing upon 3 beegahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected, at a cost of Rs. 66,876; Rs. 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy free of expense, at the College in perpetuity, and another, for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government; for the remainder, the College is indebted to the munificence of the Maharajah of Nuddea and the Rani Surnomoye of Cossimbazar.

Agra College.

AFFILIATED, 1857.

Agra College is partly supported by Government, and is under the control of the Director of Public Instruction, North-Western Provinces. It was established by the direction of the General Committee of Public Instruction in 1823-4, and placed under the superintendence of a local Committee, consisting of the Government officials of the place, with a paid Secretary, who also acted as overseer of the Institution.

It was opened to all classes of the population, and "was designed to diffuse more widely than Native Schools the possession of useful knowledge, to give a command of the language of ordinary life, and of official business—to teach, principally, Hindee and Persian, with the native mode of keeping accounts (Leelavattee), and to have instruction in Sanscrit and Arabic. It was not designed to impart an elementary education: the pupils were expected to have made considerable progress before their admission."

Separate teachers of Sanscrit, Hindee, Persian, and Arabic were appointed. All were taught gratuitously, and more than two-thirds of the whole received stipendiary allowances.

Subsequently, in successive years, the introduction of new subjects, and the addition of new teachers gradually changed the character of the Institution, from that of a purely Oriental School to that of an Anglo-Vernacular College, with upper and lower departments of study, having a Principal, and containing (1862) no pupil who does not study English with Urdu or Hindee.

ENDOWMENTS, &c.

This College is endowed by a fund in the districts of Agra and Allyghur, amounting to about a lakh and a half

of rupees, from villages formerly held by Gungadhur Pundit, (who held his jagir, under Educational services, from a late Rajah of Gwalior) ; the interest of which fund and the annual collections from the villages exceeded 20,000 Rupees. To this have been added, from time to time, by Government, additional allowances for Teachers, Scholarships, &c., both sources of revenue amounting annually to about 35,000 Rupees. There are also Scholarships endowed by various private benefactors, amounting to one hundred Rupees a month.

Queen's College, Colombo, Ceylon.

AFFILIATED, 1859.

This Institution was founded, under the name of the Colombo Academy in the year 1836, during the government of the Rt. Hon'ble Sir Robert Wilmot Horton, and is supported by the Government of Ceylon, who pay all the salaries and other necessary expences; these are in part repaid by the fees received from the students, which vary from £1-15 annually, in the lowest classes, to £7-10 in the highest.

The only endowment is the "Turnour Prize," which was instituted in 1843, from a fund raised for the purpose of testifying respect for the memory of the late Hon'ble George Turnour, at which time the following resolution was passed by the subscribers.

"That the interest of the money raised (£190) be devoted to give one prize yearly in the Colombo Academy to the most advanced and best conducted scholars; that the sum so awarded be called 'The Turnour Prize,' and be placed under such regulations as the Central School Commission may establish."

In the year 1861, a Resolution was passed by the Central School Commission of Ceylon, establishing seven Queen's Scholarships in connexion with Queen's College; three being junior Scholarships, of the value of £12 per annum, tenable for three years by students in the Upper School of the Academy, to be awarded to the best answerers at the annual competitive Examinations open to all Candidates; and four being senior Scholarships, of the value of £20 per annum, tenable for four years by students in Queen's College, Colombo, one to be awarded each year to that student who, at the University Entrance Examination shall stand first of the Ceylon candidates in the order of merit in the first division.

The Colombo Academy was, for many years, the only Institution in the Island, with the exception of one supported by the American Board of Missions at Batticotta near Jaffna, which professed to give a liberal education to its alumni. Several of its former students have filled and are now filling high offices on the Bench of the Supreme Court, in the Executive and Legislative Councils of Ceylon, and in other important positions.

AFFILIATED, 1857.

This Institution was founded in 1845, and is under the control of a Committee, of which the Bishop of Calcutta is President, and the Venerable the Archdeacon, Vice-President.

FOUNDATION, SCHOLARSHIPS AND PRIZES.

1. *Foundation.*—One boarder and four day-boys are on the foundation; the first receives his board and education free, and the other four, their education. The nomination to these is with the Bishop of Calcutta.

2. *Bishop Wilson's Scholarships*.—Two scholarships of 20 Rupees a month have been endowed in memory of the late Bishop Wilson, each to be held for two years. According to the terms of the endowment, these scholarships are competed for by the whole of the Christian boys in the school, whether boarders or day-boys ; one being given every year. They were instituted in the hope that the higher boys may be induced to extend the period of their studies, and become fitted to graduate in the University.

3. *Prizes*.—Two silver medals, one for proficiency, the other for general good conduct, are awarded at the annual Christmas Examination. Prizes in books are also given to the most proficient in each class.

COURSE OF STUDY.

The subjects of Examination for Entrance into the University of Calcutta form the basis of instruction in the first class.

The study of the remaining five classes is arranged in a gradual proportion down to the first elements of learning. The whole course assigned for each class is so adjusted as to occupy one year.

In addition to the above school course, there is in operation a course of training for the B. A. Degree in the University of Calcutta. This is done in conformity with the conditions of affiliation to the University. The subjects appointed to be read are divided in such a way as to embrace a distinct course for each year.

**Free Church Institution, Calcutta.**

AFFILIATED, 1857.

Originally established by Dr. Duff in August, 1830, for the education of native youth under the name of the General Assembly's Institution, and since 1843 designated the Free Church Institution, being supported by the Free Church of Scotland.

The Institution, since 1857, has been in a handsome new edifice, Nimtollah Street, which has been erected at a cost of upwards of £15,000.

It consists of two departments, a College Department, and a Preparatory and Normal School.

In the College department all the branches of a higher education in English Literature, Science, and Philosophy, with Bengali and Sanscrit, are taught, in immediate connection with systematic instruction in the doctrines and evidences of Natural and Revealed religion.

For the last 20 years, the average number of pupils has exceeded a thousand ; of whom about a hundred and fifty belong to the College department.

SCHOLARSHIPS.

1. There is an endowment of Rs. 100 per month for small scholarships of 5 or 6 Rupees per month each, which are allotted only to those who pass the University Entrance Examination.

2. There are two endowed Theological Scholarships of Rs. 16 per month each, called " the Duff Scholarships," designed for students who are candidates for the Christian ministry.

3. There is also an endowed " Hawkins Scholarship," of Rs. 8 per month, founded by the liberality of the gentleman whose name it bears.

4. A few Senior and Junior Government Scholarships have been granted to those who most successfully pass the University Examinations.

ANNUAL PRIZES.

1. Endowed prizes :—The Hawkins gold medal of Rs. 100 to the most successful student in the Institution. The Macdonald Prize.

The Ewart Memorial Prize of Rs. 50.

The Kelloe Prize of 40 or 50 Rupees, founded by the late Mr. Buchan of Kelloe.

These are usually allotted for the best essays on prescribed subjects.

2. Besides these, prizes for general scholarship and

regular attendance are awarded in all the classes ; with several more for especial exercises or essays.

La Martinière College.

AFFILIATED, 1857.

This Institution was founded by Claude Martin, a native of Lyons in France, and a Major-General in the service of His Majesty, the King of Oude. By his will he bequeathed a sum of three hundred and fifty thousand Sicca Rupees, afterwards considerably augmented, to be devoted to the establishment of a school for the Christian inhabitants of Calcutta, under the direction of the Government of the Supreme Court.

GOVERNORS.

The Governor-General, the Members of Council, the Judges of the Supreme Court, the Bishop of Calcutta, and the Advocate-General for the time being, together with four additional Governors to be elected by them annually. The four Governors so elected, with one of the ex-officio Governors, form a board of Acting Governors, to whom the general control of the Institution is entrusted.

FOUNDATION BOYS.

The Governors from time to time select from among the Christian population of Calcutta, a sufficient number of poor boys, of an age not less than 4, nor more than 10 years, so that there may always be at the least 75 boys on the establishment of the school. These boys are entirely educated and supported out of the funds of the school. Boarders and day-scholars may be admitted at the discretion of the Governors, provided that they are not a burden on the charity.

The Institution was opened on the 1st March, 1836. It is divided into two departments, College and School. The Educational Staff consists of a Principal, a Head Master, and five assistant Masters, together with Surveying, Drawing and Music Masters and a Pundit.

PRIZES AND SCHOLARSHIPS.

A gold medal is annually awarded on the 13th of September, the anniversary of the death of the Founder, to the head boy of the College Department, and prizes of books are given in all the classes.

Two Scholarships are also then awarded, tenable for two years, one in the College Department of Rs. 20 a month, one in the 1st class of the school, of Rs. 16.

**London Missionary Society's Institution,
Bhowanipore.**

AFFILIATED, 1857.

This Institution was founded by the London Missionary Society in the year 1838. In 1854 the large and handsome building now used, consisting of a Library, a Hall, and fourteen class-rooms, was first opened.

It is supported by the funds of the London Missionary Society, by voluntary contributions, and by fees. The fees vary from one rupee in the highest classes to eight annas in the lowest. The number of students and scholars amounts to 600. A branch school at Behala, four miles to the south-west of Calcutta, contains 170 boys.

The Institution is intended to give a thoroughly good secular and Christian education in English and Bengali. The course of study comprehends English, Indian and General History ; Mental and Moral Philosophy ; Mathematics ; Bengali Grammar and Literature ; Sanscrit Grammar ; Christian Evidences, and English Literature. Besides the general department, there is, connected with the Institution, a theological class for training Christian natives for Missionary work.

St. Xavier's College.

AFFILIATED, 1862.

This Institution was established under the direction of the Society of Jesus, in January, 1860, in the large building formerly appropriated by the late Dr. Carew for St. John's College. It is mainly intended for the liberal education of Catholic youth, but is open alike to pupils of other religious persuasions, on the same principle of non-interference as in the old St. Xavier's College which broke up in 1846.

Besides the paying boarders and day-pupils, some free scholars are admitted, especially for the higher studies, as hitherto no scholarships have been founded.

The course of study is similar to that followed in the European Colleges of the same Society, but adapted to the wants of this country. One or two years' training in the elementary division is generally required before a student can enter the first year's or lowest class. The successive higher classes are organized in accordance with the University curriculum and with a plan of gradual development extending over four years.

Medals and prizes in books are awarded to the best scholars, at the Christmas Examination.

Serampore College.

AFFILIATED, 1857.

This Institution was founded in 1818, under the patronage of the Marquis of Hastings, then Governor-General of India, by the Rev. Dr. Carey, Dr. Marshman and W. Ward, who together with Col. Treffling, the Danish Governor of Serampore, and J. C. Marshman, Esq., formed the first Council.

In 1821, it received a munificent donation from the King of Denmark, consisting of certain premises to the northwest of the College, and this act of liberality was followed in 1828 by the grant of a Royal charter giving perpetuity to the Institution and its endowments. At the cession of Serampore to the East India Company, this charter was confirmed, at the especial request of the Danish Sovereign.

The ground on which the College stands was purchased chiefly by subscription; the entire expense of the buildings, amounting to about £15,000, was met out of the private funds of the Serampore Missionaries, who were the first promoters of the undertaking. After the death of Dr. Marshman, the funds for carrying on the

operations of the College were provided partly by the endowments, but chiefly by the liberality of J. C. Marshman, Esq., the only surviving member of the original Council. On his departure from India in 1856, the College was placed under the general direction of the Baptist Missionary Society, which has since contributed towards its support and become identified with its operations.

It is conducted by two European Professors and a European Superintendent of the lower school, assisted by twelve native teachers. The number of youths in the College department is about *thirty*, in the school *five hundred*.

The interest of funds raised by Mr. Ward in Europe and America supports wholly, or in part, several European youths, connected with the Mission or wishing to become so, and also a boarding School for the children of native preachers. Scholarships to the amount of about 40 Rs. monthly are distributed amongst the most deserving of the native students in the College classes.

An education fee, exacted from the European students, contributes to the preservation and improvement of the Library.

The course of study is intended to impart a liberal education, and special attention is paid to the principles of Christianity,

The present members of the Council are J. C. Marshman, Esq., M. Townsend, Esq. M. Wylie, Esq. Revs. J. Sale and J. Trafford ; Secretary, Rev. W. Sampson.

The education is conducted by the Rev. J. Trafford, A. M. Principal, Rev. W. Sampson, Professor of Mathematics, and E. Dakin, Esq., Head Master of the school.

St. John's College, Agra.

AFFILIATED, 1861.

This College was established in 1850, in connection with the mission of the Church Missionary Society at Agra, chiefly at the instance of an influential body of Civilians and Military Officers then forming the Committee of the Local Church Missionary Association, who wished to have an Educational Institution of a high order connected with the Mission.

The large and handsome gothic building, in which the classes are now held, erected from the design of Major Kitto, was completed in 1853; and at the outbreak of the mutiny in 1857, the number of students on the rolls had reached 330 under the able superintendence of the Rev. T. Valpy French, M. A. the first Principal.

Scholarships.

1. The College is endowed with two scholarships founded in memory of the late Mr. Thomason and bearing his name, value Rs. 10 per month each, and tenable for one year. These scholarships are assigned at the annual Christmas examination to the two most proficient students in English literature.

2. There are also two endowed theological scholarships, founded in 1861, value Rs. 5 per month and tenable for one year, assigned to the two students who shew themselves best acquainted with the doctrines and principles of the Christian religion.

3. Other scholarships, to the value of nearly Rs. 40 per month, are given from the general funds of the College for proficiency in English, Mathematics, Hindee, and Persian.

4. A scholarship, of the value of Rs. 5 per month at

least, is awarded to each student who has passed the Calcutta University Entrance Examination.

FEES.

Every student is required to pay entrance and schooling fees, ranging from 4 annas to Rs. 3 per month, according to the income of his parent or guardian.

Joy Narain's College, Benares.

AFFILIATED, 1862.

A free school was founded in the year 1818 by Rajah Joy Narain Ghosal, Bahadoor, in gratitude for his recovery from a protracted illness.

He endowed it with a monthly sum of Rupees 200, increased by Government to Rupees 452, and appointed the Committee of the Calcutta Church Missionary Association for the time being trustees, with directions that they should "appoint such members as shall be able to satisfy the enquiries of the learned of this ancient city on subjects of Science, History and Religion."

In 1853, the spacious school room provided by Joy Narain having been found insufficient for the number of students, the present building was erected; at the same time the school was raised to a College, and named after the founder.

St. Thomas' College, Colombo.

AFFILIATED, 1864.

This Institution was founded by Bishop Chapman, in 1851, and consists of two parts: the College and Collegiate School.

The College instruction comprehends two courses of study: one adapted to those who desire a general

education; the other, to those who intend to devote themselves to the ministry.

The former course consists of Lectures in Divinity, Logic, Classics, Mathematics, History, Natural Science, and the study of the English language.

The instruction in the Theological Course is in strict conformity with the principles of the Church of England.

No scholar of the School who has passed the Entrance Examination of the Calcutta University is permitted to continue in the School; he must either enter the College, or cease his connexion with the Institution.

There is also an Orphan Asylum appended to the Institution.

**Thomason Civil Engineering College, Roorkee.**

AFFILIATED, 1864.

The Thomason College was founded in 1847 under the auspices of the Hon'ble James Thomason, Lieutenant-Governor, N. W. Provinces. It is designed to supply the Public Works and Survey Departments with Assistant Engineers, Overseers and Sub-Surveyors or Sub-Overseers.

The College is divided into the Senior, First, Second and Third departments. The Senior consists of officers of the Army, the First of Civilians (English and Native) ; both of these departments pursuing the same course of study. The students remain for three terms, and on the successful completion of their studies receive certificates and appointments as Assistant Engineers or Surveyors in the Government service. Senior department students pay 10 rupees a month, instruction is gratuitous to the rest, and in the native class are 6 Scholarships of 50 Rs. a month open to natives of the Upper Provinces only. Candidates for the 1st Department must be 18 years of age, and must have passed the First Examination in Arts of the Calcutta University.

The second department consists chiefly of English soldiers, but there is also a Civilian class (English and

Native) attached. The students remain one term, and are passed out as Overseers in the Public Works Department. Instruction is gratuitous, and there are six Scholarships of 30 Rs. monthly in the English Civil class, and six of 10 Rs. monthly in the native class. The Entrance Examination comprises Arithmetic, Practical Geometry, and Mensuration, with English Dictation and Reading.

The instruction in both the above departments is entirely in English.

The third department is for natives only, (the instruction being in the Vernacular) who remain two terms, and are passed out as Sub-Overseers or Sub-Surveyors of the 1st and 2nd class. In this department, there are ten Scholarships of 10 Rs., and forty of 5 Rs. monthly. The Entrance Examination comprises Arithmetic, Geometry, and Mensuration, with Urdu Dictation and Reading.

The course of study varies in the different departments, but includes Mathematics, Civil Engineering, Surveying and Drawing for all, besides instruction for the higher departments in Chemistry, Mineralogy and Photography.

The following is the detail of the four principal subjects for the two higher departments.

Mathematics.

Arithmetic, Algebra, Geometry, Trigonometry, Statics, Dynamics, Hydrostatics and Hydrodynamics, Conic Sections, Differential and Integral Calculus, Spherical Trigonometry.

Civil Engineering.

Building materials, their nature, uses and strength, principles of general construction, including earth-work, masonry and carpentry. Special constructions,

such as Roads, Bridges, Buildings, Irrigation works and Railways, applied Mechanics, Machinery, Designing, Estimating, Laying out work.

Surveying.

Use and adjustment of instruments, viz., Chain, Compass, Sextant, Level and Theodolite, taught practically in the field. Execution of Surveys with the Chain and the compass, Theodolite and plane Table. Trigonometrical Surveying, Levelling, Contouring, Practical Astronomy.

Drawing.

Construction of Scales, making Plans and Sections from actual measurements. Mapping, and a regular course of Engineering. Architectural, Mechanical and Perspective Drawing.

The subjects taught to the two lower departments are of course both fewer and are more restricted.

The preceptive Staff of the College is as follows :—

Major J. G. Medley, R. E., Principal.

Lieutenant J. Browne, R. E., Assistant Principal.

Lieutenant A. Cunningham, R. E., ditto ditto, officiating.

Murray Thomson, Esq., M. D., F. R. S. E., Professor of Experimental Science.

Mr. P. Keay, Head Master.

Sergeant Graham, Assistant ditto.

W. Scotland, Esq. Drawing Master.

Sergeant G. Pearce, Assistant Drawing Master.

Behari Lall, 1st Native Master.

Sheikh Becha, 2nd ditto ditto.

Fusseh Ooddeen, 3rd ditto ditto.

Shumbhoo Doss, Native Surveying Master.

Gunesshee Lall, Native Drawing Master.

Futteh Chund, ditto ditto.

Lahore Mission School.

AFFILIATED, 1864.

This Institution was founded on the 19th December, 1849, soon after the annexation of the Punjab, and is the oldest English school in the Province.

In the College department there are two classes ; in the first of which there are eight students, and in the second six, all of whom have passed the Entrance Examination. Of these one is a Musulman, four are Christians and nine are Hindus.

The four religions represented in the school are the Hindu, Musulman, Sikh and Christian. The greater part being Hindus. The number of Sikhs is small, owing to the fact that they compose a small part of the community.

The Instructive Staff consists of the Rev. J. Newton, M. A., the Rev. C. D. Forman, M. A., Principal, J. Newton, Jr., M. D., Mr. G. D. Maitra, Head Master, and fourteen other Teachers.

**Cathedral Mission College, Calcutta.**

AFFILIATED, 1865.

This Institution was established at the beginning of the present year (1865), in connection with the Church Missionary Society, and is open to all matriculated students of the University.

The course of study is that prescribed by the University for the First Arts and B. A. Examinations, with the addition of the Bible and Christian Evidences.

The monthly fee required for each student is at present Rs. 2, with an admission fee of Rs. 2.

An endowment has been provided by the liberality of the friends of native education in England sufficient to maintain four Theological Scholarships, two of rupees 10 per month, and two of rupees 5, intended to encourage the study of Moral Philosophy and History in connection with revealed truth. The elections to these Scholarships take place annually.

Scholarships to the extent of about Rs. 50, and tenable for a month, are also given to those students who stand highest in the monthly Examinations.

The instructive staff of the College is as follows :—

The Rev. J. Barton, M. A., Principal.

The Rev. J. Welland, B. A.

The Rev. E. C. Stuart, B. A.

The Rev. S. Dyson.

Baboo Prosunno Chunder Roy, M. A.

Baboo Tara Churn Chatterjee.

Pundit Ramnarain Vidyaratna.

The management of the College is vested in a Board of which the Bishop of Calcutta is President ; and the Missionaries attached to the College are mainly supported, as its name indicates, by the Cathedral Church Mission Fund, made over to the Church Missionary Society in 1857 by the late Bishop Wilson, by whom the Fund was originated.

EXAMINATION PAPERS.

—◆—
Entrance Examination,

1865.

ENGLISH POETRY.

Examiners, { REV. J. S. BEAUMONT.
Mr. J. T. D. CAMERON.

1. Paraphrase one of the following passages, and give a general analysis of the same :—

A.

'Tis distance lends enchantment to the view,
And robes the mountain in its azure hue ;
Thus, with delight, we linger to survey
The promised joys of life's unmeasured way ;
Thus, from afar, each dim-discovered scene
More pleasing seems than all the past hath been,
And every form, that fancy can repair
From dark oblivion, glows divinely there.

B.

Cease, every joy, to glimmer on my mind ;
But leave, oh ! leave the light of hope behind !
What though my winged hours of bliss have been,
Like angels' visits, few and far between,
Her musing mood shall every pang appease
And charm—when pleasures lose their power to please.

(a) In what metre are the above extracts composed? Scan the last line of extract A., dividing feet, and marking accented syllables.

(b) Parse fully the following words 'it,' 'lends,' 'afar,' 'than,' 'that.'

(c) What was the original form of the word 'it?' Account for the final *t*. Give a short history of 'its.'

(d) What well-known alliteration occurs in the second extract? and to whom was Campbell possibly indebted for the beautiful simile?

(e) Give the derivation of 'survey,' 'scene,' 'oblivion,' 'between.'

2. Explain the classical, historical, and other allusions in the italicized words of the following passages:—

(a) The *Aonian Muses* say.

(b) Thus, while *Elijah's burning wheels* prepare, &c., &c.

(c) And such thy strength-inspiring aid that bore
The hardy *Byron*, &c.

(d) And like the *trembling Hebrew*, &c.

3. Triumphal arch, that fillest the sky

When storms prepare to part,
I ask not proud philosophy
To teach me what thou art.

When science from creation's face
Enchantment's veil withdraws,
What lovely visions yield their place
To cold material laws!

When o'er the green undeluged earth
Heav'n's covenant thou didst shine,
How came the world's grey fathers forth,
To watch thy sacred sign!

(a) State the metre of this poem, and scan the first and second lines of the third stanza.

(b) Show the appropriateness of the word '*triumphal*.'

(c) What is the sense of '*to part*?' Quote a line from a well-known poem, in which the word is used in the same sense.

(d) Paraphrase the second stanza, and give a general analysis of it, quoting a passage from any other English poet who, writing of the rainbow, expresses a different opinion from Campbell.

(e) Does the prefix *un* in '*undeluged*' fully convey the writer's meaning? Give the sense in full.

(f) Who are meant by the "world's grey fathers?" Whence did Campbell most probably obtain the expression?

4. Still to new scenes my wandering muse retires,
And the dumb show of breathing rocks admires;
Where the smooth chisel all its force has shown,
And softened into flesh the rugged stone.
In solemn silence a majestic band,
Heroes and gods, and Roman consuls stand,
Stern tyrants, whom their cruelties renown,
And emperors in Parian marble frown;
While the bright dames, to whom they humble sued,
Still show the charms that their proud hearts subdued.

(a) Write the above with the words placed in prose order, but without altering any words.

(b) Explain the fourth line.

(c) What words have their parts of speech altered by poetic license?

(d) Which of the Fine Arts does the passage describe? What ancient nation excelled in its cultivation? Name the individuals of eminence in it? Name the Englishmen who have taken a lead in it in the present century?

5. May I but meet thee on that peaceful shore,
 The parting word shall pass my lips no more !
 Thy maidens, grieved themselves at my concern,
 Oft gave me promise of thy quick return.

- (a) With what event were those lines connected ?
 (b) Parse *but* and 'meet.'
 (c) What was the "parting word ?"
 (d) Explain the last line.

6. Thee, goddess, thee Britannia's isle adores ;
 How oft has she exhausted all her stores !
 How oft in fields of death thy presence sought !
 Nor thinks the mighty prize too dearly bought.

- (a) What goddess is addressed ?
 (b) Name two verbs in the passage, of Latin origin, and give the meanings of their prefixes and roots.

7. Write a short biographical sketch of Thomas Campbell, of Addison, or of Cowper. Name the principal poems of each of them.

1. We are not now speaking of *such* lucky discoveries as mere chance has sometimes suggested, even to the most inattentive understandings. *How far* we are indebted to this source for many of those ordinary arts, the origin of which is lost in antiquity and fable, *it* would not be very easy to determine. The accounts relating to such subjects have been principally handed down to us by poetry and popular tradition, *both which* are lovers of the mysterious and the marvellous. *Hence there* is reason to believe *that* they are *much too*

full of those wonders which strike an unenlightened fancy ; and that, *instead of* the slow and successive efforts by which the arts *in question* were actually discovered and improved, there has been substituted, *in many cases*, the *more* dramatic incident of a sudden inspiration, *merely for the sake of effect*.

Paraphrase the above passage ; parse the words, and specify the nature of the clauses in italics.

2. Explain the following :—

(a) Such allurement is there even in the veiled countenance of a new truth !

(b) Exhibiting the choice of Hercules in real life, and verifying the beautiful fiction of Prodicus.

(c) Duval jestingly told him that he should not have the seal, unless he could describe the *armorial bearings on it in correct heraldic phrase*.

(d) He obtained letters of naturalization in France.

(e) You cannot run that Greek verb through all the synopsis, and are blank at a page in Homer.

(f) With whom he served first for seven years *under his indenture*, and then for seven more *as a journeyman*.

3 (a) Who wrote the *King's Quhair* ? Give the meaning of the title. What is said in commendation of that production ?

(b) Of whose name was the Latin anagram formed, "*Himself a great library* ?" Give a brief account of him.

4 (a) There are three purposes () which languages may be studied independently () their gratifying that general desire () information () makes both () acquirement () the possession () all knowledge delightful.

(b) There are certain thieves who hang () a student and () daily destroy much () might be () great value () him.

Punctuate the above sentences; supply the ellipses. What are the *three purposes* referred to in (a), and the *thieves* referred to in (b) ?

5. Give instances from Craik's "Pursuit of Knowledge," of some very remarkable discoveries in art and science having been suggested by the most ordinary circumstances in life.

6. Explain the following :—

(a) All the doors were *on jar*.

(b) He rode *hard*.

(c) He played *me false*.

(d) "I was compelled to learn *by the violence of the time*."

And give the difference between *Not one*, and *No one* ; He arrived *late*, and he arrived *late*ly.

7. (a) Give six verbs that are used both as *transitive* and *intransitive*.

(b) What are *irregular*, *impersonal*, and *reflexive* verbs ? Give two examples of each.

(c) Give the simplest rule for the use of *shall* and *will* in simple sentences.

8. (a) Give an example of the *direct* form of speech, and transform it into the *indirect* form. Distinguish also between the *regular* and the *inverted* order of sentences.

(b) Distinguish between *compound* and *complex* sentences ; and also between *principal*, *subordinate*, and *co-ordinate* clauses.

9. Give the meanings and derivations of the following words :—*Laity*, *Satellite*, *Polyglot*, *Anagram*, *Epitaph*, *Surfeit*, *Talisman*, *Gymnosophists* ; and give the plurals of *Cherub*, *Appendix*, *Penny*, *Genus*, and *Genius*.

10. Briefly describe the Feudal System. Explain *Crown-vassals*, *Franklins*, *Fiefs*.

7. Translate into Latin:—

Sallust informs us that in early life Jugurtha was remarkable for the vigour of his frame and the grace of his person; but, above all, that he was distinguished for his intellectual abilities. What sort of a person he afterwards became, may be stated in a very few words. It is evident that he was crafty, bold, and sanguinary; that he was a man of inexhaustible resources, but devoid of all scruples; in short, as has justly been remarked, that he combined the subtilty of the

Carthaginian with the ferocity of the Moor. His end was a very miserable one. He was betrayed into the hands of the Romans, by whom he was thrown into prison, and there starved to death. This would appear to have taken place about the first of January in the hundred and fourth year before the commencement of the Christian era.

His physical constitution was healthy, robust, and wonderfully enduring. Indifferent alike to heat and cold, the same scanty and homely clothing sufficed him both in summer and winter. He was moderate in his diet, yet on occasions of festival he could drink more wine than any other man, without being intoxicated. It was a principle with him to contract his wants as much as possible ; for he had a maxim that to want nothing belonged only to the gods, and to want as little as possible was the nearest approach to divine nature.

3. How many yards of matting 3·5 feet wide will cover the floor of a room 85·3 feet long, and 40·5 feet broad? and how much will it cost, at 2 rupees 10 annas and 8 pie per square yard?

4. If the wages of 25 men amount to 766 rupees 10 annas 8 pie in 16 days, how many men must work 24 days to receive 1035 rupees, the daily wages of the latter being one-half those of the former?

5. What principal in 3 years 73 days will amount to 100 rupees 15 annas, at $6\frac{1}{4}$ per cent. simple interest? A bill for 5035 rupees 4 annas, drawn on September 12th at 5 months, was discounted on January 16th at 4 per cent.; what was the discount charged?

6. Divide the continued product of $1 + x + y$, $1 + x - y$, $1 - x + y$, and $x + y - 1$ by $1 + 2xy - x^2 - y^2$; and resolve $4(u^2 - xy)^2 - (u^2 - x^2 - y^2 + z^2)^2$ into four factors.

7. Find the greatest common measure of $2x^5 - 11x^2 - 9$ and $4x^5 + 11x^4 + 81$; and reduce $\frac{x^3}{x^4 + 4x^2 - 47x - 210} \cdot \frac{6x^2 - 37x + 210}{x^4 + 4x^2 - 47x - 210}$ to its lowest terms.

8. Simplify as much as possible *any one* of the following:—

$$(1) \frac{x^3}{(x-y)(x-z)} + \frac{y^3}{(y-x)(y-z)} + \frac{z^3}{(z-x)(z-y)}.$$

$$(2) \frac{1}{x(x-y)(x-z)} + \frac{1}{y(y-z)(y-x)} + \frac{1}{z(z-x)(z-y)}.$$

$$(3) \frac{x^2 - yz}{(x-y)(x-z)} + \frac{y^2 + zx}{(y+z)(y-x)} + \frac{z^2 + xy}{(z-x)(z+y)}.$$

9. Find the value of $\frac{x+2a}{x-2a} + \frac{x+2b}{x-2b}$ when $x = \frac{4ab}{a+b}$.

10. Resolve *any two* of the following equations:—

$$(1) \frac{x-a}{b} + \frac{x-b}{c} + \frac{x-c}{a} = \frac{x-(a+b+c)}{abc}.$$

$$(2) \frac{1}{2} \left(x - \frac{a}{3} \right) - \frac{1}{3} \left(x - \frac{a}{4} \right) + \frac{1}{4} \left(x - \frac{a}{5} \right) = 0.$$

$$(3) \frac{x-1}{x-2} - \frac{x-2}{x-3} = \frac{x-5}{x-6} - \frac{x-6}{x-7}.$$

$$(4) \left(\frac{a^2}{x} + b \right)^{\frac{1}{2}} - \left(\frac{a^2}{x} - b \right)^{\frac{1}{2}} = c^{\frac{1}{2}}.$$

GEOMETRY.

Examiners, $\left\{ \begin{array}{l} \text{REV. J. CARBONELLE.} \\ \text{MR. D. CARNDUFF.} \end{array} \right.$

1. What are parallel straight lines? When is a straight line said to be perpendicular to another? What are the complements of a parallelogram? What is a gnomon?

2. Define a circle, a sector of a circle, a segment of a circle; when is a sector also a segment? When is a circle said to be *inscribed* in a plane rectilineal figure? When is a plane rectilineal figure said to be inscribed in a circle?

3. If two triangles have two sides of the one equal to two sides of the other, each to each, but the angle contained by the two sides of the one greater than the angle contained by the two sides equal to them of the other, the base of that which has the greater angle shall be greater than the base of the other; required a proof.

4. Resolve *any one* of the following:—

(a) Given one of the sides of a right-angled triangle containing the right angle and the sum of the other two sides, to construct the triangle.

(b) Given one of the sides of a right-angled triangle containing the right angle and the difference of the other two sides, to construct the triangle.

(c) The straight line drawn from the right angle of a right-angled triangle to the middle of the opposite side, is equal to the half of that side.

5. If a straight line be divided into two equal parts, and also into two unequal parts, the rectangle contained by the unequal parts together with the square of the line between the points of section is equal to the square of half the line; required a proof.

6. Resolve *either* of the following :—

(a) Divide a given straight line into two parts, so that the rectangle contained by them shall be equal to a given square.

(b) Produce a given straight line so that the rectangle contained by the whole line thus produced and the part of it produced, shall be equal to a given square.

7. The angles in the same segment of a circle are equal to one another; required a proof.

8. Demonstrate *either* of the following :—

(a) If a rectilineal figure of an even number of sides be inscribed in a circle, the first, third, fifth, &c., angles are together equal to the second, fourth, sixth, &c., angles taken together, any angle being assumed as the first.

(b) If a circle be inscribed in any triangle, the points of contact shall divide the sides into segments such that any one side together with the remote segment of either of the other two sides shall be equal to half the sum of the three sides.

ENGLISH POETRY.

Examiner.—REV. W. C. FYFE.

1. Write out the substance of the story told in Byron's poem, "The Prisoner of Chillon," and describe the structure of the versification.

2. Paraphrase the following passages, substituting, in every instance, common expressions for those which are figurative :—

(a) "Not but the human fabric from the birth
Imbibes a flavour of its parent earth.
As various tracts enforce a various toil,
The manners speak the idiom of their soil.
An iron-race the mountain cliffs maintain,
Foes to the gentler genius of the plain."

(b) "This is the bud of being, the dim dawn,
The twilight of our day, the vestibule.
Life's theatre as yet is shut, and Death,
Strong death, alone can heave the massy bar,
This gross impediment of clay remove,
And make us embryos of existence free.
From real life but little more remote
Is he, not yet a candidate for light,
The future embryo slumbering in his sire."

3. What Poets are alluded to in the following lines? Point out the words which most clearly mark out what particular Poets are meant.

"The verse adorn again
Fierce war, and faithful love,

And truth severe, by fairy fiction drest.
 In buskin'd measures move
 Pale grief and pleasing pain,
 With horror, tyrant of the throbbing breast."

4. Mark out the feet and accentuation in the following lines, and parse the italicized words :—

" *How beautiful is night !*
A dewy freshness fills the silent air ;
 No mist obscures, nor cloud, nor speck, nor stain,
Breaks the serene of heaven."

5. Give the etymology and meaning of these words :—
Fabric, idiom, vestibule, theatre, embryo, candidate, buskin'd, tyrant, beautiful.

6. Characterize the genius and poetic style of Byron and of Southey.

7. State from what writers the following passages are taken, and explain the allusions they contain :—

(a) "In the midst a form divine,
 Her eye proclaims her of the Briton-line."

(b) ————"Mæonides,
 Or Milton, thee ! Ah, could I reach your strain,
 Or his who made Mæonides our own.
 Man too, he sung ; immortal man I sing."

(c) "Every gem,
 Some sages say, hath virtue ; but the science
 Of difficult attainment ; some grow pale,
 Conscious of poison, or with sudden change
 Of darkness, warn the wearer."

8. Classify adverbs according to their origin, and account for the frequent use of the same words as adjectives and adverbs. How far are adverbs inflected ?

9. Give examples of words that are adverbs, conjunctions, or prepositions, according as we use them.

10. Write a short essay on the origin and the use of *Synonyms* in languages generally.

PROSE.

Examiner.—MR. K. DEIGHTON, B. A.

1. What defect have you noticed in De Quincey's style? Contrast the characters of Wordsworth and Southey as delineated by this writer. What change in Southey's political creed is alluded to in the following words:—"The great revolution in his way of thinking on such subjects, with which he has been so often upbraided, could not have then taken place?"

2. To what two mistakes on the part of the besiegers was it principally due that Malta was not taken? Draw a plan of the island, marking out its fortifications at the time of the siege. Describe briefly the constitution of the order of the Knights of Malta. With what objects was it formed? What different causes led to the extinction of this order, and of that of the Knights Templars?

3. Notice grammatically the italicized words in the subjoined sentences:—

(a) "In aid of the funds then *raising* in *behalf*," &c.

(b) "But it was not long before the wilderness *was to blossom* like the rose."

(c) "If *to-morrow turn* out like the rest"—would *turns* be admissible?

(d) "And *the* more so that Miss Wordsworth," &c.

(e) "*To go* off without paying, made us swindlers."

4. Explain :—

(a) "One of those spiritual weapons from the papal armoury which have sometimes proved of singular efficacy in times of need, came now most seasonably to the aid of La Valette. A bull of Pius the Fourth granted plenary indulgence for all sins which had been committed by those engaged in this holy war against the Moslems."

(b) "Being a porcelain man among so many delf men."

(c) "It was the impression of the vale that George Green might have saved himself singly."

(d) "By reading into coherency the sad hieroglyphics of their last agonies."

(e) "On that disastrous day, when the Christian navy was scattered before Algiers, the Maltese galleys were among the few that rode out the tempest." What is the historical allusion here ?

5. What are the chief conditions of a full and perfect alphabet and orthography ? Wherein is the English alphabet redundant ?

6. Give the five fundamental rules of Euphony.

7. Mention the more important classes of derived verbs. The construction of the English infinitive is two-fold. Exemplify this ; and point out the causes to which it is owing.

8. What idea is denoted by the terminations *-th* and *-ness* ? Investigate the formation of the word *its*.

9. Derive, and give the meanings of the following words :—*Fascines ; gabions ; commanderies ; janizaries ; force ; and tarn.*

LATIN POETRY.

Examiner.—REV. J. OGILVIE, M. A.

1. It has been remarked that one of the chief beauties of Virgil's *Bucolics* is the art with which the poet represents external nature as in sympathy with the joys and sorrows of pastoral life: quote, or refer to, any passages that appear to illustrate this remark. Give the derivation and literal meaning of *Bucolica* and *Ecloga*.

2. Quamvis multa meis exiret victima septis,
Pinguis et ingratae premeretur caseus urbi,
Non unquam gravis ære domum mihi dextra redibat.

(a) What is the derivation and full meaning of *quamvis*? Give an instance from one of the *Eclogues* where this word is construed with the Indicative. (b) What is the idea implied in *ingratae* here? How would you express in Latin the words *gratitude* and *ingratitude*? (c) Distinguish between *victima* and *hostia*. (d) What does the term *æs* properly denote? Explain *in æs alienum incidere*.

3. Fortunate senex, ergo tua rura manebunt,
Et tibi magna satis, quamvis lapis omnia nudus
Limosoque palus obducatur pascua junco!
Non insueta graves tentabunt pabula foetus,
Nec mala vicini pecoris contagia lædent.
Fortunate senex, hic, inter flumina nota
Et fontes sacros, frigus captabis opacum!
Hinc tibi, quæ semper vicino ab limite sepes
Hyblæis apibus florem depasta salicti,
Sæpe levi somnum suadebit inire susurro.

(a) If both *tua* and *manebunt* be here emphasized, that is, if both these words be considered as predicates, how would

you express the full meaning of *tua rura manebunt*? (b) Define the situation of these lands. What was the cause of their being in the condition mentioned in the third line? (c) Account for the epithet *sacros*. (d) Explain the construction *florem depasta*. When the accusative is employed as here, what is the particular relation which it always denotes? Illustrate your answer by an example. (e) Translate the last three lines.

4. Translate the following passage :—

At tibi, prima, puer, nullo munuscula cultu,
 Errantes hederas passim cum baccare tellus
 Mixtaque ridenti colocasia fundet acantho.
 Ipsæ lacte domum referent distenta capellæ
 Ubera, nec magnos metuent armenta leones.
 Ipsa tibi blandos fundent cunabula flores.
 Occidet et serpens, et fallax herba veneni
 Occidet; Assyrium vulgo nascetur amomum.
 At simul heroum laudes, et facta parentis
 Jam legere, et quæ sit poteris cognoscere virtus;
 Molli paullatim flavesceat campus arista,
 Incultisque rubens pendebit sentibus uva,
 Et duræ quercus sudabunt roscida mella.

(a) What does *munuscula* denote? Is there any special reason for its being used here? (b) Express the full force of *ipsæ*. (c) Give the derivation and precise meaning of *virtus*. (d) Distinguish *metuo te*, *metuo tibi*; *metuo ut venias*; *metuo ne venias*.

5. Translate—

7. (a) Sed tamen, iste deus qui sit, da, Tityre, nobis.

Who is the *deus* here referred to? What is the exact meaning of the pronoun *iste*? Explain *da mihi illum librum*, and *da mihi istum librum*.

(b) Triste lupus stabulis.

Account for the gender of *triste*. What would be the idea conveyed by *tristis lupus stabulis*?

(c) Ultima Cumæi venit jam carminis ætas.

Explain the allusion in this line.

(d) ——— sæpe ego longos

Cantando puerum memini me condere soles:
 Nunc oblita mihi tot carmina.

Translate these words. Parse *oblita*, and state what is remarkable as to the way in which it is used here.

8. Explain any peculiarity either in the scansion, or in the quantity of any of the syllables of the following lines:—

- (a) Tityrus hinc aberat. Ipsæ te. Tityre, pinus.
 (b) Et succus pecori, et lac subducitur agnis.
 (c) Desine plura puer; et quod nunc instat agamus.
 (d) Matri longa decem tulerunt fastidia menses.

9. Translate into Latin—(Verse, if you can; if not, Prose)—

No more shall nation against nation rise,
 Nor ardent warriors meet with hateful eyes.
 The lambs with wolves shall graze the verdant mead,
 And boys in flowery bands the tiger lead.

1. Triangles upon equal bases and between the same parallels are equal to one another.
2. Describe a triangle having each of the angles of the base double of the third.
 Prove that the smaller of the two circles employed in the construction of the diagram is equal to the circle described about the required triangle.
3. If the outward angle of a triangle, made by producing one of the sides, be divided into two equal angles by a straight line which also cuts the base produced, the segments between the dividing line and the extremities of the base have the same ratio which the other sides of the triangle have to one another.

If the two sides containing the angle through which the bisecting line is drawn be equal, interpret the result of the proposition.

4. Every solid angle is contained by plane angles, which together are less than four right angles.

5. Gold is sold at the Mint at £3 17s. 9d. per oz., and is mixed with alloy, worth 5s. 2d. per oz., in the ratio of 11 : 1.

If sovereigns be coined of this mixture, each weighing 5 dwts. 3.247 grs., what is the Mint profit per 100 sovereigns?

6. Solve the equations—

$$\left(\begin{array}{l} (1+x)(1+y)=10 \\ x^2y+y^2x=18 \end{array} \right) \quad \left(\begin{array}{l} \frac{x^2}{y} + \frac{y}{x} + \frac{x}{y} = 27 - \frac{y^2}{x^2} \\ x-y=2. \end{array} \right)$$

7. A bankrupt has three creditors, of whom A receives a shilling in the pound more than B, and B a shilling in the pound more than C. A is thus paid £100 less than B, and B £100 less than C; the total debts were £3000, and the assets £1200; how much was due to each?

8. Eliminate x from the following equations:—

$$x^3 + \frac{1}{x^3} + 3 \left(x + \frac{1}{x} \right) = m.$$

$$x^3 - \frac{1}{x^3} - 3 \left(x - \frac{1}{x} \right) = n.$$

9. Find the sum of the following series to n terms:—

$$a - ar + ar^2 - ar^3 + \&c.$$

Find the order of magnitude of the arithmetical, geometrical, and harmonic mean between two numbers a and b .

10. Apply the binomial theorem to expand $\frac{3a}{(ax^3-x^2)^{\frac{1}{3}}}$ in a series ascending by powers of x ; obtain the first 5 terms of the series, and write down the $(r+1)^{th}$ term of the expansion.

TRIGONOMETRY, LOGARITHMS, AND STATICS.

Examiner.—MR. C. W. HATTEN, B. A.

1. The secant of a certain angle in the first quadrant is $\frac{17}{6}$; find the other Trigonometrical functions of that angle.

Can $\frac{41}{9}$ be the secant of an angle in any other quadrant?

Can $\frac{9}{41}$ be the secant of an angle?

2. Find an expression for all the angles which have a given tangent.

Find all the angles between -180° and $+180^\circ$ which satisfy the equation,

$$\tan^2 \theta = 3.$$

3. Investigate geometrically expressions for $\sin 2A$ and $\cos 2A$ in terms of the trigonometrical functions of A .

Deduce an expression for $\cos 4A$ in terms of $\cos A$.

4. Prove that

$\cos A + \cos 3A + \cos 7A + \cos 9A = 4 \cos A \cos 3A \cos 5A$; and that if A, B, C, D , be the angles of a quadrilateral inscribed in a circle,

$$\cos A + \cos B + \cos C + \cos D = 0.$$

5. What is the logarithm of a number to a given base?

Show that

$$\log_a mn = \log_a m + \log_a n,$$

Given

$$\log 3 = .47712$$

$$\log 11 = 1.04139,$$

find $\log \frac{11}{3}$, $\log 990$, $\log .03333\dots$, $\log \left(\frac{3}{121} \right)^{\frac{1}{2}}$

6. If A, B, C , be the angles of a triangle, and a, b, c , the lengths of the sides respectively opposite to A, B, C ; prove that

$$\tan \frac{1}{2} (B - C) = \frac{b - c}{b + c} \cot \frac{A}{2},$$

Two sides of a triangle are 5 and 4 yards, and the included angle 60° ; find the other angles, having given

$$\log 3 = .47712.$$

$$L \tan 10^\circ 53' = 9.28390$$

$$L \tan 10^\circ 54' = 9.28458$$

7. If one of two forces acting on a particle at right angles to each other be 15 P , and their resultant be 39 P , find the other force.

8. Find the resultant of two parallel forces acting in the same direction on a body.

6. Assuming the position of the centre of gravity of a triangle, prove that, if D be the middle point of BC , a side of the triangle $A B C$, and E the middle point of $A D$, E will be the centre of gravity of the quadrilateral $A B E C$.

10. The weight of the beam and hook of a common (or Roman) steelyard is 4 lbs., and the hook is suspended 4 inches from the fulcrum; the moveable weight must be placed 2 inches from the fulcrum when a weight of 5 lbs. is attached to the hook, and 5 inches when a weight of 11 lbs. is attached; what is the moveable weight? and how far from the fulcrum is the centre of gravity of the beam and hook? Where must the moveable weight be placed, when a weight of 19 lbs. is attached to the hook?

MENTAL PHILOSOPHY.

3. (a) How are marvellous events to be distinguished from miraculous ones ? (b) How will superior intelligence predispose the mind to receive marvellous statements ? (c) Justify Laplace's position that the more improbable a statement in which independent witnesses agree, the greater is the probability of its truth.

4. Distinguish between (a) *Sensation* and *Perception* ; (b) *Consciousness* and *Reflection* ; (c) *Memory* and *Conception* ; (d) *Imagination* and *Fancy* ; (e) *Physical*, *Efficient*, and *Final Causes* ; (f) *Innate Ideas*, and *Intuitive Articles of Belief*.

5. (a) What were the distinctive doctrines of the Nominalists and Realists ? (b) State some historical facts respecting the controversy between them. (c) What modification of opinion is indicated by the term Conceptualist ?

6. What presumptive evidence have we for the opinions (a) that *the mind is always thinking* ; and (b) that *absolute forgetfulness of any thing is impossible* ?

7. State the question involved in a discussion on the Freedom of the Will, and the opposite views advocated.

8. (a) Why are physical sciences more certain than those which deal with mental operations ? and (b) whence the

superiority of mathematical reasoning over that of any other kind?

9. (a) Enumerate the principal articles of belief usually designated "First Truths." (b) Why are they so called? (c) How are they distinguished from other truths? (d) Show that our conviction respecting causation is not the result of experience.

10. What perversions of reasoning are (a) Fallacies of division and (b) composition; (c) the non-distribution of the middle term; (d) a begging of the question; and (e) reasoning in a circle? Illustrate by an example of each.

MORAL PHILOSOPHY.

Examiner.—REV. J. D. DON.

1. What are the motive principles, or "moving powers" in our nature, i. e. those which directly excite the will to action? What are the determining principles, i. e. those which may interfere to check, prevent, or permit the action?

2. Distinguish between the Desire of Power and the Desire of Superiority. Show how each of them operates as a motive principle.

3. Define Sincerity, and contrast it with its opposite. Illustrate by examples.

4. How would you distinguish between Self-love and Selfishness? Does Self-love belong to the motive, or determining principles? Give reasons for your answer.

5. Trace the chain of sequences which displays the action of moral causes (a) as seen in sound and healthy exercise; (b) as exhibited in the disruption of moral harmony.

6. What is Conscience; its place among the moral powers; and its province in connexion with our relations to other beings?

7. If the mind has a native perception of moral quality, how does it come to pass that a man may become blinded, or have his vision distorted, as to the first great principles of moral truth?

8. What is the Utilitarian Theory of Morals? Distinguish it from the Selfish theory. What is Abercrombie's view (*a*) respecting the phenomena which the theories seek to explain; (*b*) respecting theories of morals in general?

9. How may it be shown that such eccentricities of practice as the encouragement of theft in Sparta, and infanticide in India, prove no diversity of moral feelings?

10. Is harmony of the moral feelings consistent with an exclusive devotion to the affairs of the present life; or with an exclusive devotion to religion? Give reasons for your answer.

B. A. Examination, 1866.

ENGLISH POETRY.

Examiner.—REV. W. C. FYFE.

1. Give concisely the plot of Sir Walter Scott's *MARMION*. In what does its chief excellency consist? What features of the manners of the feudal times are illustrated in *Marmion*?

2. State briefly what you conceive to be the characteristic merits and defects of Scott's Poetry. Quote, or refer to, any passage in *Marmion* that seems to you distinguished for beauty and force, and point out the particular points of beauty.

3. Name the leading characters in Shakspeare's play of *OTHELLO*. To what source does the story of *Othello* appear to be traceable? Give your impression of the character of *Iago*, and contrast it with that of *Edmund* in *King Lear*.

4. From what sources did the modern European Drama derive its origin? Trace shortly the history of the Drama in England down to Shakspeare's time.

5. ———— As when a cloud

Of gathering hail with limpid crusts of ice,
Enclos'd and obvious to the beaming sun,
Collects his large effulgence; straight the heavens
With equal flames present on either hand
The radiant visage: Persia stands at gaze,
Appall'd; and on the brink of Ganges doubts
The snowy-vested seer, in Mithra's name,
To which the fragrance of the south shall burn,
To which his warbled orisons ascend."

(a) Paraphrase this passage in plain prose.

(b) Enumerate the words derived from the Latin in this passage, and give pure English equivalents for them.

(c) Illustrate briefly the character of the superstition alluded to in the concluding lines.

6. " Good name in man and woman, dear my lord,
Is the immediate jewel of their souls :
Who steals my purse steals trash ; 'tis something—
nothing ;
'Twas mine, 'tis his, and has been slave to thousands ;
But he that filches from me my good name,
Robs me of that which not enriches him,
And makes me poor indeed."

(a) Who utters this speech, and on what occasion ?

(b) Give the derivation and literal meaning of the words—
jewel, purse, filches, trash, robs.

(c) Explain the meaning of the compound epithet *something—nothing*.

7. In what peculiar senses does Shakspeare sometimes use the following words :—Companion, demerit, knave, strange, voluble ?

8. (a) ——— " *Be assur'd of this,*
That the magnifico is much belov'd ;
And hath in *his* effect a voice potential,
As double as the *duke's* :—

- (b). ——— with cruel hand
Shake not the dying sinner's sand !
O look, my son, upon yon sign
Of the Redeemer's grace divine ;
O think on faith and bliss !
By many a death-bed I have been,
And many a sinner's parting seen,
But never aught like this."

- (c) OTT.—" It is the cause, it is the cause, my soul,
Let me not name it to you, you chaste stars !

It is the cause. Yet I'll not shed her blood ;
Nor scar that whiter skin of hers than snow,
And smooth as monumental alabaster.'

- (a) Parse the italicized words in this passage.
- (b) Mark out the feet and accentuation in these lines.
- (c) Describe the state of Othello's mind whilst he utters these words, by a quotation from Macbeth.

9. Exhibit, in a tabular form, the classification of English verbs that seems to you the most useful for syntax and composition.

10. Write a short essay on the principal peculiarities that distinguish the grammar of the *middle* English from that of the English of the *present* day.

PROSE.

Examiner.—MR. K. DEIGHTON, B. A.

1. Bacon's method has been indirectly, rather than directly, useful to mankind. Why so? Point out the one great error which mars its completeness. How does Aristotle's induction differ from that of Bacon?

2. Describe the plan of the Great Instauration; and mention the parts which were wholly, or nearly, finished by the author. What are the "three distempers of learning?" and what causes concurred to produce the first? How does Bacon criticize the method of the Schoolmen?

3. The ancients, while deifying inventors, and authors of discoveries for the service of human life, gave to founders of states, and lawgivers, the titles of heroes only. On what grounds does Bacon consider they were right in so doing?

4. Illustrate, by examples, the truth conveyed in Bacon's parable regarding alchemy.

5. Explain :—

(a) "For the human mind, if it acts upon matter, and contemplates the nature of things, and the works of God, operates according to the stuff, and is limited thereby."

(b) "To speak the truth, antiquity, as we call it, is the young state of the world; for those times are ancient when the world is ancient; and not those we vulgarly account ancient by computing backwards."

6. In what does the essence of the crime of libel consist? Supposing the ode attributed to Chenier to be the production of Peltier, and granting it to be libellous, what line of argument still lies open for the defendant?

7. "France in a few years described the whole circle of human society." Mention the different changes of government which took place between the downfall of the Monarchy, and the establishment of the Empire.

8. Give, as briefly as possible, Macaulay's estimate of Madame D'Arblay as a writer. What two causes spoilt her style?

6. Remark upon the following sentences :—

(a) "In whose demeanour the untamed ferocity of the Scythian might be discovered through a thin varnish of French politeness."

(b) "The inmates of Juniper Hall were all attached to the constitution of 1791."

(c) "Juno, as in the *Æneid*, delegated the work of vengeance to Alecto."

(d) "Miss Burney did for the English novel what Jeremy Collier did for the English Drama."

10. In what three sorts of writing are we especially liable to be imposed on by words without meaning? Define purity of style; and distinguish between *nonsense* and *absurdity* in language. Rewrite the subjoined sentence, both in the

direct and the indirect narration, so as to get rid of all ambiguity :—Lysias promised to his father never to abandon his friends.”

LATIN POETRY.

Examiner.—REV. J. OGILVIE, M. A.

1. To whom are the two Epistles of Horace's Second Book, and the Epistle *De Arte Poeticâ*, respectively addressed? What is the principal subject treated of in all the three?

2. Si, quia Græcorum sunt antiquissima quæque
Scripta vel optima, Romani pensantur eadem
Scriptores trutina; non est quod multa loquamur:
Nil intra est oleam, nil extra est in nuce duri:
Venimus ad summum fortunæ: pingimus atque
Psallimus et luctamur Achivis doctius unctis.

(a) What is the fact which Horace here admits in common with those whose views he combats? What inference—considered by Horace an erroneous one—was deduced from this fact? State the course of reasoning which he here employs in order to disprove this inference.

(b) *Græcorum sunt antiquissima quæque scripta vel optima.* Express this in idiomatic English, so as to bring out the precise meaning of *quæque* and of *vel*. (c) According to the reading here, what part of speech is *extra*? Instead of *oleam* some editions read *olea*; what argument derived from the construction might be urged in favour of this latter reading? (d) How do you determine the tense of *Venimus*? (e) What is the precise meaning of *psallimus*? (f) Explain the epithet *unctis*; to which of the foregoing verbs does it exclusively refer?

3. Non equidem insector delendaque carmina Livii
 Esse reor, memini quæ plagosum mihi parvo
 Orbiliū dictare; sed emendata videri
 Pulchraque et exactis minimum distantia miror;
 Inter quæ verbum emicuit si forte decorum, et
 Si versus paulo concinnior unus et alter,
 Injuste totum ducit venditque poema.

(a) What is the force of *equidem*? In what does it differ from *quidem*? (b) What author is here referred to? When and where did he flourish? (c) To what practice in the Roman mode of teaching does the word *dictare* refer? (d) Explain the difference of idiom with respect to the tense of the verb after *memini* in Latin, and that after *remember* in English. (e) What do you consider as the nominative and object of *ducit* and *vendit*? (f) Translate the last three lines.

4. Hic error tamen et levis hæc insania quantas
 Virtutes habeat sic collige.

Mention some of the advantages which Horace goes on to sketch out as attending the cultivation of poetry.

5. Translate the following passage; give a brief narrative of the war in which Horace here describes himself as having been engaged:—

Romæ nutriri mihi contigit, atque doceri
 Iratus Graiis quantum nocuisset Achilles.
 Adjecere bonæ paulo plus artis Athenæ,
 Scilicet ut vellem curvo dignoscere rectum,
 Atque inter silvas Academi quærere verum.
 Dura sed emovere loco me tempora grato,
 Civilisque rudem belli tulit æstus in arma
 Cæsaris Augusti non responsura lacertis.
 Unde, simul primum me dimisere Philippi,

Decisis humilem pennis inopemque paterni
Et laris et fundi, paupertas impulit audax
Ut versus facerem.

6. ——— Ego cur, acquirere pauca
Si possum, invideor, cum lingua Catonis et Enni
Sermonem patrium ditaverit, et nova rerum
Nomina protulerit?

(a) State the various ways in which *invideo* is construed.
(b) Mention some of those words or peculiarities of construction not to be found in any other author, but which Horace employs in virtue of the right which he here claims.

7. (a) What is the force of *per* in *perfidus*? In what other Latin adjective does it convey the same meaning? (b) Mark the quantity of the first syllable of *fides* (subs.), *fido* (verb), *fidus*, *fidelis*, and *fiducia*. (c) Mark the quantity of all the syllables of the genitive case of *Ixion* and *Io*. (d) Explain *ampulla*, *sesquipedalia*, *aulæa premere*, *aulæa tollere*, *orichalcum*.

8. Translate—

Romani pueri longis rationibus assem
Discunt in partes centum diducere. “Dicat
Filius Albini; Si per quincunce remota est
Uncia, quid superat? Poteras dixisse,” “Triens.” “Eul
Rem poteris servare tuam. Redit uncia, quid fit?”
“Semis.”

9. Translate the following from Juvenal:—

Bellorum exuviæ, truncis affixa tropæis
Lorica, et fracta de casside buccula pendens
Et curtum temone jugum victæque triremis
Aplustre, et summo tristis captivus in arcu,
Humanis majora bonis creduntur. Ad hæc se
Romanus, Graiusque, ac barbarus endoperator

Erexit : causas discriminis, atque laboris
 Inde habuit. Tanto major famæ sitis est, quam
 Virtutis. Quis enim virtutem amplectitur ipsam
 Præmia si tollas ?

10. Translate into Latin (verse if you can; if not—prose):—

Enlarge my life with multitude of days !

In health, in sickness, thus the suppliant prays ;

Hides from himself his state, and shuns to know,

That life protracted is protracted woe.

ANNALS, Book I. ; AGRICOLA.

Examiner.—MR. C. H. TAWNEY, M. A.

1. Translate, with brief explanatory notes :—

Prima Vari castra lato ambitu et dimensis principiis trium legionum manus ostentabant ; dein semiruto vallo, humili fossa accisæ jam reliquæ consedissee intelligebantur : medio campi albertia ossa, ut fugerant, ut restiterant, disjecta vel aggerata. Adjacebant fragmina telorum equorumque artus, simul truncis arborum antefixa ora. Lucis propinquis barbaræ aræ, apud quos tribunos ac primorum ordinum centuriones mactaverant. Et cladis ejus superstites, pugnam aut vincula elapsi, referebant hic cecidissee legatos, illic raptas aquilas ; primum ubi vulnus Varo adactum, ubi infelici dextera et suo ictu mortem invenerit ; quo tribunali concionatus Arminius, quot patibula captivis, quæ scrobes, utque signis et aquilis per superbiam inluserit.

2. Hunc rerum cursum, quamquam nulla verborum jactantia epistolis Agricolæ auctum, ut Domitiano moris erat, fronte lætus, pectore anxius excepit. Inerat conscientia derisui fuisse nuper falsum e Germania triumphum, emptis per commercia, quorum habitus et crinis in captivorum speciem formarentur ; at nunc veram magnamque victoriam tot millibus

hostium cæsis ingenti fama celebrari. Id sibi maxime formidolosum, privati hominis nomen supra principis attolli : frustra studia fori et civilium artium decus in silentium acta, si militarem gloriam alius occuparet ; et cetera utcumque facilius dissimulari : ducis boni imperatoriam virtutem esse. Talibus curis exercitus, quodque sævæ cogitationis indicium erat, secreto suo satiatus, optimum in præsentia statuit reponere odium, donec impetus famæ et favor exercitus languesceret.

3. Translate, and explain, the following passages :—

(a) Missionem dari vicena stipendia meritis ; exauctorari qui sena dena fecissent, ac retineri sub vexillo ceterorum immunes nisi propulsandi hostis.

(b) Achaïam ac Macedoniam onera deprecantes levare in præsens proconsulari imperio tradique Cæsari placuit.

(c) Gravium Marcellum prætorem Bithyniæ quæstor ipsius majestatis postulavit, subscribente Romano Hispone.

(d) Mox nostræ duxere Helvidium in carcerem manus ; nos Maurici Rusticique visus, nos innocenti sanguine Senecio perfudit.

4. What was the family connexion between Augustus Tiberius and Caligula ?

5. Give the theory of the Latin Gerund and Gerundive, and explain by it the following passages :—

(a) Volvenda dies en attulit ultro.

(b) Pœnarum grave sit solvendi tempus adultum.

6. Distinguish between—

(a) Si quid habet, dat.

(b) Si quid habeamus, dabimus.

(c) Si quid habeas, des.

(d) Si quid haberet, daret.

7. Translate into Latin Prose—

The Archbishop of Canterbury was a main agent in this fatal work ; a man vigilant enough, of an active or rather

of a restless mind ; more ambitious to undertake than politic to carry on ; of a disposition too fierce and cruel for his coat ; which, notwithstanding, he was so far from concealing in a subtle way, that he increased the envy of it by insolence. He had few vulgar and private vices, as being neither taxed of covetousness, intemperance, nor incontinence ; and, in a word, a man not altogether so bad in his personal character as unfit for the state of England.

এককালে এই অপূৰ্ণ আনন্দ-কাননে নিষ্কলঙ্ক দম্পতী-প্রেম-রই প্রাদুৰ্ভাব ছিল। তৎকালে অনেকানেক প্রধান ধৰ্ম্ম তাঁহার সহচর ছিল, কোন দুষ্কিয়া এ স্থানে প্রবেশ করিতেও সমর্থ হইত না। এক্ষণে তাহার সম্পূর্ণ বিপর্যয় ঘটিয়াছে। দম্পতী-প্রেম ও তাঁহার সহচরদিগের দৈন্যদশা উপস্থিত হইয়া পরানুরাগী কায়রূপ পিশাচেরই আধিপত্য বৃদ্ধি হইতেছে।

1. Explain নিষ্কলঙ্ক দম্পতী-প্রেম and পরানুরাগী কায়রূপ পিশাচ.

2. Mention some of the অনেকানেক প্রধান ধৰ্ম্ম.

এই সমুদায় শোচনীয় ব্যাপার শ্রবণ করিয়া আমি বিষাদ-সমুদ্রে মগ্ন হইলাম, এবং দয়া, ক্ষোভ ও ক্রোধ পর্যায়ক্রমে আমার অন্তঃকরণকে ব্যাকুলিত করিতে লাগিল। সাংসারিক লোকের এই সকল অন্যায়াচরণ ভাবিতে ভাবিতে সে রজনীতে আমার সুন্দররূপ নিদ্রা হইল না, কারণ চিন্তাকুল চিত্তে সুচারু সুষুপ্তি-সমাগম সম্ভব নহে। পরে রাত্রি-শেষে কিঞ্চিৎ নিদ্রাকৰ্ষণ হইতেই আমি কি অপূৰ্ণ ব্যাপার সকলই দর্শন করিলাম! সে সমুদায় আমার এরূপ হৃদয়ঙ্গম হইয়া রহিয়াছে যে, স্বপ্ন কি বাস্তবিক, সহসা অনুভব করা যায় না। আমি জন-সমাজের যে প্রকার বিপর্যয় দেখিয়াছি, তাহা সবিশেষ বর্ণনা করা দুঃসাধ্য।

3. Give the meanings and etymology of the words শোচনীয়, সাংসারিক, হৃদয়ঙ্গম, and দুঃসাধ্য.

4. What gave rise to the *alternate* emotions of দয়া, ক্রোধ, and ক্রোধ in the mind of the speaker?

5. Is there any difference in meaning between the words ব্যাকুল and ব্যাকুলিত? If so, explain.

6. Explain—

(a) চিন্তাকুল চিত্তে সুচারু সুষুপ্তি-সমাগম সম্ভব নহে।

(b) স্বপ্ন কি বাস্তবিক।

(c) জন-সমাজের যে প্রকার বিপর্যয় দেখিয়াছি।

7. Give the etymology of words সুষুপ্তি, স্বপ্ন, বাস্তবিক, and বিপর্যয়.

8. Give the feminine forms of the words শোচনীয়, সাংসারিক, হৃদয়ঙ্গম, and বাস্তবিক.

9. Write the substance of the following passage in your own language, using as few words of the text as possible :—

যখন এক প্রকার জীবের একরূপ মনোবৃত্তির কিঞ্চিৎ ন্যূনাধিক্য সঙ্ঘটন-দ্বারা বোধ-শক্তির এতাদৃশ ইतरবিশেষ হয়, তখন যে অচিন্তনীয় পুরুষের অচিন্ত্য জ্ঞান ও অনির্বাচনীয় শক্তি কোন বিষয়েই আমাদের শারীরিক ও মানসিক বৃত্তির স্বভাবাক্রান্ত নহে, প্রত্যুত তদপেক্ষা অনন্তগুণ উৎকৃষ্ট ও অশেষ বিষয়ে ভিন্ন-ভাবাক্রান্ত, তাঁহার কার্য যে আমাদের বোধাত্মিক ও বিস্ময়জনক বলিয়া প্রত্যয় জন্মিবে ইহাতে আশ্চর্য্য কি?

10. Turn the following nouns into adjectives :—

স্বপ্ন, লয়, যাত্রা, বিনয়, বিরাম, বিধান, আহরণ, নিয়ম.

11. Mention the *samāsas* (সমাস) in the following words :—

শোকানল, ভোজনবিশিষ্ট, অজাতকুলশীল, পরলোকযাত্রা, যশোভাজন, জনশূন্য, তদগতচিত্ত, জ্ঞানাপন্ন, ধীশক্তিসম্পন্ন, and ত্রিভুবন.

6. Translate the following passage into Sanscrit.

It is only in the ninth and tenth books of the Rig Veda that there is any very distinct and prominent reference made to a future life. It is true that the Ribhus, on account of their artistic skill, are said to have been promised, and to have attained immortality and divine honours; but this is a special case of deification, and does not prove that ordinary mortals were considered to survive after the termination of their earthly existence. There are, however, a few other passages which may be understood as intimating a belief in a future state of blessedness.

(3) Translate the following passage into Urdu Prose.

But illiberality is incurable ; for old age and imbecility of every kind seems to make men illiberal, and it is more congenial to human nature than prodigality ; for the generality

of mankind are fond of money, rather than of giving, and it extends very widely, and has many forms, since there appear to be many modes of illiberality, and as it consists in two things, the defect of giving, and the excess of receiving, it does not exist in all persons entire ; but is sometimes divided ; and some exceed in receiving, and others fall short in giving.

HISTORY.

Examiner.—MR. S. LOBB, M. A.

(Dates should in all cases be given).

1. State the principal tyrannies established in Greece about the time of Solon :—What character did the Greeks attach to the word *tyrant* ?

2. Mention the changes introduced into the constitution of Athens by Cleisthenes and Pericles.

3. State the principal events which took place between the Persian and Peloponnesian wars, and account for the rise of the Athenian supremacy.

4. What motives influenced the Athenians and Lacedæmonians respectively, in accepting the peace of Nicias, and what were its principal conditions ? How far was the pacification a general one ?

5. Trace the growth of the Theban supremacy under Epaminondas.

6. Give some account of the chief measures proposed or passed at Rome under the Republic for dealing with the state lands.

7. What was the origin of the Gens Claudia ?

Illustrate the hereditary character ascribed to it, by brief sketches of its principal members down to the time of Cicero.

8. If Alexander the Great had invaded Italy, what generals could the Romans have depended on to meet him in the field?

9. Give a short account of the revolt of Spartacus and his fate.

10. Mention the names of the persons distinguished by the following agnomina: Africanus, Asiaticus, Macedonicus, Numidicus, Creticus; and the events which gave occasion to them.

HISTORY.

Examiner.—MR. J. W. McCrindle, M. A.

1. Describe an Indian Township. What are its privileges, and how is it governed?

2. What are the characteristics of the Jains, as compared with the Buddhists and Brahmanists?

3. Who was Chandragupta? What is his date, and how has it been determined?

4. The Arabs made a rapid conquest of Persia, and but a slow conquest of India. How is this fact to be accounted for?

5. Give an account of the reign of Mahommed Toghlaq, and a brief outline of the history of his dynasty. How and when did it terminate?

6. Give an account of the rise, progress, and overthrow of the Mahratta Power.

7. Sketch the Indian career of Count Lally and of Sir Philip Francis.

8. Give an account of Pitt's Indian Bill passed in 1784.

9. Give a narrative of Jewish affairs, from the death of Herod Agrippa to the destruction of Jerusalem by Titus.

HYDROSTATICS, HYDRAULICS AND PNEUMATICS.

Examiner.—MR. R. THWAYTES, B. A.

1. Prove that difference of the pressures at any two points within a homogeneous fluid varies as the difference of the depths of the points below the surface.

2. Investigate the conditions of equilibrium of a floating body. A uniform body floats freely in a fluid whose density is twice as great as its own; prove also that it will float in equilibrium, if its position be inverted.

3. Explain how the specific gravity of two fluids can be compared by means of Nicholson's Hydrometer.

4. Explain the experiment by which it is ascertained that the density of the air is proportional to the force which compresses it.

5. Describe the construction and working of Smeaton's Air Pump.

6. In Smeaton's Air Pump find the position of the piston at that moment of the n^{th} stroke when the upper valve begins to open.

7. State the general principle of the Barometer; and explain why a storm is often preceded by a rapid fall of the Barometer.

8. A weight suspended by a string from a fixed point is partially immersed in water; will the tension of the string be increased or diminished as the Barometer rises? State your reasons.

9. Describe the construction and action of the Common Suction Pump; and find the height through which the water ascends at any stroke.

10. What is meant by the sensibility of the Thermometer? What degree of Fahrenheit corresponds to 60° of a Centigrade?

and what degree of a Centigrade corresponds to 60° of Fahrenheit?

DYNAMICS AND ASTRONOMY.

Examiner.—MR. C. W. HATTEN, B. A.

1. How are the units of velocity and acceleration usually chosen? If 100 yards per minute be the unit of velocity, and 5 yards the unit of space; determine the unit of time, and the measure of an acceleration of 10 feet per second.

2. If the point A, one of the angular points of a regular hexagon ABCDEF, have five uniform accelerations, represented in direction and magnitude by the lines AB, AC, AD, AE, AF, the resultant acceleration will be represented in direction by the line AD, and in magnitude by the perimeter of the hexagon.

3. If a point originally at rest have during the time t a constant acceleration f , and during the same time move over the space s , show that

$$s = \frac{1}{2}ft^2.$$

4. Write down the Three Laws of Motion. State the principal results of experiment determined by means of Atwood's Machine.

5. Two balls are simultaneously thrown vertically upwards, one from a position $4g$ feet from the ground with a velocity of g feet per second; with what velocity must the other ball be thrown from the ground, in order that the two balls may strike the ground at the same time?

6. A particle is projected down an inclined plane, the cosine of whose inclination to the horizon is $\frac{2}{5}$, with a velocity of 20 feet per second; the acceleration due to gravity being 32.2 feet per second, find the velocity of the particle at

the end of 5 seconds, and prove that it will then be at a distance of 212·7 feet from the point of projection.

7. What are the two principal motions of the earth? Why is there a difference between the length of a solar and of a sidereal day? Is either of these days of uniform duration?

8. Define the astronomical terms : Zenith, Equator, Ecliptic, North Pole, Sensible Horizon, Rational Horizon.

9. Show that the phenomenon of the Trade Winds is the result of the rotation of the earth upon its axis.

10. Describe the phenomenon of a Solar Eclipse. Why is not an Eclipse of the Sun necessarily visible at all places on that part of the Earth which is turned towards the Sun? Is an Eclipse of the Moon visible at all places on that part of the Earth which is turned towards the Moon?

MENTAL PHILOSOPHY AND LOGIC.

Examiner.—REV. J. D. DON.

1. What is Reid's view of Consciousness? What is Brown's? Show that the difference between them is not one of mere words.

2. Is Payne's doctrine of Perception a mediate, or immediate theory of knowledge? Give reasons for your answer.

3. What opinion was held, prior to Berkeley, regarding our knowledge of visual distance? On what grounds did he reject that opinion? Indicate in general how we may be supposed to acquire this knowledge.

4. What is the source of our acquaintance with relations? Give reasons for holding that Perception is incompetent to furnish this knowledge.

5. What theory of the Beautiful is connected with the names of Alison and Jeffrey? State generally what they

agree in holding, and distinguish their view from that of Dr. Brown.

6. Define Quantity, Quality, Categorematic and Syncategorematic Words, Categorical and Hypothetical Propositions. State the Predicables, and explain the distinction between them.

7. State, and explain, the different modes under which illation or inference by conversion is possible.

8. In the following combinations separate the legitimate from the merely possible moods ; and state regarding each of the latter why it is excluded :—AAI, IAI, AEA, AIE, EAO, IOO, AEO, IEO, EAE, AAA, OEO, OAO, EIO, AOO, AEI, AEE, AII.

9. What is meant by figure ? To which do the following Syllogisms belong :—

(a) All vicious men are inwardly enslaved ;

Some who are politically free are vicious ;

∴ Some politically free are inwardly enslaved :

(b) All true penitents will find mercy ;

Some true penitents have been great sinners ;

∴ Some great sinners will find mercy.

Give the mnemonic words for the above ; and show the use of the mnemonic lines, by making any alterations on the Second Syllogism that are possible.

10. What is Logical Division ? Contrast it with Generalization. Give the ordinary rules for division, with examples of conformity to these rules, and of transgression.

MORAL PHILOSOPHY AND LOGIC.

Examiner.—REV. J. TRAFFORD, M. A.

1. Moral Philosophy assumes that there is a moral quality in actions. Show that this quality in an action is perfectly

distinct from the tendency of the action to produce "the greatest amount of happiness."

2. The moral quality of actions is discerned by Conscience.

(a) Is this to be regarded as a distinct faculty of the mind, or as a modification of some other faculty? (b) Establish its authority as an impulsive power; and (c) Show how its defects as a discriminating one are to be corrected.

3. (a) Distinguish between "right and wrong" and "innocence and guilt." (b) What important principles are deduced by Wayland from this distinction? (c) Show that the extent of our obligation is not to be measured by our present capacity for virtue, but by what would have been our capacity for it, had we made the progressive improvement possible to us.

4. We find *pain* connected with wrong-doing. Show that, while many pains may be regarded as *monitory*, many others are *punitive* or *prohibitory*, and that by them we may arrive at laws forming a system of natural religion.

5. (a) Give Wayland's classification of the violations of the rights of property. (b) On what principles should the "*rate of interest*" for capital be fixed, and by whom?

6. (a) What principles should regulate our benevolence towards those who physically suffer? and (b) How do those principles bear on such ordinary forms of benevolence as *public provision for the poor by public taxation*, and *voluntary associations for purposes of charity*?

7. Inductive reasoning is often spoken of as opposed to deductive or syllogistic: Why does Whately condemn the practice? and how does he consider the former related to the latter?

8. Discoveries of truth are of two very different kinds; what are they, and with which of them has Logic to do?

9. What is a *logical* as distinct from a *material* fallacy?

and what different fallacies does Whately notice under the general class, "Fallacies of an irrelevant conclusion?"

10. Put the following arguments in a syllogistic form, stating their moods, figures, and (if there are any) fallacies:—

(a) Testimony is a kind of evidence very likely to be false: therefore, the evidence on which most men believe there are volcanoes is likely to be false, as they have simply the testimony of others for their belief.

(b) All that glitters is not gold: tinsel glitters; therefore it is not gold.

(c) The testimony extorted from a reluctant witness is likely to be true; the testimony of an enemy is thus extorted, and is consequently likely to be true.

(d) Protection from punishment is plainly due to the innocent; therefore, as you maintain that this person ought not to be punished, it appears that you are convinced of his innocence.

(e) Warm countries alone produce wine; Spain is a warm country; therefore it produces wine.

GENERAL PHYSIOLOGY.

Examiner.—DR. ROBSON.

1. Prove that the blood circulates.
2. What is the composition of the blood? How does it differ in different animals? What changes does it undergo in circulating?
3. Describe the Respiratory Apparatus in birds, fishes, reptiles, and spiders.
4. Describe the mechanism of hearing in man. What modifications of it occur in birds, fishes, and reptiles?

5. Describe, generally, the structure, arrangement, and functions of the ganglionic system of nerves.
 6. What are the functions of the *Cerebrum* and *Cerebellum* respectively?
-

CHEMISTRY.

Examiner.—DR. ROBSON.

1. What is the composition of the Atmosphere? What purposes in the economy of Nature are served by each of its ingredients?
 2. Express in symbols the changes which take place in the preparation of NITROUS OXIDE, NITRIC ACID, SULPHUROUS ACID, SULPHURETTED HYDROGEN, and AMMONIA.
 3. Describe the process for preparing Iodine, and mention its properties.
 4. Describe the process for preparing Phosphorus, and mention its properties.
 5. How do CAST IRON, WROUGHT IRON, and STEEL differ in composition? How are the two last prepared from the first?
 6. By what tests may Copper be detected in a solution of one of its salts?
 7. What are the tests for Zinc?
-

ZOOLOGY.

Examiner.—MR. H. F. BLANFORD.

1. Give Linnæus's and Cuvier's classification of animals, enumerating their *primary divisions*, and point out the general features in which the latter was an advance on the former.

2. What are a *type* and an *archetype* (or ideal type) in classification? and give instances. What are a *species* and a *genus*?

3. Show the importance of embryology in classification, and give some one instance of an aberrant Order or Sub-order, the true relations of which have been determined by a study of its embryonic forms.

4. Refer the following animals to their proper Class and Order in Cuvier's or any more modern system:—

The *Manatee*.

The *Madrepore*.

„ *Pangolin*, or *Manis*.

„ *Prawn*.

„ *Scorpion*.

„ *Snail*.

„ *Centipede* (*Scolopendra*).

„ *Elephant*.

„ *Gharial*.

„ *Tortoise*.

„ *Frog*.

„ *Porpoise*.

5. Give the distinctive characters of the *Orders* and *Sub-orders* of one only of the following classes, excluding extinct forms:—

Mammalia.

Crustacea.

Reptilia.

Insecta.

Cephalopoda.

Echinodermata.

6. Define the geographical range of the known genera of the *anthropoid apes*.

7. Describe the chief modifications of the nervous system in the three sub-kingdoms, *Vertebrata*, *Mollusca*, and *Annulosa*.

PHYSICS.

Examiner.—MR. H. F. BLANFORD.

1. Matter is usually described as impenetrable and porous. Define these attributes, and show that they are incompatible with the axiom that “matter cannot act where it is not.”

2. To what class of attractions are the phenomena of *diffu-*

sion referred ? If Hydrogen and Atmospheric Air are separated by a porous diaphragm, through which the air passes at the rate of one cubic inch per minute, how much Hydrogen will pass the diaphragm in the same time ? The specific gravity of Hydrogen is 0.0692.

3. What are *Semihedral* and *Solohedral* forms in crystals ? What is the law of Symmetry in each case ? What are the chief *Semihedral* forms of the *monometric* (or *cubical* or *regular*) and *Hexagonal* systems.

4. What are the *trade winds*, and how are they produced ? What is the direction of the *lower* and *upper trades* in both hemispheres, and to what are these directions due ? Mention some observed case in which ocular demonstration has been afforded of the existence of an *upper trade*.

5. What conjunction of internal and external circumstances determines the boiling point of fluids ? On what principle is the elevation of a mountain ascertained by observing the boiling point of water on its summit ?

6. Describe the essential construction of Wheatstone's and Morse's telegraph instruments, and the modes of recording signals in each case. What are the parts and arrangement of a submarine telegraph cable ? and what is the purpose of each part ?

7. Give instances (one in each case) of the conversion of
- Heat into electricity ;
 - Electricity into heat ;
 - Heat into mechanical force ;
 - Mechanical force into heat ;
 - Mechanical force into electricity ;
 - Electricity into mechanical force ;

And give the mechanical equivalent of heat, as determined by Joule.

CONIC SECTIONS.

Examiner.—MR. R. THWAYTES, B. A.

1. The tangents at the extremities of any focal chord of a parabola intersect at right angles in the directrix.

2. A parabola, whose focus is given, touches two straight lines at right angles to one another; give a geometrical construction for the axis and vertex.

3. The feet of the perpendiculars from the foci of an ellipse on any tangent, lie in the circumference of a circle of which the diameter is the major axis of the ellipse.

4. If CPN and CDN be right angled triangles formed by semi-conjugate diameters, and the co-ordinates to P and D; prove that $PN : CM = DM : CN$.

5. The ordinates at the extremities P and D of conjugate diameters are produced to meet the auxiliary circle in K and L. Shew that the perpendiculars dropped from P and D on CK and CL respectively, are equal.

6. If any tangent TP of an ellipse cut any diameter RR' produced in T, and if PN be an ordinate to that diameter, and C the centre; prove that

$$CN : CR = CR : CT.$$

7. If a point move in such a manner that the difference of its distances from two fixed points is constant, prove that its distance from either of these fixed points will bear a constant ratio to its distance from one of two fixed straight lines perpendicular to the line passing through the fixed points.

8. The perpendiculars drawn from the intersections of two tangents to an hyperbola upon the focal distances, produced if necessary, are equal to one another.

9. If V be any point in any diameter RR', produced if necessary, of an hyperbola, and RV be an ordinate to that

diameter; prove that $QV^2 : RV.R'V$, as the squares of the semi-diameters respectively parallel to these lines.

10. Define a cone, and shew that if a cone be cut by a plane parallel to the generating line, the section will be a parabola.

OPTICS.

Examiner.—MR. C. W. HATTEN, B. A.

1. State the laws of reflexion.

A conical pencil of rays is incident upon a plane reflecting mirror; determine the form of the reflected pencil.

2. State the laws of refraction.

A rectangular pond is 4 feet deep and full of water; at the bottom of the pond is a bright spot, 3 feet from the side; prove that a person standing in a vertical plane through the spot perpendicular to the side of the pond, and 7 feet 4 inches from its edge, will just see the bright spot, if his eye be 5 feet 6 inches from the ground, and the refractive index from air into water be $\frac{4}{3}$.

3. A luminous point is placed between two parallel plane mirrors A and B, at a distance a from A, and b from B; find the positions of the 1st, 2nd and 3rd images which will be formed by the successive reflexions of the rays at the surfaces of the two mirrors, the first reflexion being made at A.

4. Diverging rays are incident directly on a concave spherical reflector; find the geometrical focus.

5. Find the geometrical focus, when rays, incident directly on a concave spherical reflector of 6 feet radius, converge to a point 12 feet behind the reflector. Also find the geometrical focus, when rays diverge from a point 12 feet from a convex spherical reflector of 6 feet radius.

6. What is a *convex* lens?

Trace the changes in the corresponding positions of the conjugate foci for a convex lens.

7. Describe the simplest method of separating Solar light into rays of different colours.

8. Describe the human eye regarded as an optical instrument.

6. Describe the astronomical telescope, and find its magnifying power. What is the *field of view*?

Honor Examination, 1866.

ENGLISH.

Examiner.—MR. K. DEIGHTON. B. A.

Chaucer, Spenser, Southey and Campbell.

1. In what way did Chaucer's poetry tend to improve, (1) the English language, (2) its versification? How far was his influence in the former direction strengthened by the political disposition of the times in which he lived?

What constitutes the principal excellence of his poetry? Mention the chief of his literary contemporaries.

From what quarter did he derive the plan of the *Canterbury Tales*? Give a list of his other writings.

2. In Chaucer's age, what difference was there between the singular and plural of the preterite of the (so-called) strong verbs? What prosodical rule, regarding the final.—*e* before word beginning with a vowel, governs the scansion of poetry of his time? What was the older termination of the infinitive verb?

Through what changes did the language spoken in England pass during the twelfth, thirteenth, and fourteenth centuries?

3. Notice the Italicized words and phrases in the subjoined passages :—

- (a) "His table dormant in his halle alway
Stood redy."
- (b) "Housbondes *atte churche dore* hadde sche fyfe."
- (c) "And yet he hadde *a thombe of gold pardé*."
- (d) "In daunger he had at his owne assise
The yonge gurlles of the diocise."

How does Shakespeare use the phrase, 'In his danger'?

- (e) "And he had ben sometime *in chivachie*
In Flaundres, in Artoys, and in Picardie.
- (f) "A Sargeante of Lawe war and wys
That often hadde ben *atte parvys*."

4. Put into modern prose the following extracts :—

- (a) "And sikurly sche was of gret disport
And ful plesant, and amyable of port,
And peyned have to counterfete cheere
Of Court, and ben establich manere,
And to ben holden digne of reverence."
- (b) "What schulde he studie, and make him selven wood,
Uppon a book in cloystre alway to powre,
Or swynke with his handes, and laboure,
As Austyn byt? How schal the world be served?
Lat Austyn have his swynk to him reserved.
Therefore he was a pricasour aright."
- (c) "And able for to helpen al a schire
In many caas that might falle or happe
And yet this maunciple sette here aller cappe."
- (d) "And this figure be addid yet thereto,
That if gold ruste, what schulde yren doo?
For if a prest be foul, on whom we truste,
No wonder is a lewid man to ruste;
And schame it is, if that a prest take kepe
As chiten shepperd and a clene schepe."

- (e) "Now have I told you shortly in a clause
The stat, tharray, the nombre, and eek the cause."
- (f) "This sompnour bar to him a stiff burdoun
Was nevere trompe of halfe so gret a soun.
This pardoner hadde heer as yelwe as wex,
But smothe it heng, as doth a strike of flex;
By unces hynges his lokkes that he hadde
And therewith he his schuldres overspradde.
Ful thenne it lay, by culpons on and oon,
But hood, for jolitee, ne wered he noon,
For it was trussud up in his walet."

5. Give a brief outline of the *Faerie Queene*, shewing the meaning which underlies the allegory. What do you understand by allegory? How is the unity of design marred in the construction of the poem? In what does the obsolescence of Spenser's language chiefly consist? What is the measure of the Spenserian stanza? Spenser is generally compared with Ariosto. Wherein does the resemblance lie?

Una—Duessa—Gloriana—what is the meaning of these words, and of what are they personifications?

6. (a) "Which when the valiant Elfe perceived, he left
As lyon fierce upon the flying pray,
And with his trenchand blade her boldly kept
From turning back, and forced her to stay:
Therewith enraged she loudly gan to bray,
And turning fierce her speckled taile advaunst."

Line 1.—*Which*: Mention the different root letters of interrogatives and relatives in Aryan languages. For *wh*—in *who*, *which*, &c., what was the substitute in Anglo-Saxon? For what is the *h* in Teutonic languages changed in other branches of the Aryan stock? Give the etymology of *which*.

ib. What is the meaning of *Elfe*?

3. *Trenchand* : Remark upon the termination—*and*.

5. *Gan* : Should this be written *'gan* ? What is generally the force of *be*—as an inseparable adverb before verbs ?

6. *Advaunst* : What is the termination—*st* in this and words of similar form ?

(b) “Therefore with me you may take up your *In*.”

What sense did the word *Inn* bear in earlier times ?

(c) “Wringing her hands in wemen’s pitteous wise,
Tho can she weepe.”

Now-a-days we write *women*, and pronounce *wimmen* : is there any reason for our pronunciation ? Derive the word *wise*.

Tho : Whence is this word, and what is its meaning ?

(d) “Lo! I, the man whose Muse whylome did maske &c.”

Whylome : Investigate this word.

(e) “Me, ah too meane, the sacred Muse areeds.”

Areed : *Rede* : *read* : *ready* : trace the connection of these words.

What is the *y*—in words like *ycladd*, *ydrad*, &c. ?

(f) “Till that infernal Feend &c.”

Feend : What part of speech in this word properly speaking ?

(g) “Forwasted all their land.”

Has the prefix *for*—in *forwasted* any meaning ?

(h) “Eitsoones dismounted.”

Eftsoones : What is this word by origin ?

(i) “Strangle her, els she sure will strangle thee.”

Els : derivation ?

(j) “But when his later ebb gins to avale &c.”

Avale : What word of the same root have we now in use ?

7. Give the meaning of the following words :—*Scryne* : *heben* : *still* : *boughtes* : *welke* : *lin* : *parbreake* : *fray* : *amate*.

8. On what historical facts is “*Madoc*” based ? Give your opinion of the merits and demerits of the poem. Does

the author seem to you to have violated probability in any of its parts?

9. Explain allusions in the following passages :—

(a) *Death the enlarger.*"

(b) " *Gwenhidwy warned us*
When we had no retreat."

(c) " Will ye believe
The wonders of the ocean, *how its shoals*
Sprung from the wave ?"

(d) " Their chosen archer loosed
The Arrow of the omen."

(e) " *Pabas*, and Chiefs."

(f) *The cycle of the years* is full.

(g) " Whither sailed Merlin with his band of bards,
Old Merlin, master of the mystic lore."

(h) " Plucking the thin grey hairs, he dealt them round."

10. Notice the Italicized words and expressions in the following lines :—

(a) " The *mantling* mead went round."

(b) " *Assoil'd* of sin."

(c) " And might from many an archer, and near,
Have borne away the bell."

(d) " Crush'd and *scotch'd*
In every ring."

(e) " His *hyacinthine* locks."

(g) " The eagle built her *eyrie.*" Derive the word.

(h) " The dwellings of the *Cymry.*"

(i) " A *gipion* quilted close of *gossampine.*"

How does Chaucer spell *gipion*?

(j) " Along the *Marches*, or where *holy* Dee
Through *Cestrian* pastures rolls his *tamer* stream."

(k) " Ye *blow the fall* too soon."

(l) " Between the mountains, which in endless war

Hurtle with horrible uproar, and *frush*
Of rocks that meet in battle."

11. Campbell does not rank among the great poets of England, but his writings have many of the elements of true poetry. Point them out, illustrating your remarks by quotations from *Gertrude of Wyoming*.

12. Annotate the following passages, explaining all allusions, and expanding the sense where necessary:—

- (a) "And aye those sunny mountains halfway down
Would echo flagelet from some romantic town."
- (b) "And plied the beverage from his own fair sheaf
That fired his Highland blood with mickle glee."
- (c) "Peace be to thee! my words this belt approve."
- (d) "Our wampum league thy brethren did embrace."
- (e) "His calumet of peace."
- (f) "He was, to weet, for eastern mountains bound."
- (g) "Gay lilled fields of France,—or, more refined
The soft Ausonia's monumental reign,
Nor less each rural image he designed,
Than all the city's pomp and home of human kind."
- (h) "Where, resting by some tomb of old Cacique,
The lama-driver on Peruvia's peak
Nor living voice nor motion marks around."
- (i) "Of striped and starred banners."

Macbeth and Henry Fourth.—Part I.

1. Why was the agency of the Witches in *Macbeth* necessary to the plan of the play? On what grounds has the propriety of such agency been called in question? Are those grounds in your opinion satisfactory?

2. Does Shakespeare in his portraiture of Lady Macbeth give countenance to the idea that men and women are governed by some one passion, which, when known, gives a clue to all the mysteries of their conduct?

Macbeth is emphatically spoken of as a brave and valiant man. Does his conduct, after the idea of the murder has become fixed in his mind, controvert this assertion?

How does Shakespeare in Macbeth contrive to administer some delicate flattery to James the First?

3. English Blank Verse consists normally in a succession of five feet of two syllables each, with the accent upon the latter of the two; one, or even two, unaccented syllables after the tenth having no prosodical effect. Mention certain important modifications of this statement, *and exemplify them from the extracts in this paper.*

What are the chief objections to the use of classic nomenclature in English prosody?

4. Explain the following passages, noticing more particularly the Italicized words:—

- (a) “As whence the sun ’gins his reflexion,
Ship-wracking storms, and direful thunders break.”

Ship-wracking: Mention other spellings of the latter part of this word.

- (b) “*Aroint* thee, witch, the *rumpfed* ronyon cries.”

- (c) “My thought, whose murder yet is but *fantastical*,
Shakes so my single state of man, that *function*
Is smother’d in surmise.”

- (d) “Time and the hour runs through the roughest day.”
What exception has been taken to this line?

- (e) “And, at more time,
The interim having weigh’d it, &c.”

Parse the words “the interim.”

- (f) “The love that follows us, sometime is our trouble,

Which still we thank as love. Herein I teach you,
How you shall *bid God yield us* for our pains,
And thank us for your trouble."

Our trouble ; our pains ; your trouble. What is the construction of the pronouns in each of these cases ?

- (g) " If it were done, when 'tis done, then 'twere well
It were done quickly. If the assassination
Could trammel up the consequence, and catch
With *his* surcease, success ; that but this blow
Might be the be-all, and the end-all here ;
But here upon this bank and shoal of time
We'd jump the world to come."

Derive *assassination* : In what different senses does Shakespeare use the word *success* ? Parse *to come*.

- (h) " I have no spur
To prick the sides of my intent, but only
Vaulting ambition, which o'erleaps itself,
And falls on the other."

In this passage there is a confusion of metaphors : Unravel it. How has *ambition* come to have its present meaning ?

- (i) " Their daggers,
Unmannerly *breeched* with gore."
5. LADY MACBETH. " What beast was't then
That made you break this enterprise to me ?
When you durst do it, then you were a man,
And to be more than what you were, you would
5. Be so much more the man. Nor time, nor place
Did then adhere, and yet you would make both :
They have made themselves, and that their fitness now
Does unmake you. I have given suck ; and know
How tender 'tis to love the babe that milks me :
10. I would, while it was smiling in my face,
Have pluck'd my nipple from his boneless gums,

And dash'd the brains out, had I so sworn, as you
Have done to this.

MACBETH.

If we should iail ?

LADY MACBETH.

We fail !

- But screw your courage to the sticking-place,
15. And we'll not fail. When Duncan is asleep
(Whereto the rather shall his hard day's journey
Soundly invite him), his two chamberlains
Will I with wine and wassel so convince,
That memory, the warder of the brain,
20. Shall be a fume, and the receipt of reason
A limbeck only : when in swinish sleep
Their drenched natures lie, as in a death,
What cannot you and I perform upon
The unguarded Duncan ? What not put upon
25. His spongy officers ; who shall bear the guilt
Of our great quell ?

[MACBETH.

Bring forth men children only !

For they undaunted mettle should compose
Nothing but males."

Line 1. What reading has been suggested for *beast* ? Do
you consider it an emendation ?

3. *Durst* : What is the termination—*st* in this word ?
Dare is both transitive and intransitive : Is *durst* so too ? In
what tenses and for what persons is it used ?

4, 5. Explain these lines.

6. *Adhere* : Sense ?

7. *That* : is sometimes called an article, sometimes a pro-
noun, sometimes a conjunction : State Horne Tooke's views
upon the question.

11. *Boneless* : What is the suffix—*less* in words of this
kind ?

Various conjectures have been made in order to the getting rid of the difficulties in these lines. The Dering MS. gives a materially different text : Discuss the question, mentioning the proposed corrections, the objections to them, and to the received text.

(b)

“ All furnish’d, all in arms ;

All plum’d like estridges that wing the wind,

Bated like eagles having lately bath’d :”

“ All furnish’d, all in arms ;

All plum’d like estridges that with the wind

Bated like eagles having lately bath’d :”

“ All furnish’d, all in arms ;

All plum’d like estridges that with the wind

Baited like eagles having lately bath’d :”

The last of these three readings is according to the text of the best copies ; the other two contain conjectural emendations, and against both there are certain objections. State what those objections are ; which reading you prefer ; and why ?

9. (a)—“ Balk’d in their own blood.”

Explain this.

(b)—“ His brother-in-law, the foolish Mortimer.”

In the third act Lady Percy is called Mortimer’s aunt. Account for the discrepancy.

(c)—“ Shall we buy treason and indent with fears.”

Discuss the reading *fears*.

(d)—“ Opinion, that did help me to the crown

Had still kept loyal to possession.”

Explain this : in what sense is *opinion* used in a subsequent passage ?

(e)—“ Methinks my moiety from Burton here

In quantity equals not one of yours.”

Notice anything unusual in these lines, and state whether it is also incorrect.

(f)—“ Which art my nearest and dearest enemy.”

Discuss *dearest*.

(g)—“ And that same sword and buckler Prince of Wales.”

Explain this.

(h)—“ Bought me lights as *good cheap*.”

Notice the Italicized words.

(i)—“ The quality and *hair* of our attempt.”

Two interpretations have been given of the word *hair* : which is the right one? Quote other instances of the word being used in the same sense.

(j)—“ The skipping King he ambled up and down

With shallow jesters and rich *bavin* wits,

Soon kindled and soon burnt : *carded* his state,

Mingled his royalty with *carping* fools,

5. Had his great name profaned with their scorns,

And gave his countenance against his name

To laugh at gibing boys, and stand the push

Of every beardless vain *comparative* ;

Grew a companion to the common streets,

10. *Enfeoff'd* himself to popularity.

Explain the Italicized words. Give the different uses of (1) wit, (2) wits, and state whether Shakespeare employs the former in the more common sense which it bears now-a-days. Scan line 10.

10. Give examples from Shakespeare of words which were at his time used in a good sense, but which at present are never employed but with the idea of disgrace, contempt, &c.

11. Give the meaning of the following words as used in Macbeth and Henry Fourth :—

Composition : addition : suggestion : metaphysical : favour : favours : remorse : pretence : figures : expedience : limits : estimation : capitulate.

Raleigh,—Bacon,—Browne,—Locke.

1. Give some account of the historical literature of England during the seventeenth century.

2. Reproduce, as nearly as you can in the style of Raleigh, the history of the plantation of the Greeks in Sicily, or of the rebellion of the Cisalpine Gauls against the Romans.

3. Give a sketch of Bacon's Treatise on the Advancement of Learning; and describe briefly the influence of his philosophical writings, (a.) On Physics, (b.) On mental science; (c.) On ethics.

4. Characterize the style of Sir Thomas Browne; and give an analysis of his remarks on one of the following vulgar errors;—(a.) "That there was no rainbow before the flood;" (b.) "That the tower of Babel was erected against a second deluge."

5. Give, from Browne, examples of words of classic origin which he introduced, but which have never gained a permanent place in the English language. Give also the words that are now used to express their meaning.

6. Explain the following passages in Bacon's Advancement of Learning:—

(a) "These times are the ancient times, when the world is ancient, and not those, which we account ancient 'ordine retrogrado,' by a computation backward from ourselves."

(b) "The use of human reason in religion is of two sorts."

(c) "The interpretations of the Scriptures are of two sorts; methodical, and solute or at large."

(d) "For in anything which is well set down, I am in good hope that, if the first reading move an objection, the second reading will make an answer."

7. Give an account of the life and writings of John Locke; and indicate the relation in which the treatise on the "Conduct of the Understanding" stands to the "Essay on the Human Understanding."

8. Explain the following passages in Locke's *Conduct of the Understanding* :—

(a) "Every man carries about him a touchstone, if he will make use of it, to distinguish substantial gold from superficial glittering—truth from appearances."

(b) "Reading furnishes the mind only with materials of knowledge; it is thinking makes what we read ours."

(c) "I have said above that we should keep a perfect indifferency for all opinions, not wish any of them true, or try to make them appear so;" &c. &c. Complete and explain Locke's meaning. What impossible hypothesis does the "indifferency" which he recommends, seem to involve?

9. Discuss *fully* and compare the style of Bacon, Browne and Locke respectively. Point out the criteria by which you would determine to which of the three any particular passage should be attributed.

10. Give a short historical sketch of the English Alphabet. Can you account on any principle for the order of the letters of the English Alphabet? Write down a series of rules for syllabification. Apply these rules to the following words; and give in each case their etymology:—*Laity*; *Outrage*; *Orthography*; *Diminutive*; *Colonel*; *Folio*; *Massy*.

11. Trace the origin and explain the use of the termination *ing* in the English language. What older forms did it supplant? How are infinitives in *ing* distinguished from participles? What is the most accurate name of participles in *ing* and in *ed*, *en*, or *t*?

12. What account do you give of the *for* in *forbid*? How do you account for the *l* in the words “could” and “walnut?” and for the *g* and the *t* in the word “hight?” What is the probable origin of the *d* in such preterites as *call-ed*?

13. Criticise the structure of the following sentences; and give the reason for any correction which you think it necessary to make:—

“He is such a great man, there is no speaking to him.”

“I make no doubt but you can help him.”

“He was angry at me quitting the house.”

“I can never think so very mean of him.”

14. How are suppositions respecting the future expressed in English?

15. Give a critical notice of *shall* and *will*.

Burke,—Scott,—Brougham,—Carlyle.

1. Give, as nearly as you can in Burke’s own words, his eulogium on the Queen of France; and criticise the expression in the closing sentence that “vice itself lost half its evil, by losing all its grossness.”

2. Sketch the plot and story of Sir Walter Scott’s “*Ivanhoe*.” On what does the interest of “*Ivanhoe*” chiefly depend?

3. (a) “Slavery and a constant traffic in slaves polluted the most refined states of antiquity.”

(b) “The feudal times in the western world were familiar with slavery and slave dealing in all its forms.”

Illustrate these statements as fully as you can; and give a short sketch of the origin and history of Negro Slavery in America.

4. Give a short outline of Lord Brougham's Speech on Education, delivered in the House of Lords, Dec. 1, 1837; and explain the following passage:—

“With regard to the kind of Education, I certainly should wish to see some improvement, so that instruction may not merely be brought home to every man's door by cheap mercantile schools, of which the poor may reap the advantage, but that schoolmasters may be prepared to perform, well and sufficiently, the important duties of their office. I think we should interfere as little as possible, beyond affording facilities; we ought not to force, but to help; not to control, but to co-operate.”

5. Give Carlyle's estimate of Burns as a man and a poet; and explain the following passages:—

(a) “He who would write heroic poems, must make his whole life a heroic poem.”

(b) “The career of literature could not, in Johnson's day, any more than now, be said to lie along the shores of a Pactolus.”

(c) “We reckon Johnson's ‘talent of silence’ to be among his great and too rare gifts.”

6. Discuss the italicized words in the following passages. Explain in each case the origin, and the meaning, both of the word itself and of its component elements.

(a) “Government is a *contrivance* of human *wisdom* to *provide* for human wants.”

(b) “But the age of *Chivalry* is gone.”

(c) “*Superstition* is the *religion* of feeble minds.”

(d) “His *enthusiasm* kindles as he advances; and when he arrives at his *peroration*, it is in a full blaze.”

7. Characterize the style of Burke. What passage in his own works did he consider his master-piece?

8. Write a short essay on "Chivalry" in the style of Scott, and draw your illustrations from "Ivanhoe."

9. Delineate the character of Sir Walter Scott as a novelist; and give a list of his principal novels chronologically arranged. "There is more real *history* in his novels on Scotland and England than in the philosophically false compilations which still possess that great name." Illustrate this statement.

10. How did the old use of the verb to *endeavour* differ from the modern?

11. In what class of words ought initial *h* to be silent; and in what ought *g* to be sounded hard before *e* and *i*? Mention any instances in which the pronunciation of English words depends on their etymology.

12. Give six examples in the English language of French words with Teutonic terminations, and of Teutonic words with French terminations respectively.

13. State fully what theories have been held respecting the meaning and origin of the apostrophe in the inflected form of the English possessive. What is your own view on the subject?

14. Give some historical account of the manner in which the Norman French has become one principal element in the English language.

15. Name the foreign writers who exercised the greatest influence on the English literature of the 18th century; and trace the effects.

2. Classify the languages of modern Europe; and state how many of them belong to the Aryan family.

3. What use has been made of comparative philology to determine the ethnology of nations, and to fix the original settlement of the ancestors of the Aryan nations?

6. State and examine the chief argument which has been urged against the common origin of language.

5. State the chief theories which have been held as to the origin of the radical elements of languages.

6. Why are the numerals of any language important helps to the study of comparative etymology?

7. Define the true genealogical relation of the Latin and Greek languages to the Sanskrit, giving some arguments in support of your statements.

8. Compare with Sanskrit the several comparative and superlative terminations in Greek and Latin.

9. What kind of words may be best selected to prove the identity or diversity of any given languages?

10. What is the termination of the dative plural in Anglo-Saxon? and in what English words does the termination survive?

11. Give examples of words substantially the same from various Aryan languages.

12. Give examples of words from various languages to illustrate the changes which letters and words undergo in passing from one language to another.

13. What is the probable origin of *am, sir, madam, father, mother, daughter, with?*

14. Explain the endings *st, th, and s* in the second and third persons singular of English verbs. How do you account for the *r* in art?

15. Compare with Sanskrit (a.) The middle voice. (b.) The weight of the personal ending. (c.) The formation of tenses in Greek verbs.

16. Classify the letters of the Sanskrit alphabet according to their powers, and compare it as to fulness, force, and utility with the Anglo-Saxon. What letters had the Anglo-Saxon language which are wanting in modern English?

Compose an Essay on the life and genius of Shakespeare, introducing, along with other suitable matter, a full consideration of the following topics:—

1. The relations of Shakespeare's works to those of preceding and of contemporary poets and dramatists in England.

2. The order of his plays as determined by Gervinus, and the characteristics of the several groups into which that critic has classified them.

3. The distinguishing features of the great schools of Dramatic Literature, and the utility and dignity of the drama in general.

4. What Shakespeare seems to have regarded as the proper aim of this kind of writing, and the general plan which he appears to have adopted for its attainment, in the structure of his plays.

5. A critical and comparative appreciation, from an artistic and from a moral point of view, of the merits of the Drama, as it is conceived by Shakespeare.

Quæ cum rejecta relatio esset, "Non placeo, inquit, concordiæ auctor: optabitis me, Deus Fidius, propediem, ut mei similes Romana plebs patronos habeat. Quod ad me attinet, neque frustrabor ultra cives meos, neque ipse frustra dictator ero. Discordiæ intestinæ bellum externum fecere, ut hoc magistratu egeret respublica. Pax foris parta est, domi impeditur: privatus potius, quam dictator, seditioni interero." Ita curia egressus, dictatura se abdicavit. Enimvero, illud se tacere, suam conscientiam non pati: quod ex ea tantum præda, quæ rerum moventium sit, decumæ designetur; urbis atque agri capti, quæ et ipsa voto contineatur, mentionem nullam fieri. Cum ea disceptatio, anceps senatui visa, delegata ad pontifices esset, adhibito Camillo, visum collegio, quod ejus ante conceptum votum Veientium fuisset, et post votum in potestatem populi Romani venisset, ejus partem decumam Apollini sacram esse. 1. Habes, ut brevissime potui, genus iudicii et causam absolutionis. Quæris deinceps, qui nunc sit status rerum et qui meus. Reipublicæ statum illum, quem tu meo consilio, go divino confirmatum putabam, qui bonorum omnium con-

junctione et auctoritate consulatus mei fixus et fundatus videbatur, nisi qui nos deus respexerit, elapsum scito esse de manibus uno hoc iudicio; si iudicium est, triginta homines populi Romani levissimos ac nequissimos, nummulis acceptis, jus ac fas omne delere, et, quod omnes non modo homines, verum etiam pecudes factum esse sciant, id Talnam et Plautum et Spongiam et ceteras hujusmodi quisquiliis statuere, numquam esse factum.

2. Atque illæ dissensiones erant hujusmodi; Quirites, quæ non ad delendam, sed ad commutandam rempublicam pertinerent. Non illi nullam esse rempublicam, sed in ea, quæ esset, se esse principes, neque hanc urbem conflagrare, sed se in hac urbe florere voluerunt. Atque illæ tamen omnes dissensiones, quarum nulla exitium reipublicæ quæsit, ejusmodi fuerunt, ut non reconciliatione concordiæ, sed interne cione civium dijudicatæ sint. In hoc autem uno post hominum memoriam maximo crudelissimoque bello, quale bellum nulla unquam barbaria cum sua gente gessit, quo in bello lex hæc fuit a Lentulo, Catilina, Cassio, Cethego constituta, ut omnes, qui salva Urbe salvi esse possent, in hostium numero ducerentur, ita me gessi, Quirites, ut omnes salvi conservaremini: et quum hostes vestri tantum civium super-futurum putassent, quantum infinitæ cædi restitisset, tantum autem urbis, quantum flamma obire non potuisset, et Urbem et cives integros incolumesque servavi.

3. Hinc ille Gyges inducitur a Platone: qui, cum terra discessisset magnis quibusdam imbribus, descendit in illum hiatus, aeneumque equum, ut ferant fabulæ, animadvertit, cujus in lateribus fores essent: quibus apertis corpus hominis mortui vidit magnitudine inusitatâ, annulumque aureum in digito: quem ut detraxit, ipse induit (erat autem regius pastor), tum in concilium se pastorum recepit. Ibi cum palam ejus annuli ad palmam converterat, a nullo videbatur, ipse

autem omnia videbet. Idem rursus videbatur, cum in locum annulum inverterat. Itaque hac opportunitate annuli usus reginæ stupram intulit, eaque adjutrice regem dominum interemit, sustulit quos obstare arbitrabatur : nec in his eum facinoribus quisquam potuit videre. Sic repente annuli beneficio rex exortus est Lydiæ. Hunc igitur ipsum annulum si habeat sapiens, nihil plus sibi licere putat peccare, quam si non haberet. Honesta enim bonis viris, non occulta quærentur. Atque hoc loco philosophi quidam, minime mali illi quidem, sed non satis acuti, fictam et commenticiam fabulam prolatam dicunt a Platone : quasi vero ille aut factum id esse aut fieri potuisse defendat. Hæc est vis hujus annuli et hujus exempli, si nemo sciturus, nemo ne suspicaturus quidem sit, cum aliquid divitiarum, potentiæ, dominationis, libidinis causa feceris, si id diis hominibusque futurum sit semper ignotum, sisne facturus. Negant id fieri posse. Quamquam potest id quidem : sed quæro, quod negant posse, id si posset, quidnam facerent ?

What are *perfecta officia*, and *media officia*? What are the Cardinal Virtues according to Cicero? What is the moral formula of the Stoics quoted in the 3rd book of the *De Officiis*?

1. Translate into Latin :—

The wisdom of Themistocles, the Athenian general, was so superior that, though he was associated with the ablest men, it is to him principally that the victory obtained over Xerxes is to be attributed. In devising his schemes he never required long deliberation ; scarcely any emergency could happen for which he was not prepared ; and such was his eloquence that he never failed in convincing others that the cause he recommended was the most eligible. It is deeply to be regretted that such an extraordinary man should have stained his reputation by abandoning the path of virtue. Not to mention other vices, it may be remarked that, when banished from his country on account of his intolerable arrogance, he went over to the Persians, whose forces he had

formerly put to flight, and promised, if they gave him money and a fleet, to make war upon Greece. He was supplied with what he asked; and there is no reason to doubt that he would have kept his promise, had it not been for Cimon, who he knew could withstand him. Despairing, therefore, of accomplishing his purpose, it is said that he made a great festival to which he purposely summoned all his friends, when, suddenly, amidst the solemnities of the sacrifice and the accustomed hospitalities to his guests, he poisoned himself by swallowing a large vessel of bullock's blood. It ought to be mentioned, however, that Thucydides, who may almost be called a contemporary with Themistocles, speaks doubtfully of the above-mentioned fact, and says that he died of a distemper, "although," he adds, "some say of poison, voluntarily, aware of his being unable to accomplish what was required of him by the king." At Magnesia, the city wherein he lived, a splendid tomb was erected to his memory; but his remains were conveyed to Athens, by his own express desire; and it should be recorded, to the honour of his country, that, at his death, the Athenians, forgetting his faults, and mindful of his services alone, erected a magnificent sepulchre over his remains.

Not half so swift the trembling doves can fly,
When the fierce eagle cleaves the liquid sky;
Not half so swiftly the fierce eagle moves,
When through the clouds he drives the trembling doves;
As from the god she flew with furious pace,
Or as the god more furious urged the chace.
Now fainting, sinking, pale, the nymph appears;
Now close behind his sounding steps she hears;
And now his shadow reached her as she run,
His shadow lengthened by the setting sun;

And now his shorter breath, with sultry air,
 Pants on her neck and fans her parting hair.
 In vain on Father Thames she calls for aid,
 Nor could Diana help her injured maid.
 Faint breathless, thus she prayed, nor prayed in vain,
 Ah Cynthia! ah—though banished from thy train
 Let me, O let me, to the shades repair,
 My native shades! there weep, and murmur there!
 She said, and melting as in tears she lay,
 In a soft silver stream dissolved away.
 The silver stream her virgin coldness keeps,
 For ever murmurs and for ever weeps;
 Still bears the name the helpless virgin bore,
 And bathes the forest where she ranged before.

5. Describe the state of affairs, political and military, in France at the time of Louis XIII.'s death.

6. What was the origin of the Fronde? Who were the popular leaders, and who the chiefs of the court party? Give some account of the most celebrated among the leaders on each side.

7. Give an account of the dissensions between the Court and the Parliament of Paris from the arrest of the two members to the conclusion of the Peace of Ruel.

8. "It was the fate of Turenne and Condé to be always victorious when they fought together at the head of the French, and to be beaten when they commanded the Spaniards." Show the truth of this statement.

9. Mention the principal works of Hobbes, and give an outline of his ethical system.

10. What is Casuistry? "The most extensive and learned work on casuistry which has appeared in the English language

was published in 1660." State and describe the work here alluded to, and point out its defects.

11. Estimate Dryden as a poet and a dramatist. What political intrigues gave occasion to the poem of Absalom and Achitophel? Who are intended by Achitophel, Zimri, Barzillai, Shimei and Nadab?

12. Give a brief history of the political literature of England during the period between 1649 and 1689.

POLITICAL ECONOMY.

Examiner.—MR. S. LOBB, M. A.

1. Give an outline of Quesnay's Economic System, and show in what respects it was defective.

2. What are the advantages arising from Division of Labour, and what conditions are necessary for carrying them to their full extent?

3. What gave rise to the institution of banks, and what are the advantages secured by them?

State the measures adopted by Parliament in 1844 for improving the currency, and investigate their effect.

4. What are the essentials of private property? State Mill's distinction between the right of bequest and the right of succession by inheritance.

5. Distinguish clearly between the exchangeable and the real value of any commodity.

Explain and refute the doctrine of Adam Smith, that corn furnishes an invariable standard of value.

6. What was Malthus's theory of population? Explain and illustrate how an increase or decrease of capital, as compared with population, will affect the wages of labour.

7. What was Adam Smith's Theory of Rent? State the objections made to it, and explain the present theory.

8. Discuss the evil effects that must ensue from any attempt to reduce the value of money by legislative enactment.

9. Explain how a joint-stock company with limited liability differs from a commanditarian partnership. What are the advantages of the latter?

10. State the three principal defects of slave labour, and trace their consequences.

Show how the slavery of modern times differs from that of Greece and Rome.

HISTORY.

Examiner.—MR. J. W. McCrindle, M. A.

Clarendon, Whitelock.

1. In what position were the affairs of Charles I, when he summoned the Parliament which met in April 1640? Give an account of the proceedings of this Parliament. Why did the king abruptly dissolve it, and why was his doing so a great political error?

2. Why did the Commons proceed against Strafford by a Bill of Attainder, and not by an impeachment? What were the leading charges preferred against him? Give (from Whitelock), as nearly as you can remember, the concluding part of his Defence. On what grounds may it be doubted whether he was legally convicted?

3. What caused the Irish Rebellion? Give some account of it, and state to what suspicions and misrepresentations it exposed the king.

4. What was the general tenor of the "Remonstrance" framed by the popular leaders of the House of Commons in 1642? Why was it not published in the regular manner? Give (from Clarendon) the substance of the king's reply.

5. What was the nature and design of the Militia Bill? Why did the king refuse his assent to it?
6. Compare the military position and resources of the contending parties at the outbreak of the Civil War.
7. Give a narration of the events of the Campaign in the Western shires in 1643, and of the Battle of Newbury.
8. Under what circumstances was the "Solemn League and Covenant" entered into, and with what results to the fortunes of the war?
9. Sketch briefly the career of the following :—
 - (a) Denzil Hollis.
 - (b) Oliver St. John.
 - (c) Archbishop Laud.
 - (d) Lord Falkland.
 Giving Clarendon's estimate of the character of each.

HISTORY.

Examiner.—MR. J. W. McCrindle, M. A.

Clarendon, Carlyle, Burnet, &c.

1. Trace the rise of the party of the Independents—what were its principles, political and religious? Who were its most influential leaders?
2. What was "the Self-denying Ordinance?" Give an outline of the speech in which Cromwell urged the Commons to pass it. By what expedient did he evade complying in his own case with its requirements?
3. What attitude towards the Government was assumed by each Parliament of the Commonwealth respectively?
4. Give an outline of the policy pursued by the "Cabal Ministry," and state what circumstances led to its overthrow.
5. How did Burnet forfeit the favour of Charles II.?

6. Write a brief biography of the Earl of Shaftesbury. How has Burnet painted his character?

7. State the objects of the "Secret Treaty" of 1670. What were the differences between Charles and Louis as to the mode of its execution?

8. Mention the circumstances connected with the Attainder of Sir John Fenwick.

9. "It was a happy circumstance for the Protestant Religion that at the moment when the last Roman Catholic King of England mounted the throne, the Roman Catholic Church was torn by dissensions and threatened with a new schism."

Comment fully on the state of matters referred to in this passage.

10. Specify the chief of those imprudent or illegal measures by which James II. precipitated his own ruin.

11. Give a brief sketch of the career of any of the three following characters—

(a) Halifax.

(b) Algernon Sydney.

(c) Titus Oates.

HISTORY.

Examiner.—MR. J. W. McCrindle, M. A.

Subject for Essay.

An inquiry into the causes to which we may, with probability, attribute the comparative moderation, with which the English Revolution was on the whole conducted. Enquire also, why it ended in a happy Settlement, and shew what important constitutional reforms or changes it effected.

MENTAL AND MORAL PHILOSOPHY.

Examiner.—REV. J. D. DON.

Metaphysics.

1. Expound the doctrine of the Duality of Consciousness held by Natural Realists. Idealists admit an apparent duality—what do they deny? Show that the denial implies an assumption fatal to all confidence in the validity of human knowledge.

2. *a.* Explain the Hamiltonian distinction between Presentative and Representative knowledge. In what respect does it differ from that of Intuitive and Representative consciousness employed by Mansel?

2. *b.* Criticise Reid's doctrine that Consciousness is cognisant of the operations of the different faculties, without being cognisant of their objects.

3. *a.* Distinguish between Organic and Extra-organic matter. Show that the sensitive organism may be regarded in one aspect as belonging to the ego, and in another to the non ego. In connection with this distinction, explain the nature of that immediate knowledge of the external world which is affirmed by Natural Realism.

3. *b.* Go over the different senses—distinguishing the perception from the sensation, and stating the immediate object of perception in connection with each. Indicate the place of direct intuition and that of inference, in causing our knowledge of the extra-organic world.

4. *a.* Sketch the history of the distinction between primary and secondary qualities of body. How does Hamilton express the general distinction in the earlier statements of his views?

4. *b.* In the final expression of his opinion Hamilton distinguishes between the primary and secondary qualities of body. Explain this distinction.

5. *a.* Some philosophers have taught that comparison or judgment is involved in every act of knowledge—On what grounds do they maintain this? What is your opinion? If you dissent from the aforesaid doctrine, give reasons.

5. *b.* State the relation between knowledge and feeling in general. Explain the relation of perception proper and sensation proper, viewed as a special manifestation of this general contrast.

6. What is the doctrine of mental latency or unconscious mental modifications? Who was its author? It has been applied to dexterities and habits—how? You are invited to state your own opinion on the subject.

7. Elucidate the following statement: "The consecration of the action of mind is involved in the very conception of its power of self-activity." Show how this principle and that of latent mental modifications may be used to explain the phenomena of Retention and Forgetfulness.

8. To what philosopher are we indebted for the earliest analysis of the laws which govern the faculty of mental reproduction and regulate the association of ideas? State his analysis. Mention other classifications. Show that all the laws are reducible to one.

9. Explain the following statements: "Pleasure is a reflex of the spontaneous and unimpeded exercise of a power of whose energy we are conscious. Pain a reflex of the overstrained or expressed action of such a power." How has this theory been used to explain our apprehension of the beautiful?

10. To what use has the law of the conditioned been applied by the Scoto-Oxonian School in reference to our notion of the Infinite. You are invited to criticize the doctrine of a merely negative infinite.

LOGIC.

Examiner.—REV. J. D. DON.

1. Explain the distinction between Pure and Applied or Modified Logic. Criticize that definition of Logic which represents it as both a Science and an Art. Or if you prefer it, defend the same.

2. Give a brief exposition of the following definition: 'Logic is the science of the laws of thought as thought.'

3. Some have confined Logic to reasoning—that exercise of the discursive faculty of which the Syllogism is the formal expression. Show that the science must also take cognisance of Conception and Judgment. Distinguish the sphere of Psychology from that of Logic in reference to these operations.

4. Explain the distinction between first and second notions or intentions, adverting to the misapprehension of its real nature by certain writers.

5. *a.* The totality of the concept is said to be constituted by two counter-wholes. Elucidate this. State and illustrate the law of their correlation.

5. *b.* What is the import of propositions according to the ordinary theory of predication? State Mr John Stuart Mill's criticism of this doctrine. Give his own view.

6. Give historical notices regarding the distinctions alluded to in question 4 and question 5. *a.*

7. *a.* Explain the doctrine called the thorough quantification of the predicate. What portion of the proposed addition to the logical system has found acceptance with many logicians? On what grounds do some reject the remainder?

7. *b.* On what ground does Mr. Mill reject the *dictum de omni et nullo* as the basis of ratiocination? What principle or principles does he propose to substitute? Mention the characteristics of his own theory.

8. Distinguish between Predication and Inference—Immediate and Mediate inference. What are the modes of Immediate inference? What are Mill's views regarding Immediate inference?

9. Define Concrete and Abstract notions, Connotative and Non-Connotative terms. What word does Mill employ instead of Intention or Comprehension?

10. State and criticize Whately's mode of expressing Induction syllogistically. Distinguish between Logical or Formal and Real or Material induction. The latter rests on a presumption—what? In the investigation of causes a place has been assigned to Anticipation. What is its nature and place?

11. No good man ever perpetrates wilful wrong.

Some good men have to choose between suffering and inflicting injuries. State the conclusion—the figure—mnemonic word—the rules of that figure and its most convenient uses. Reduce the syllogism.

12. *a.* Distinguish between the Paralogism and the Sophism. Three principles have been laid down, determined by the syllogistic laws, of one or other of which every fallacy is a violation—what are they?

12. *b.* Solve the following fallacies :

If any objection that can be urged would justify a change of established laws, no laws would reasonably be maintained; but some laws can reasonably be maintained: therefore no objection that can be urged will justify a change of established laws.

Animal food may be entirely dispensed with, and vegetable food may be entirely dispensed with: but all food consists of animal food and vegetable food: therefore all food may be dispensed with.

War is productive of evil: therefore peace is likely to be productive of good.

HISTORY OF PHILOSOPHY.

Examiner.—REV. J. D. DON.

1. Give a sketch of the life and activity of Socrates. From what sources do we obtain our knowledge of his doctrines? State the nature of the influence exerted by him on the development of Greek philosophy. Indicate the salient points of his teaching.

2. *a.* Which of the Platonic dialogues is devoted to a discussion of the nature of science? What is the relation of Plato's Dialectic to other sciences? He represents mathematics &c. as possessing only a disciplinary value—disciplinary for what?

2. *b.* The Platonic philosophy has a prevailing ethical character, and has been described as 'a contemplative philosophy only for practical purposes.' Illustrate this.

3. *a.* State briefly the Platonic theory of Ideas—indicating the relation of Ideas (*a*) to God, (*b*) to the universe, (*c*) to man.

3. *b.* Indicate some of the points of contrast between Plato and Aristotle in regard to method and results. Aristotle teaches a science differing in method, but identical in aim, with the Platonic Dialectic—what is its name? State what you know of the subjects discussed in his treatise on metaphysics.

4. Which is Aristotle's principal ethical treatise? What is his theory of Virtue?

5. From what Greek source was the Arabian philosophy derived? During what period did it flourish? Give some account of its development, mentioning the more distinguished names.

6. State the three epochs of Scholasticism, mentioning the chief thinkers that belong to each. State briefly what you know of the philosophical opinions of Scotus Erigena, Abelard and Thomas Aquinas.

7. With which of the Scholastic philosophers does Descartes possess affinities? State what you know of these affinities. Give some account of Descartes' method. Indicate the relation of Descartes to modern philosophy.

8. Trace the connection between David Hume and the philosophers now known as Scottish and German. State the nature of the bulwark against Scepticism constructed by Reid.

9. Point out the difference between Kant's attitude toward scepticism and that of Reid. Distinguish between the critical and inductive method. Explain the Kantian division of Judgments, and state the radical problem of the human mind according to Kant.

10. Explain the distinction between the Form and the Matter of knowledge, and state generally Kant's account of the manner in which human knowledge is constructed.

11. Kant takes refuge in the Practical Reason from certain results of his critique of the Pure Reason. Elucidate this. What is his Categorical Imperative?

12. What is the principle of Absolute Identity? Give a brief account of the two celebrated German Schools which agree in maintaining this principle.

MORAL PHILOSOPHY.

Examiner.—REV. J. TRAFFORD, M. A.

1. Enumerate the principal views that have been taken by Moral Philosophers of *the nature of virtue*—and as nearly as you can in a chronological order.

2. Offer a criticism on Paley's definition of virtue as "doing good to mankind in obedience to the will of God and for the sake of everlasting happiness."

3. Distinguish "right" as an Adjective from "right" as a Substantive, and show how they sometimes may be contrasted.

4. How does Whewell shew that the idea of moral goodness involves the five cardinal virtues of Benevolence, Justice, Truthfulness, Purity and Order?

5. What controversy has there been about "disinterested love to God?" Give and justify an opinion on the question in dispute.

6. Butler contends that "if conscience had *strength*, as it has *right*, it would rule the world:" how does he establish his position?

7. In what sense are promises to be interpreted? Discuss the question whether those extorted by *fear* are binding.

8. Whewell treats the *elementary notions* of morality as axioms, is he justified in doing so? Give reasons for your opinion.

9. How does Mackintosh attempt to shew that the relation of Conscience to Will may render somewhat less perplexing the question of Liberty and Necessity?

10. Adam Smith explains our moral sentiments by our various sympathies; state fully his theory and point out its main defects.

NATURAL THEOLOGY.

Examiner.—REV. J. TRAFFORD, M. A.

1. "Order," argues Tulloch, "universally proves mind." This assertion rests upon the doctrine of causation as opposed to the Positivism of Mill and A. Comte; and on the assumption that we are entitled to take our limited experience as the basis of an universal hypothesis in opposition to the Scepticism

of Hume. 1. How does Tulloch therefore establish that doctrine? 2. How may that assumption be justified?

2. How does the Emotional life of man impress us with benevolent design in our Creator?

3. The affirmative evidence of benevolent design is not overborne either by the existence of physical evil *i. e.* of suffering and death; nor by the existence of moral evil or sin. Endeavour to establish both parts of this proposition.

4. Whence does the conception of the Divine Personality, as opposed to Pantheism, arise? And by what is it sustained?

5. Why do we conclude that the intelligent Cause of all things is an Infinite Being? Can you state the argument of Descartes, and Kant's criticism upon it?

6. What various theories have been suggested to explain the origin of evil?

7. What application of Sir W. Hamilton's Philosophy has been made by Mansel to our knowledge of God? Does that application necessarily lead to any consequences subversive of piety?

8. Mention some things in man's nervous system which have been thought impressive manifestations of the wisdom of our Creator.

THE EVIDENCES OF CHRISTIANITY.

Examiner.—REV. J. TRAFFORD, M. A.

1. Shew that the Evidences of Christianity are adapted to our present state as a *state of probation*, and a *state for improvement*.

2. How would you meet the objection that "the doctrine of Christ's suffering for the sins of the world makes it an indif-

ferent thing with God, whether He punish the innocent or the guilty?"

3. Objections have been made to the argument for Christianity drawn from analogy. How does Butler reply to them?

4. Contrast the establishment of Christianity in the world with that of Mahomedanism and that of Buddhism, so as to shew that the first furnishes an argument for its Divine origin.

5. How does the *originality* of Christ's character contribute evidence to sustain His claims?

6. The adaptation of Christianity to the wants of men is often referred to as a strong internal evidence in support of it. Wherein is its *peculiar* adaptation seen?

7. What testimonies do *heathen* writers of the first two centuries of our era give in relation to Christianity? And how do you account for such slight notices of it in their writings?

8. Enumerate the chief Christian writers during the interval between the Apostles and the Council of Nice.

9. What facts can be proved by history that seem to establish the general authenticity of the books of the New Testament?

10. The Mysteries of Christianity are no sufficient reason for the rejection of it. Construct an argument to shew this.

MATHEMATICS.

Examiner.—MR. R. THWAYTES, B. A.

Trigonometry and Algebra.

1. Find the amount of a sum of money for any number of years at compound interest.

If the expression for the amount be expanded according to the powers of r (the rate of interest); give an interpretation to each term of the expansion.

2. There are n planes of which no two are parallel to each other, no three parallel to the same right line, and no four pass through the same point, find the number of lines of intersection of the planes, and the number of points of intersection of these lines.

3. Find the convergents to $\sqrt{\frac{3}{4}}$; shew that $\frac{13}{30}$ exceeds the true value by a quantity less than $\frac{1}{2910}$

4. Shew that the equation whose roots are—

$$\cos \frac{\cos^{-1} a}{3}, \cos \frac{2\pi + \cos^{-1} a}{3}, \cos \frac{2\pi - \cos^{-1} a}{3}$$

$$\text{is } x^3 - \frac{3}{4}x - \frac{a}{4} = 0.$$

5. If $f(x)$ be a rational and integral function of x , explain the formation of its successive derived functions. Shew that an odd number of roots of $f'(x) = 0$ lies between every two possible roots of $f(x) = 0$ and that, if

$$f(a) = 0, f'(a) = 0, f''(a) = 0 \dots f^{(r)}(a) = 0$$

$f(x)$ is divisible by $(x - a)^{r+1}$

6. Every equation whose roots are possible, has as many positive roots as changes of sign, and as many negative roots as continuations of sign.

Enunciate the theorem when the roots are not all possible.

7. Explain Newton's method of approximation to the roots of an equation, and shew when it may be safely applied.

Obtain an approximate value of a root, if $x^3 + 4x^2 - 1 = 0$ correct to two places of decimals.

8. Find the radius of the circle described about a triangle in terms of the sides. If a, b, c, A, B, C , and $a \cos A$,

$b \cos B, c \cos C, A_1, B_1, C_1$, be the sides and angles of two triangles; find the ratio of the radii of the circles described about them.

9. If $\left(\frac{m}{n}\right)$ be a fraction in its lowest terms and (r) any integer, prove that $\sin \frac{m}{n} (2r\pi + \theta)$ and $\sin \frac{2r\pi + m\theta}{n}$ have (n) different values; and that the two series of values are identical; and may be found by making (r) equal to any (n) consecutive integers.

10. Expand $\cos \theta$ in a series ascending by powers of (θ) , and thence prove that $\text{Cos } \theta = \frac{e^{\theta\sqrt{-1}} + e^{-\theta\sqrt{-1}}}{2}$

Deduce the equation $\sin(\theta + \phi) = \sin \theta \cos \phi + \cos \theta \sin \phi$

11. In a spherical triangle prove that

$$\cos a = \cos b \cos c + \sin b \sin c \cos A.$$

12. In a spherical triangle, given two sides and the included angle, solve the triangle.

Prove the formulæ which you use.

ANALYTICAL GEOMETRY.

Examiner.—MR. R. THWAYTES, B. A.

1. Find the equation to a straight line referred to oblique axes. The angle between the axes being 108° , draw the straight lines

$$(1) y = \frac{\sqrt{5+1}}{2} (x - a); \quad (2) y = \frac{\sqrt{5-1}}{2} x + a;$$

$$(3) x + y = \frac{3 + \sqrt{5}}{2} a,$$

And shew that, if (1) and (3) be produced to meet the axes and (2), the lines intercepted between the origin and the successive points of intersection will form a regular pentagon.

2. A circle passes through the point (h, k) and (h', k') , shew that its centre will lie in the line

$$(h - h') \left(x - \frac{h + h'}{2} \right) + (k - k') \left(y - \frac{k + k'}{2} \right) = 0$$

3. In a parabola, a line through any point P parallel to the axis bisects all chords parallel to the tangent at P, also if Q R be such a chord, and Q P and R P be given, the lines through the middle points of Q P' and R P' parallel to the axis will be equal.

4. If $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ be the equation to an ellipse, and (h, k) a given point; what does the equation $\frac{h x}{a^2} + \frac{k y}{b^2} = 1$ represent, (1) when (h, k) is in the circumference of the ellipse, (2) when it is without it, (3) when it is within it?

5. A parabola of given latus rectum is described touching symmetrically two conjugate diameters of an ellipse, find the locus of the focus.

6. To find the locus of the intersection of a pair of tangents to a rectangular hyperbola $x y = c^2$ which are such that the product of the tangents of their inclinations to the axis of x is constant.

7. If from a point in an asymptote to conjugate hyperbolas, a tangent be drawn to each hyperbola, to prove that the points of contact will be in conjugate diameters.

8. Determine the form of the general equation to a conic section, when referred to any two tangents as axes.

9. Find the perpendicular distance of the point (f, g, h) to the straight line represented by the equations

$$\frac{x}{l} = \frac{y}{m} = \frac{z}{n}$$

10. Find the angle between two lines which make given angles with the coordinate axes.

11. The perpendicular from the origin on a plane is of given length, and makes given angles with the axes; find the equation to the plane.

DIFFERENTIAL AND INTEGRAL CALCULUS.

Examiner.—MR. R. THWAYTES, B. A.

(1.) Establish the formula $\frac{dy}{dx} = \frac{dy}{dz} \cdot \frac{dz}{dx}$

Find $\frac{dy}{dx}$ from the following equations—

$$y = \tan^{-1} \frac{e^x \cos x}{1 + e^x \sin x} \quad \wedge \quad y = \frac{x \sin^{-1} x}{\sqrt{1-x^2}} + \log \sqrt{1-x^2}$$

2. Investigate Leibnitz's theorem, and apply it to find the n^{th} differential of $\frac{y}{a} = \tan^{-1} \frac{x}{a}$

3. Expand $e^{x \sin x}$ in a series ascending by powers of x .

4. Shew how to find maxima and minima of a function of one variable.

Determine the position of the two lines drawn at right angles to each other from the centre to the circumference of an ellipse, the product of which is the greatest.

5. Obtain the differential expression for a solid of revolution, and apply it to find the volume of a sphere.

6. Eliminate the exponentials from

$$x y = a e^{\frac{x}{a}} + b e^{-\frac{x}{a}}$$

7. Find an expression for the radius of curvature referred to polar coordinates.

8. Trace the curve $y^3 = a^3 - x^3$.

9. Integrate $\sqrt{a^2 - x^2} dx$, and $x^2 (a + x)^{\frac{1}{2}} dx$

10. Find the value of $\int_0^{\frac{\pi}{2}} (\sin \theta)^n d\theta$ where n is a positive integer.

11. Find the whole area of the curve

$$\left(\frac{x}{a}\right)^{\frac{2}{3}} + \left(\frac{y}{b}\right)^{\frac{2}{3}} = 1.$$

STATICS AND DYNAMICS.

Examiner.—MR. C. W. HATTEN, B. A.

1. Enunciate the proposition called the "Parallelogram of Forces," and—

(i) Assuming it to be true for the direction, prove that it is true for the magnitude of the resultant.

(ii) Assuming it to be true for the magnitude, prove that it is true for the direction of the resultant.

2. Define a couple, and the moment of a couple, and shew how to find the resultant of two couples which act in planes that are not parallel.

$A_1 B_1 C_1 D_1, A_2 B_2 C_2 D_2$ are parallel faces of a rectangular parallelopiped, the edges $A_1 A_2, B_1 B_2, C_1 C_2, D_1 D_2$, being parallel to each other; if forces represented by the edges $A_1 B_1, A_1 D_1, C_2 D_2, C_2 B_2$, act respectively along these edges, shew that they are equivalent to a couple acting in the plane passing through $A_1 A_2, C_1 C_2$, and represented in moment by the area of the section of the parallelopiped made by that plane.

3. Find the resultants of any number of forces acting upon a rigid body in any directions.

4. Define the centre of gravity of a system of particles.

Find the centre of gravity of a material straight line whose density varies as the square of the distance from one end of the line.

5. Find the condition of equilibrium for the screw, supposing friction to act.

If the inclination of the screw be α , $\tan \epsilon$ the coefficient of friction, P_1 the least force which will prevent the weight from descending, P_2 the greatest which can be applied without its rising, then

$$\frac{P_2 - P_1}{P_2 + P_1} = \frac{\sin 2\epsilon}{\sin 2\alpha}.$$

6. Prove that the volume generated by a plane area revolving about a fixed axis in its own plane is equal to the product of the area, and the length of the path described by the centre of gravity.

Given that the volume of a ring generated by the revolution of a semicircle about a line parallel to its diameter, and at a distance from it equal to the radius $= \pi a^3 (\frac{4}{3} + \pi)$, where a is the radius of the semicircle, find the centre of gravity of a semicircle.

7. How is the acceleration of a particle measured (i) when uniform, (ii) when variable?

If a body starting from rest be acted on by an accelerating force, which varies at the time, prove that the space described in a given time, varies as the cube of the time.

8. Write down the Laws of Motion, and mention any means you know of illustrating the truth of the Third Law.

9. When a particle moves under the action of a force in its line of motion, the force varying directly as the distance of the particle from a fixed point in the line, determine the motion.

Three centres of force A, B, C, of equal intensity and in

the same straight line, attract directly as the distance, A and C being equidistant from B, and on opposite sides of it : prove that if a particle start from rest at A, it will just reach C, and that it will attain its maximum velocity at B.

10. Prove that if a particle move about a fixed point with an acceleration towards it varying directly as the distance, the path described by the particle will generally be an ellipse.

If the particle be projected at right angles to the line joining it to the fixed point, find what must be the velocity of projection that the path described may be a circle.

If the particle be projected at right angles to the line joining it to the fixed point, and with a velocity greater or less than that required for a circle, find the length of the other axis of the ellipse.

11. Prove that the times of descent of a heavy body initially at rest down all chords of a vertical circle through the highest point are the same.

Prove that if an ellipse be in a vertical plane with its minor axis vertical, the time of descent from the highest point down the minor axis, will be less than that down any other chord.

Give a geometrical construction for finding the other chords down which the times of descent from the highest point are equal to that down a given chord.

12. An elastic ball strikes a smooth plane obliquely, determine its motion.

A square smooth horizontal table has a vertical rim ; prove that a ball projected horizontally on the table from the middle point of one of its sides, will return to the point of projection after striking the other three sides in order, if the tangent of the angle made by the direction of projection with the sides of the square be $\frac{2e}{1+e}$, where e is the modulus of elasticity.

HYDROSTATICS AND HYDRODYNAMICS.

Examiner.—MR. C. W. HATTEN, B. A.

1. Explain the meaning of the terms density and specific gravity.

If the specific gravity of water be the unit of specific gravity, and a foot the unit of space, find the numerical value of the weight of a column of the atmosphere, the base of which is 5 square feet, when the barometer stands at 30 inches, the density of mercury being 13 times that of water.

2. How is the pressure at any point in a fluid measured? Shew that in a fluid of constant density, the pressure varies as the depth below the surface.

A cube is just immersed vertically in a vessel containing two fluids, whose specific gravities are as 1 to 4, the depth of the upper fluid being 8 inches; find the dimensions of the cube that the pressure on the portions of each side immersed in the fluid may be equal.

3. Prove that the whole fluid pressure on a surface immersed in a fluid, is equal to the weight of a column of fluid having for its base the area of the surface immersed, and for its height, the depth of the centre of gravity of the surface below the surface of the fluid.

If a hemispherical bowl be filled with fluid, and a plane be drawn perpendicular to the axis through its middle point, the whole fluid pressure on the surface below the plane will be to the whole fluid pressure on the surface above the plane as 3 to 1. Will this ratio be increased or diminished, if the pressure of the atmosphere on the surface of the fluid be taken into account?

4. Prove that a right angled triangular lamina of uniform density can be kept at rest by a certain couple, when one of the sides containing the right angle is immersed horizontally, and the other sides are in a vertical plane and half immersed,

if the specific gravity of the triangle be to that of the fluid as 3 to 4. Find the moment of the couple.

5. Enunciate Boyle's Law, and describe an experiment by which it is proved to hold for common air. A given quantity of air has its volume suddenly altered by compression; will Boyle's Law alone give us the instantaneous change in the pressure?

6. Prove that if a mass of fluid be at rest under the action of any forces,

$$X \left(\frac{dY}{dz} - \frac{dZ}{dy} \right) + Y \left(\frac{dZ}{dx} - \frac{dX}{dz} \right) + Z \left(\frac{dX}{dy} - \frac{dY}{dx} \right) = 0.$$

7. Describe Hawksbee's Airpump, and find the density in the receiver after n strokes.

8. What is specific heat?

If two masses m_1 , m_2 at temperatures t_1 , t_2 be mixed together, find the temperature of the mixture—

(i) When the masses are of the same substance.

(ii) When they are of different substances, whose specific heats are K_1 , K_2 respectively.

9. What is the metacentre of a floating body? Show how to find its position in the case of a solid of revolution with its axis vertical.

10. A cylinder, whose specific gravity is $\frac{1}{3}$, floats with its axis vertical; if the radius of the base be given, find the length of the axis of the cylinder, that the equilibrium may be neutral.

11. A vessel in the form of a circular cylinder, the curved surface of which is flexible, contains fluid; if the axis of the cylinder be vertical, find the relation between the pressure, and the horizontal tension of the vessel at any point.

12. A plane lamina immersed in a stream, perpendicular to the direction of its motion; find the pressure on the lamina.

Find the pressure on a square board, which being immersed in a stream, is moving with a velocity equal to half that of the stream.

OPTICS AND ASTRONOMY.

Examiner.—MR. C. W. HATTEN, B. A.

1. When a small plane area is illuminated by a pencil of rays emanating from a luminous point, the illumination at any point of the area varies directly as the cosine of the angle of incidence and inversely as the square of the distance from the luminous point.

The perpendicular from a luminous point on a circular plane falls on the centre of the plane, and is equal in length to its radius; find the illumination of the plane.

2. Find the distance of the geometrical focus of a pencil of rays from the centre, after direct refraction at a spherical surface.

A sphere of glass has a spherical cavity concentric with it, and of half its radius. Find the geometrical focus of a pencil of rays after direct refraction through the sphere, if the origin of the pencil be at a distance from the centre of the sphere equal to three times its radius, the refractive index for glass being $\frac{3}{2}$.

3. Explain the formation of focal lines, when a small pencil is incident obliquely at a plane or spherical refracting surface.

Find the positions of the focal lines, when a small pencil is incident obliquely on a plane refracting surface.

4. Explain the following terms;—Deviation of the axis of a pencil, dispersive power of a medium, achromatism, secondary spectra.

When a ray of light is refracted through a prism in a principal plane, find the dispersion of two colours of given refractive index.

5. A pencil of parallel rays is refracted directly through two thin lenses in the same axis, separated by a given interval; find the condition of achromatism.

6. Describe Ramsden's Eye-piece.

Through an Astronomical Telescope with Ramsden's Eye-piece trace the course of a pencil from a point not in the axis of the telescope; explain the positions of the lenses and of the images formed by them; find the magnifying power of the instrument.

7. What observations are made with the transit instrument, the mural circle, and the equatorial respectively?

Mention the errors of adjustment to which the first two are subject, and shew in which instrument they are of greater importance.

8. Why does the moon always present nearly the same face to the earth? Explain what is meant by the terms "libration in longitude," "libration in latitude," and "diurnal libration," and give a general explanation of these phenomena.

9. Give a general explanation of tides, shewing why the moon is more influential in causing them than the sun, though her attraction on any particle of the earth is less than the sun's.

What are spring and neap tides, and the priming and lagging of tides?

10. What is parallax? In what plane does it take place? Find the horizontal parallax of a heavenly body by observations taken at two places on the same meridian.

11. Account for the change in the length of the day at a place of given latitude. To what is twilight due?

Find the lowest latitude at which twilight lasts all night. Why is the mean duration of twilight shorter at the equator than elsewhere? and when is its duration there shortest?

12. Shew how to find the lunar ecliptic limits.

INORGANIC CHEMISTRY.

Examiner.—MR. H. F. BLANFORD.

Answer questions 2, 4, 5 and 9; either 1 or 3; and either 6, 7 or 8.

1. What is meant by the Electro-negative and Electro-positive elements in a chemical compound? and on what facts and theory is the nomenclature based? In the following binary compounds, state which are the electro-negative elements.

NaCl.; HS.; CaP.

2. Give the reactions that take place in the preparation of Hydrofluosilicic acid and gelatinous Silica from CaF, SiO₂, and water.

3. What is meant by Catalysis? and give one or more examples.

4. Give the chemical formula of the compound, the composition of which is

Phosphoric acid,	28.38
Protoxide of iron,	42.97
Water,	28.65

Total, ... 100.00

5. Specimens of six salts are given for determination, viz. a, b, c, d, e, f.

a is of a deep orange red colour. It colours the blowpipe flame violet, and gives a green bead with borax. It dis-

solves readily in water, and the solution gives, with acetate of lead, a bright yellow precipitate (I); with nitrate of silver, a dark red precipitate (II); and with nitrate of mercury, a brick red precipitate (III.)

b is white, crystallizing in cubes: colours the blowpipe flame violet; dissolves readily in water, and the solution gives, with corrosive sublimate, a salmon-coloured precipitate, (I) which speedily turns scarlet.

c is of a pale sea-green colour; dissolves readily in water; the solution gives, with ferrocyanide of potassium, a pale blue precipitate (I) which gradually becomes of a dark blue. With chloride of barium, it gives a dense white precipitate, (II) insoluble in acids.

d is colourless, and colours the blowpipe flame yellow. Dissolves readily in water, and the solution gives, with nitrate of silver, a white precipitate (I) which, when dried and heated, fuses to a horny mass.

e is of a bright green colour. It dissolves in water and gives a black precipitate (I) with hydrosulphate of ammonia, and a dense white precipitate, insoluble in acids (II), with nitrate of baryta. The precipitate (I) colours a borax bead hair-brown in the oxidising blowpipe flame.

f is colourless, and when strongly heated, gives off red pungent fumes (I). Dissolved in a large quantity of water, the solution becomes milky, and deposits a white powder, (II) which when treated on charcoal with carbonate of soda under the reducing flames, gives a brittle metallic bead.

Name any three of the salts, *a*, *b*, *c*, *d*, *e*, *f*, and also the precipitates &c. obtained in the reactions, and numbered I, II, III, &c.

6. From what ore is Tin obtained? and describe the Cornish process of melting it, giving the reactions.

7. From what ore is Lead chiefly obtained? and describe

any metallurgic process for extracting the metal, giving the reactions.

8. From what ore is Zinc chiefly obtained? and describe any metallurgic process for obtaining the metal, giving the reactions.

9. Give the physical and chemical characters of any three of the following metals.

Bismuth.	Gold.
Antimony.	Sodium.
Platinum.	Aluminium.
Arsenic.	Zinc.

ORGANIC CHEMISTRY.

Examiner.—DR. ROBSON.

1. State the theory of Compound Radicals; and illustrate by examples.

2. What conditions are essential to the occurrence of fermentation? What chemical changes take place during the *Alcoholic* fermentation?

3. Mention the composition, preparation and properties of Cyanogen, Hydrocyanic acid and Ferrocyanide of Potassium.

4. Mention the composition and properties of the Proximate Constituents of the Fats and Oils. Describe briefly the manufacture of soap.

5. Mention the characteristic properties of Albumin, Fibrin and Casein, and state how these substances may be distinguished from each other.

6. Give a sketch of the Chemistry of morbid Urine.*

ELECTRICITY.

Examiner.—MR. H. F. BLANFORD.

Answer questions 1, 4, 5, and 8 ; either 2 or 7 ; and either 3 or 6.

1. What are Franklin's, Dufay's, and Faraday's theories of Electricity ?

2. Give Snow Harris' laws of induction and attraction, for the varying conditions of distance, charge and surface.

3. Describe any one form of electroscope and one of electrometer ; their respective purposes and how used.

4. Define the following terms as used in frictional electricity—

Electric.

Insulator.

Dielectric.

Quantity.

Conductor.

Intensity.

5. Define the following terms employed in Voltaic electricity.

Electrolyte.

Electromotive force.

Anode.

Resistance.

Cathode.

Current.

Ion.

6. Describe the essential parts of the following forms of Voltaic elements, and the purposes of their several peculiarities.

Wollaston's element.

Grove's nitric acid ditto.

Smee's ditto.

Bunsen's ditto.

Grove's gas ditto.

Daniell's ditto.

7. Give Ohm's formula of the relation of an Electric current A to Electromotive force E , and resistance $R + r$, and its modifications in the cases of the simple and compound Voltaic arrangements.

Show that with 10 elements, the simple arrangement is preferable when $R = r$, the compound arrangement when $r = 20 R$.

8. Describe any arrangement by which an electric current can be produced with a permanent magnet, and state what form of force is to be regarded as the real source of the current.

BOTANY.

Examiner.—DR. ROBSON.

1. Define the following terms:—stipule, tendril, involucre, thalamus, pappus, caryopsis, siliqua, rhizome, veneration, aestivation.

2. What conditions are essential to germination? Describe its progress in dicotyledons, and mention the chemical changes which occur.

3. Give a general account of the function of Nutrition and enumerate its various stages.

4. What plants yield sugar? to what orders do they belong? and what are the differences between cane-sugar and grape-sugar?

5. What are the characters of DeCandolle's sub-classes of the Exogens, *Thalamifloræ*, *Calycifloræ*, *Corollifloræ* and *Monochlamydeæ*?

6. Give briefly the characters of the following orders—*Papaveraceæ*, *Malvaceæ*, *Leguminosæ*, *Cucurbitaceæ*.

COMPARATIVE PHYSIOLOGY.

Examiner.—DR. ROBSON.

1. Explain the principle of *homology* as shewn in the vertebrate skeleton, and illustrate by examples.
2. Describe the Mammalian Ovum. Mention the changes it undergoes in the course of its evolution, maturation, and discharge from the Ovary.
3. Describe the Respiratory Apparatus in the following classes of animals—Echinodermata, Bivalve Mollusca, Insects, Fishes and Birds.
4. Describe the general structure, habits of life, and modes of reproduction of the Hydra, a freshwater Polype.
5. Describe the Electrical Apparatus of the Torpedo.
6. Describe the metamorphoses of the Bombyx Mori, a silkworm.

ZOOLOGY.

Examiner.—MR. H. F. BLANFORD.

Answer 1, 5 and 6 and either 2, 3 or 4.

1. In what sub-kingdoms does Phytoïd reproduction occur? and give an instance in each.
2. Give the sub-classes and orders of the Annulosa, with a brief synopsis of their characters.
3. Give the sub-classes and orders of the Mollusca, with a brief synopsis of their characters.
4. Enumerate the families of one of the following orders, giving the geographic distribution of each family—
 Pachydermata.
 Edentata.
 Carnivora.
5. To what orders and classes do the following Indian.

animals belong? Describe in detail the habit and mode of life of any ten of them.

The Loris.

„ Otter.

„ Cowry.

„ Snipe.

„ Nautilus.

„ Silkworm.

„ Centipede.

„ Mosquito.

„ Pangolin or Manis.

„ Crow.

„ Sirius.

„ Gecko.

„ Mantis.

The Arctictis.

„ Palm Squirrel.

„ Parrot.

„ Bungarus.

„ Scorpion.

„ Cecilia.

„ Antelope.

„ Peafowl.

„ Prawn.

„ Oyster.

„ Cockroach.

„ Gosamp.

„ Diodon.

6. Give a specific description of any one of the following common animals, with species, genus, family, &c.

The Indian Antelope.

„ Buffalo.

„ Horse.

„ Hunuman.

B. L. Examination.

THE PRINCIPLES OF JURISPRUDENCE AND THE ROMAN LAW.

Examiner.—MR. J. H. A. BRANSON.

1. Mention the sources of the Roman Law; define the term "*Jus*," and prove that though every right implies a corresponding duty, every duty does not imply a corresponding right, giving examples of relative and absolute duties.

2. By what agencies and how was the *Jus Civile* extended and modified?

3. Explain the saying "*Mulier familie suæ et caput et finis est,*" and show how this is the natural consequence of the Roman idea of a family.

4. What were the three elements of *Status* among the Romans? What was the term applied to the loss of each of the elements? how might each be lost? and how did the loss of each one of the three operate on the other two elements?

5. What are the three natural modes of acquiring real rights over particular things? and what modes of acquisition did the civil law superadd to these?

6. Distinguish between *obligationes civiles* and *obligationes naturales*. Whence, according to the Roman Law, did all obligations arise?

7. Define the term "*Command.*" Of how many species are commands? Give me examples of each.

8. In England, until lately, brothers of the half blood were prohibited from succeeding to one another's lands. From what system is this rule deduced? and wherein is the deduction erroneous? What limitation would render the rule a more correct deduction?

9. How would you distinguish the elements that composed an ancient from the elements that composed a modern society?

10. In your opinion, should a treatise on Law deal first with the Law of Persons or the Law of Things? Give the grounds on which you base your conclusion.

11. How many modes of forming contracts did the Civil Law recognize? Describe each, giving the kinds of contracts classed under each; and say how the several kinds of contracts, once formed, might be dissolved.

12. Define the following terms:—

Acceptilatio; *Jus in rem*; *Jus in personam*; *Dominium*; *possessio*; *servitudo*; *Jus pignoris*; *actiones arbitrarie*, and *Emphyteusis*.

THE RIGHTS OF PROPERTY.

Examiner.—MR. J. H. A. BRANSON.

1. What is Blackstone's theory as to the origin of property? Savigny says, with respect to Roman Law, that property is founded on adverse possession ripened by prescription; wherein lies the difference between Blackstone's views and the view of Savigny as laid down in this canon?

2. What are the principal points in which real property differs from personal property?

3. How does a tenant in fee simple hold his lands? Wherein is Blackstone's explanation erroneous?

4. Define an estate *pur autre vie* and an estate tail. Enumerate the kinds of estates tail, defining each.

5. For how long can lands now be tied up with certainty by English Law?

Within what time must an executory interest arise? and for how long may income be accumulated?

6. What is the law now as regards the rights of creditors in case of the death of their debtor dying possessed of lands in fee simple? and what is the effect of a charge of debts by will?

What are the rights of judgment creditors as to the lands of their debtors in the hands of purchasers?

7. What are the rules of the descent of an estate in fee simple at the present day?

8. A is the possessor of an estate in fee simple. B contracts with A for the purchase of A's estate. The moment the contract is signed, and before the estate is paid for, B dies intestate. What are the rights of B's heir as against B's administrators? What estate does he take at once? in what relation does A stand to him? and what are his rights as against A?

Give me the rule of Equity which is here exemplified.

9. Distinguish between a tenancy in common and a joint tenancy.

If lands be given to A and B, sister and brother, and the heirs of their two bodies, how will the law carry this gift into effect during the lives of A and B, and how after their death?

10. Suppose A, the holder of an estate in fee simple, wishes to convey his estate to himself and B in joint tenancy, how may he effect this purpose by one conveyance? Trace the action of the Statute of uses in this case.

Suppose an estate in fee simple be given to A, B and C, as joint tenants, in trust for D, and supposing the trustees to die, each leaving an heir at law, in the order of their names, and A to have conveyed his estate during life to E who survives C, and B to have devised his share by will to F who also survives C. Say what becomes of the legal estate on C's death?

11. What is a chose in action? What was the first innovation on the rule that choses in action were not transferable? and what is the law now as to the transfer or assignment of choses in action? Give one or more examples of equitable choses in action.

12. In what course of succession does property devolve in case of the owner dying intestate, according to Hindu, and according to Mahomedan Law?

PERSONAL RIGHTS AND STATUS.

Examiner.—MR. J. H. A. BRANSON.

1. A childless Hindu X adopts Y as his son. He afterwards adopts Z and makes a will, dividing all his property, ancestral as well as acquired, between Y and Z. On X's death

leaving Y and Z him surviving, what would be the rights of each as against the other in the matter of X's property ?

2. What is meant by a wife's equity to a settlement ? As against whom is it binding ? and out of what property can a wife claim it ?

3. What are the capacities and incapacities of married women and infants according to English, Hindu and Mahomedan law ? What is the age of majority according to each of the three systems ?

4. Suppose an Englishman of twenty years of age, resident in India, should make a will disposing of his real property situated both in England and in India : would his dispositions be upheld at all, and to what extent ?

5. How far is a man responsible for the acts of his wife, his son, and his servant, by English law ?

6. Distinguish between guardianship by nature and guardianship for nurture.

7. How far is an Ambassador subject to the laws of the country wherein he is officially resident ?

8. How far is the Sovereign bound by Acts of Parliament ? and how far may he avail himself of them ?

9. What are the rights of every British subject in regard to personal freedom and personal security ?

10. What are the rules as to who may and may not create a Trust, be a trustee, and be a *cestui que trust* ?

11. What persons are capable of making wills ? and what persons of being made executors ?

12. Distinguish between Libel and Slander, and say what remedy the injured person has in each case ?

LAW OF EVIDENCE AND PROCEDURE.

Examiner.—MR. J. C. WILKINSON.

1. What is meant by a *conclusive*, and what by a *disputable* presumption of law? How do you define a *presumption*? and give instances of *natural* and *artificial* presumptions.

2. Give any remarkable instances that occur to you in which the Legislature has declared that certain facts shall be presumed.

3. Distinguish between the functions of the Judge and of the Jury in questions of reasonable and probable cause, malice, and *bona fides*. And state instances in which malice or fraud may be presumed.

4. What is meant by *hearsay*? and when is it admissible? also when is *general reputation* admissible in evidence?

5. Distinguish between *primary* and *secondary* evidence, and say when secondary evidence may be admitted.

6. When a contract has been reduced to writing, why alone is the writing evidence of the intention of the parties thereto? Can parol evidence be given of the contents of a written agreement?

7. Why are not declarations of third parties (*i. e.* persons not parties to the suit) in ordinary admissible? When are they? And what are the considerations which warrant the reception of this class of evidence?

8. May a plaintiff or defendant claim as a matter of right that the witnesses be ordered out of Court during the trial of their case? And how is the testimony of a witness disobeying an order to leave the Court affected, as far as its admissibility is concerned?

9. For what reasons is an oath or affirmation administered to a witness? In India, what persons are required to give

their testimony upon oath? and what persons testify only upon affirmation?

10. What Act or Acts constitute the Civil Code of Procedure in India? and what suits are cognizable by the Civil Courts under it?

11. How is a suit in the Courts of Civil Judicature commenced? and what process is necessary to bring the defendant before the Court?

12. What particulars ought the Plaint to contain? and by whom should it be verified? When a Plaint is once filed, can it be amended? State your reasons.

13. What preliminary measures are necessary before the issue of a warrant in execution of a decree more than a year old?

14. Under what circumstances may a defendant be arrested before judgment?

15. In criminal trials before the Sessions Courts in the Mofussil, how is the trial of a prisoner to be conducted? and is there any difference in respect to an appeal from the sentence, where the prisoner has been tried by the aid of assessors or by a jury?

CRIMINAL LAW.

Examiner.—MR. C. J. WILKINSON.

1. Within what territories does the Indian Penal Code take effect? And when does it take cognizance of offences committed beyond these territories?

2. Define the following words.—“Public servant,” “Servant of the Queen,” “wrongful gain,” “dishonestly,” and “fraudulently.”

3. To what punishments are offenders liable under the Code?

4. Nothing is an offence which is done in the exercise of the right of private defence. When does this right arise? and within what limits is it confined?

5. When is a person said to abet an offence? What is the punishment of abetment of an offence punished with death, if the offence be committed in consequence of the abetment?

6. What is the punishment for waging, and attempting to wage war, against the Queen? and for collecting men, arms, &c. with the intention of waging war?

7. When is an assembly said to be unlawful? and when is a person said to be a member of one?

8. A, a judge, buys of Z who has a cause pending in A's Court, Company's Paper at a discount, when it is selling in the market at a premium. Has A committed an offence punishable under the Code?

9. When is a person said to give false evidence? and what is a fabrication of false evidence? What is the punishment provided for each offence?

10. What is "culpable" homicide; and under what circumstances is it not murder?

11. Define "grievous hurt" and "criminal force"—"theft" and "criminal breach of trust." To what amount of punishment is an offender liable who has committed criminal breach of trust as a clerk or servant? and as a public servant?

12. Define the offence of "Defamation"—and state concisely the exceptions to the offence mentioned in the Code in respect of words, expressions and imputations which harm, or have a tendency to harm, the persons to whom they refer.

THE LAW OF CONTRACTS.

Examiner.—MR. C. J. WILKINSON.

1. Define a *contract*. What is the essential incident of all contracts ?

2. Mention the different kinds of contract according to English Law. Mention some of the circumstances which will vitiate a contract otherwise good.

3. What contracts require a consideration to support them ? Explain the different kind of considerations ; and say what is a past or *executed* consideration.

5. How far can a married woman and an infant bind themselves by the English Law ? and to what extent do the Mahomedan Law and the Hindoo Law allow a married woman to inter into contracts ? Mention the persons in the above three systems of Laws who are generally incompetent to contract.

5. What is a contract of Insurance ? and what are the risks an underwriter usually assures against ? What is a *Charter party*, a *Bill of Lading*, *Bailment*, *Factor*, and *Broker* ?

6. What is the nature of the contract which an Innkeeper makes with each guest who puts up at his Hotel ? and what is an Innkeeper's liability at common law ? To what extent, by statutory enactment or otherwise, may Railway and other common carriers limit their liability in respect of goods committed to them for transit ?

7. What is a *lien* ? What is a *special* and a *general* lien ? and who are entitled to a special, and who to a general, lien ? And how are liens created and lost ?

8. What are the different kinds of partnerships recognized by the English Law ? and what are the rights and liabilities of partners—

I. As between themselves ;

II. As regards third parties ?

9. What is a *Bill of Exchange* ? and what a *Promissory Note* ? State what is the effect of an endorsement of either. And in cases of dishonour, what parties are entitled to notice ?

10. State the difference between a *general* and a *special* agent. To what extent does a general and a special agent respectively bind his principal in his dealings with third parties ?

11. Give some of the rules which govern the construction and interpretation of contracts.

Honor Examination in Law.

HINDU AND MAHOMEDAN LAW.

Examiner.—MR. C. J. WILKINSON.

1. To what extent in the direct male line is representation admitted in the Hindu Law of Inheritance ? and when the direct line fails, who next succeed ? When do the Sapindas succeed ? and who are next in succession to them ?

2. Give a short account of the rise of the different schools of Law prevalent in India ; and mention the Provinces or Districts in which they respectively have authority.

3. What is the nature of the tenure by which a Hindu widow holds property that has devolved upon her by her husband's death ? To what extent may she deal with it ? and say whether she can for other than allowable causes alienate or encumber it. Give texts and decisions for your opinion.

4. The estate of a Brahmin dying intestate escheats to the Crown as the sovereign power. How do you reconcile

this ruling with the exposition of the Law laid down in the Mitacshara, and the texts there cited? State the purport of the judgment of the Privy Council on this point, in the case of the Collector of Masulipatam, *vs.* Cavalry Vençata Narra-inaphah.

5. By the Law of Inheritance prevailing at Bombay, would the estate of a deceased brother, if the estate had been separately acquired by their father, pass to sisters, or to their father's brother, or if the latter was dead, to his sons? Give authorities for your opinion.

6. By the Law as prevalent in Bengal, what rights have sons in ancestral acquired property during the father's lifetime? Can the father make a gift of the whole of his ancestral property to a stranger, or to a son to the prejudice of his other sons, either by the Bengal or Mithila Laws? Give texts, and state the leading decisions on these points.

7. When a Hindu family migrates from one territory to another, if they preserve their ancient ceremonies and religious observances, they also preserve the law of succession prevailing in the territory from which they migrated; upon what principles have the Courts upheld this doctrine? Give the authorities upon the point. Is there any presumption in such a case in favour of the religious ceremonies and customs having been retained? or must their retention by the family be proved before the particular law of succession can be applied?

8. Explain how Wills have come to be recognized as valid by the Hindu Law in Bengal; and upon what principles have they been upheld by the courts of the Province? State what is the law with respect to Hindu Wills in the Presidencies of Madras and Bombay.

9. Under the Mitacshara Law, is the conveyance by one member of a joint and undivided family, without the consent of the other members, valid? And by the same law can an

estate be burthened with the debts of one of its joint members after his decease? Give your reasons and quote authorities in support.

10. What is the *Kritrima* form of adoption; and in what respects does a son so adopted differ from a *Duttaca* son, as regards his position in respect of his natural and adoptive families? Give your opinions on the subject of double adoptions, and support it by references to the ancient text writers. Distinguish between the case of Rungama, *vs.* Atchama, reported in Vol. VI. of Moore's Indian Appeals, and the case of Monemöthnath Day and Onanthnath Day lately tried in the Calcutta High Court.

11. Describe fully what is meant in Mahomedan Law by *Dower*; and when is it said to be conformed or corroborated? What may and may not be the subject of *Dower*? Give a summary of the law of *Dower*.

A woman sues her husband for Rs. 40,000 and one gold mohur, claiming that sum as a debt due on account of *Dower*. The evidence of the relatives of both parties tends to prove that the above amount is due; and also by their evidence it is shewn that it is never usual to stipulate for less dower on the occasion of the marriage of the female relations of either party. The husband, however, declares the dower to have been fixed at the lowest standard of ten dirhuns, which he also supports by evidence. Under these circumstances, is the allegation of the wife or husband to be preferred?

12. Suppose A did not acknowledge during his lifetime the parentage of his two sons B and C born of his slave girl, and had not performed the ceremony of *numukchushee*, have B and C a legal right to inherit the property left by A, notwithstanding the omission, and why?

13. Give a summary of the Mahomedan Law of *Divorce*. A person disinherited his son, and afterwards on his death-

bed repudiated his wife, the mother of his son, by divorce. Are the disinheriting and divorce in such a case legal? and has the divorced wife any right to inherit the estate of the deceased?

14. Fully explain who are sharers and residuaries, and how a Mahomedan's estate is divided among them. What is the rule for ascertaining the respective portions of each person who may be entitled to take shares in the estate?

Suppose the deceased has left a husband, a son, a daughter and a father, shew in what capacity each would take, and how many shares each would be entitled to.

GENERAL LAW, AS ADMINISTERED IN H. M.'S
HIGH COURT OF JUDICATURE IN THE EXER-
CISE OF ITS APPELLATE JURISDICTION, AND
THE COURTS SUBORDINATE TO IT.

Examiner.—MR. C. J. WILKINSON.

1. Give a history and full explanation of the several titles or interests in lands known as *lakhrāj*, *maafee*, *birmootur*, *chakeran*, and *jageer* respectively.

2. What are the *gooshwarah* and *kuteean* of a Zemindary Sheristah?

3. Explain fully the duty of a Collector in making a settlement under Reg. VII. of 1822, and Reg. IX. of 1825; and give some instances of rights and interests which under section ix. of the former Reg., the Collector has to award as distinct from the Zemindar's interest.

4. When may a dependent talookdar's, and when may a khodkast ryot's rent be enhanced? And is a talookdar's position in that respect changed, and how, by Act X. of 1859?

5. What are the rules laid down by Reg. XI. of 1825 to be observed in determining claims to lands gained by alluvion or by dereliction of a river or the sea? When land has once been completely diluviated, not merely temporarily inundated, has the proprietor any claim to it on re-formation? Give authorities for your opinion.

6. Can a suit for arrears of rent at a certain rate, decreed in a former suit, be maintained without a notice, under Reg. V. of 1812?

7. In a suit for the resumption of lakhraj land, upon whom is the onus of proof that the lakhraj tenure existed previous to 1790? Would the registration by the Collector in 1795 of the lands as lakhraj be a presumption of the lakhraj having commenced before 1790? Give the decisions of the High Court on these points in the case of Omeschunder Roy vs. Dukhina Soondery Dabee.

8. State whether an auction-purchaser of lands at a sale for arrears of Government revenue is bound by an agreement of the former owner with the owners of the adjoining estate to divide chur lands which had accreted to the estate. And how far would he be bound by decrees in a boundary suit against the prior owner?

9. Can a person, to whom property is pledged for a debt, when he obtains a simple money decree against his debtor, execute that decree against the property pledged, to the prejudice of a subsequent *bonâ fide* purchaser?

10. Point out the difference between a *nâm jôg* and a *shah jôg* Hoondée, and say what is a *jawabee* Hoondée.

A Hoondée is drawn in the English form by A upon B who accepts it. A endorses it to C who endorses it to D. D at maturity presents it to B for payment and it is dishonoured. D does not give due notice of dishonour either to A or C, and afterwards sues C as endorsee, who pleads

want of due notice. All the parties are Hindoos. Shew by recent decisions whether the English law, or the custom among Hindu merchants, is to be applied in deciding whether C is liable.

11. In what respects does the Indian Succession Act, with regard to marriages contracted after 1st January, 1866, change the general rights liabilities and disabilities arising out of the relation of husband and wife in cases of persons to whom the English law has hitherto been applied in India?

12. Shew what differences exist between the English law of Partnership and that of the Punjab.

13. What were the several points decided by the Privy Council in the case of *Abraham vs. Abraham*? State the facts of the case, and give a summary of their Lordships' judgment.

LAW OF ENGLAND AS ADMINISTERED IN H.
M.'S HIGH COURT OF JUDICATURE IN THE
EXERCISE OF ITS ORIGINAL CIVIL JURISDIC-
TION.

Examiner.—MR. J. H. A. BRANSON.

1. A husband by deed conveys and assigns lands and a sum of Government stock standing in his name to Trustees upon trust for the benefit of his wife and child. He afterwards by another deed conveys and assigns for value the land and stock to a purchaser who has notice of the settlement. The stock still remains standing in the name of the settlor. Who is entitled in Equity to the land and stock?

2. Explain the nature of a vendor's lien: against whom does it exist? and how may it be lost?

3. A mortgagee, after the day named in the covenant for payment, requires payment of mortgage money and interest within one month. The mortgager does not pay within the month, but the next day tenders principal and interest up to day of tender. For what further period is the mortgagee entitled to claim interest?

Are there any, and if any, what interests in land, that can be created without writing, in spite of the Statute of Frauds?

4. The general rule is "no injunction, no account;" what is the exception?

5. An estate is granted by D to A and his heirs male. A dies in D's lifetime, leaving a daughter only; who is entitled to the estate?

6. A man mortgages his estate to his Bankers to secure a sum then due of £1,000 and further advances, and then mortgages the same estate to B with full notice of the former security. The Bankers then advance on the same estate an additional sum, having knowledge of the transaction with B. Is the Bankers' 2nd loan or B's entitled to priority?

7. Specify certain obligations which are cast upon an Inn-keeper by English customary law.

8. A, engaged to B, without his knowledge or consent disposes of property which would, but for this disposal, have come by reason of the marriage to B; a few days after the execution by A of the deed disposing of her property, C induces her to throw B over and marry himself the day after. C had no notice of the settlement executed as above by A. How far is A's disposal of her property good as against C?

9. A mortgages Whiteacre and Blackacre to B. He subsequently mortgages Blackacre alone to C. B files a bill of foreclosure against A and C. Sketch the form of the Decree.

10. Suppose a person in the year 1828, having a power

of appointing 100,000£ among 4 children, gave one of them 5£, and divided the balance among the others: what is such an appointment called? What would have been the effect of such an appointment then? and what would be the effect at the present day?

11. It is a rule of Law that a gratuitous Bailee or other Agent is chargeable when he has been guilty of gross negligence, and that he will be liable for no other kind of negligence. Have there been any, and if any, what distinctions engrafted on this general doctrine? Distinguish between a pawn, a mortgage and a lien. A pledges a lease with B, a solicitor, for payment of his Bill of Costs. What are B's rights and powers over the lease? Will he be justified in selling it?

12. Suppose A, a father, wishes to grant to B, his son, an estate in fee simple from Christmas next. That is, he wishes to grant B an estate to commence *in futuro*. Can effect be given to the above limitation by any, and if any, by what means?

Note.—When an opinion is given, the reasons on which it is founded must also be stated. When the authorities are remembered, they should be quoted.

MERCANTILE LAW.

Examiner.—MR. J. H. A. BRANSON.

1. Suppose a ship, her cargo and the freight thereon be hypothecated for necessary repairs by one bottomry bond to A, and subsequently be similarly hypothecated by another bond to B; which of the bond-holders is entitled to be paid first? and which of the three things hypothecated is primarily

liable? Say also whether the owner of the cargo has any, and what rights, as against the owners of the ship.

2. What is the law as to the transshipment of a cargo, when the master of a ship in distress in a foreign port cannot accomplish his contract by the conveyance of the cargo in the same vehicle he had contracted to furnish? Suppose A charters a ship to carry 1,000 tons of jute from Calcutta to London at £2 10s. a ton, and the ship suffers at sea such injury that she is obliged to put into the Cape for repairs, which will detain her so long that the master deems it advisable to transship the cargo, and he accordingly forwards the 1,000 tons of jute in two ships to London, and pays less for the conveyance of the jute by those two ships than the rate he had agreed to carry it for: at what rate would the owner of the cargo have to pay for the conveyance of the cargo to its destination? and how would it be, if the owner of the goods, arriving at the Cape, insisted that the goods should not proceed, but should be delivered to him there?

3. What is demurrage? How does it arise? And how is it computed?

4. Distinguish between general and particular average. Say in what cases general average arises. What articles are liable to contribute to it? and what is the mode in which it is to be adjusted?

5. If A, a partner to the extent of a $\frac{2}{5}$ share in a mercantile firm, signs a Promissory note in his own name only, and applies the money so raised for the benefit of his firm, will his partners be at all and, if at all, to what extent liable? Would it make any, and if any, what difference, if A, instead of borrowing money, purchased goods in which the Firm usually deals, and applied them to the Firm's use?

6. A and B are in partnership. A signs a deed, purporting it to be executed for himself and his partner. B

subsequently acknowledges that he gave A power, not by deed, to execute the deed in question. Is the deed at all, and if at all, to what extent binding on the partners? Say also what would be the effect, if the deed in question operated by way of a release.

7. In the case of a contract entered into in a foreign country by a man having an English domicile and put in suit in England; by what law is the capacity of the person contracting governed? By the law of which country will the validity of the contract be determined? By what law is the form of the contract to be regulated? According to what law must the contract be construed? By what law will the discharge or dissolution of the contract be governed? and what law should regulate the enforcement of the contract?

8. Give me shortly the facts and the ruling in the case of *Devaynes vs. Noble* (Clayton's case).

9. What persons may become bankrupts? What are acts of Bankruptcy? and who may petition for an adjudication?

10. By 12 and 13 Vict., c. 106, S. 88 an act of Bankruptcy committed more than 12 months before a petition of adjudication is filed, is not sufficient to support such a petition. Suppose more than 12 months to have elapsed since the making of an assignment which would have been an act of bankruptcy on the part of the assignee, there being creditors at the time this assignment was made, whose debts then existing still remain unpaid: will those creditors have any, and if any, what rights, as against the assignee?

11. A chartered a ship to load a cargo at a port in the United Kingdom and proceed therewith to Calcutta; the freight to be paid in London on unloading and right delivery of the cargo, one-third by A's acceptance at three months from the sailing of the ship (the same to be returned if the cargo were not duly delivered), and the remainder by like

Bill at three months from the date of delivery in London of the certificate of right delivery of the cargo. The charter party provided for a commission on the contract, ship lost or not lost, and that £150 should be advanced in cash at the port of discharge, on account of the freight, against the Captain's draft on A. The cargo was loaded accordingly, and a bill of lading was given for the same. The ship sailed from her port of loading in the United Kingdom on the 8th October, 1863. A having consigned the cargo to B and Co. who carried on business in Calcutta. On the same day, the owners of the ship drew a Bill on A at three months for £250, being one-third of the freight. On 10th October, 1863, B. and Co.'s general agents in London advanced to A on B and Co.'s account, and out of B and Co.'s funds £700, and received as security for such advance, the Bill of Lading blank endorsed and forwarded the same to B and Co.

On the 29th October, 1863, A accepted the Bill for £250, and in the following December, he suspended payment and the Bill was protested. On the 14th January, 1864, the ship arrived at Calcutta, and thereupon B and Co. as holders of the Bill of Lading, applied for delivery of the cargo and offered to advance the £150 in cash pursuant to the charter party; but the Captain claimed to retain the cargo, for the value of the dishonoured Bill, and the balance of freight due.

Has the Captain any and what lien for any, and if any, for what part of the freight thereof?

12. State the law as to the liability of an unnamed principal when discovered.

A, employed by B to buy goods, employs C to effect a purchase for him. C applies to D who refuses to sell to A, but learning that A has a principal, consents, and makes out the

bought and sold notes to A as principal. Suppose B should refuse to ratify the purchase, on which A should wish to take it for his own benefit, can he demand delivery of the goods to himself? and what are D's rights in the matter?

Note.—When an opinion is given, the reasons on which it is forwarded, must also be stated; and when the authorities are remembered, they should not be omitted.

L. C. E. Examination, 1865.

ARITHMETIC AND ALGEBRA.

Examiner.—MR. J. SUTCLIFFE, M. A.

1. Express as a decimal the product of $\frac{3}{5}$, $\frac{9}{8}$ and $\frac{14}{25}$: and divide .137052 by .0000324.

2. The area of an irregular lake is 18ac. 36po., shew that the side of a square of the same area as the lake is 297 yards.

3. A farmer hired 60 men to cut down his crop in 24 days, but after 8 days 12 of the men struck work: how long will the remaining men take to finish the work?

4. If $5\frac{1}{2}$ per cent. securities be selling at 110, find what amount must be invested in the purchase of stock, in order to produce an income of Rs. 5,000 per annum.

5. Find the cost of lining a cistern with lead, $\frac{1}{8}$ th of an inch thick, if the dimensions be 6 ft. long, 2 ft. wide, and 3 ft. high at 4 annas per lb., the weights of equal bulks of lead and water being as 11.35: 1.

6. Find the Greatest Common Measure of $x^3 + 4x^2 + 2x - 1$ and $x^3 + 2x^2 - 4x + 1$.

If $a : b :: c : d$, prove that

$$a + b : a - b :: \sqrt{ac} + \sqrt{bd} : \sqrt{ac} - \sqrt{bd}.$$

7. Given the first term and common ratio of a geometrical progression, find the n th term and the sum of n terms.

Sum the series

$$1 - \frac{2}{3} + \frac{4}{9} - \&c \dots \dots \text{to } n \text{ terms.}$$

$$\frac{4}{15} + \frac{1}{5} + \frac{3}{20} + \&c \dots \dots \text{to infinity.}$$

8 Find the co-efficient of x^r in the expansion of $(1 - 2x)^{-1}$.

9. Solve the equations—

$$x^2 + 2x = 12 - 4\sqrt{x^2 + 2x}.$$

$$\left. \begin{aligned} x^2 - xy + y^2 &= 7 \\ x^2 + xy + y^2 &= 19 \end{aligned} \right\}$$

10. Two railway trains moving in opposite directions pass each other somewhere between two stations A and B. One train leaves A at 20 minutes past 4 and arrives at B at 5. The other leaves B at 10 minutes past 4 and arrives at A at 20 minutes to 5. Find the time at which they meet.

GEOMETRY AND CONIC SECTIONS.

Examiner.—MR. J. SUTCLIFFE, M. A.

1. Triangles upon equal bases and between the same parallels are equal to one another.

2. If a quadrilateral figure have two sides parallel, and the parallel sides be bisected, the line joining the points of bisection shall pass through the point in which the diagonals cut one another.

3. If S P Q be a chord drawn from a point S to cut a circle in P and Q, and if S T be a tangent, prove that S T is a mean proportional between S P and S Q.

4. Every solid angle is contained by plane angles which are together less than four right angles.

5. Shew how a cone must be cut in order that the section may be (1) a parabola, (2) an ellipse.

6. In a parabola, if a tangent at any point P intersect the tangent at the vertex in S, then S Y will bisect P T at right angles, and will be a mean proportional between S A and S P.

7. If the normal to a parabola at P meet the axis in G, and the ordinate at G meet the parabola in Q, and the line A P produced in R, then

$$Q G^2 = P N. R G$$

8. If from the foci S and H of an ellipse, perpendiculars be drawn meeting the tangent at P in Y and Z, then Y and Z are on the circumference of the auxiliary circle, and $SY. HZ = BC^2$

9. The area of an ellipse is to the area of the auxiliary circle as BC to AC.

10. If the tangent at any point of a hyperbola meet the asymptotes in L and l; then the area of the triangle LCl is equal to the rectangle contained by BC and AC.

TRIGONOMETRY, LOGARITHMS AND MENSURATION.

Examiner.—MR. J. SUTCLIFFE, M. A.

1. A and B being less than 90° , prove by geometrical construction the formulæ—

$$\sin (A - B) = \sin A \cos B - \cos A \sin B.$$

$$\tan (A - B) = \frac{\tan A - \tan B}{1 + \tan A. \tan B}$$

2. Given the sides of a triangle find expressions for the area, and for the angles in a form adapted to logarithms.

3. Two sides of a triangle are 345 and 174 feet, and the included angle is $37^{\circ} 20'$; find the remaining angles of the triangle, having given

$$\log 5.19 = .715167$$

$$\log \tan 71^{\circ} 20' = 10.471298$$

$$\log 1.71 = .232996$$

$$\log \tan 44^{\circ} 17' = 9.989127$$

4. An observer sees the summits of two distant towers in the same straight line. On approaching c yards towards them, the angle of elevation of the nearer becomes twice that of the more remote. Find the heights of the towers, having given the distance of the towers from the first place of observation.

5. Define a logarithm: and find that of 81, (1) to base 3; (2) to base $\frac{1}{\sqrt{3}}$

Given $\log 2 = .301030$ to base 10, find $\log 25$ to base 100.

6. What is meant by the principle of proportional parts as applied to logarithmic computation?

Given $\log \cos 36^{\circ} 23' = 9.9058317$, $\log \cos 36^{\circ} 24' = 9.9057386$ and $\log \cos A^{\circ} = 9.9057762$, find the value of A° .

7. Find an expression for the area of a quadrilateral figure, (1) in terms of a diagonal and the perpendiculars upon it from the opposite angular points, (2) in terms of the diagonals and the angle included between them, (3) in terms of the four sides and two opposite angles.

The diagonals of a quadrilateral are 30 and 40 chains, and they intersect at an angle of 45° : find the area.

8. Water, 1 ft. deep, flows through a rectangular trough 4 ft. wide, at the rate of 5 miles an hour: how many cubic feet of water will pass a given point in a minute?

9. The section of a canal is 32 ft. wide at the top, 14 ft. wide at the bottom, and 8 ft. deep: how many cubic yards

were excavated in a mile of the canal, and if the surface of the water be 26 ft. wide, what is its depth?

10. A circular hole is to be cut in a circular plate, so that the weight may be reduced one-third: find the diameter of the hole.

11. Three cubes of metal, whose edges are 3, 4 and 5 inches respectively, are melted and formed into a single cube; if there be no waste in the process, shew that the edge of the new cube will be 6 inches.

12. How much canvas will make a conical tent 11 ft. in height, and 12 ft. in diameter at the base?

STATICS AND DYNAMICS.

Examiner.—MR. J. SUTCLIFFE, M. A.

1. If forces P, Q and R act on a particle, what relation must exist between them, in order that there may be equilibrium? Can forces which are proportional to 4, 5 and 6, or to 4, 5 and 9, be in equilibrium at a point under any arrangement of their directions?

2. Compare the resultants of two equal forces, when their directions are inclined at angles of 30° and 60° .

3. A uniform beam AB weighs 100 lbs. and is 20 feet long. A weight of 5 lbs. is suspended from B, find what weight must be suspended from A, in order that the beam may balance about a fulcrum distant 5 feet from A.

4. When a body is suspended from a point about which it can swing freely, it will rest with its centre of gravity in the vertical through the point of suspension.

Ex. Find the position in which a cone will rest which is hung from a point in the circumference of its base, when the height of the cone is four times the radius of the base.

5. The arms of a false balance are 19 and 20 inches in length: find the percentage of weight which a shopkeeper gains by always placing his weight in the scale attached to the shorter arm.

6. To an axle of 9 inches radius, two wheels are attached whose diameters are 8 and 10 feet. A man who can exercise a force of P pounds works at the smaller wheel, and another man twice as strong works at the larger. Find the force each exercises when they jointly sustain a ton weight on the axle.

7. Explain how the co-efficient of friction between two substances is practically determined.

A weight w rests on a rough inclined plane under the action of a horizontal force f . Shew that equilibrium will exist, if f lie between $w \tan (\alpha - \theta)$ and $w \tan (\alpha + \theta)$, α being the inclination of the plane, and θ the angle of friction.

8. How is accelerating force measured? State the relations between acceleration, space, velocity, and time, when a particle is uniformly accelerated from rest.

9. A body falls down a smooth inclined plane under the action of gravity: compare the spaces described during the successive seconds from rest.

10. A ball impinges obliquely on a smooth fixed plane; determine the motion after impact.

11. The Earth being supposed to be a sphere whose radius is 4,000 miles, find the height of a mountain on whose summit a pendulum, which beats seconds at the base, loses 10 oscillations a day.

HYDROSTATICS AND OPTICS.

Examiner.—MR. J. SUTCLIFFE, M. A.

1. Prove that the pressure in the interior of a uniform fluid at rest under the action of gravity varies as the vertical distance below the surface.

2. To what extent is the pressure on the base of a vessel affected by pouring in more liquid?

3. A house is supplied with water from a tank which is 60 feet above the level of the ground-floor: find the pressure of the water at a height of 25 feet above the ground-floor.

4. State the conditions under which a body floats in a fluid. What volume of cork, $S. G. = .25$, must be attached to 10 lbs. of iron, $S. G. = 7.5$, in order that the whole may just float in water.

5. A solid displaces $\frac{1}{2}$, $\frac{1}{3}$ and $\frac{1}{4}$ of its volume respectively, when it floats in 3 different fluids: find the volume it displaces, when it floats in a mixture formed of equal volumes of the fluids.

6. Describe the common pump, and explain its action.

7. The legs of a siphon are at right angles to one another and are 6 and 8 feet long. Find the greatest depth of fluid which can be drawn from a vessel by means of such an instrument.

8. State the law of reflection of light. Find the deviation of a ray after reflection at each of two plane mirrors, inclined at a given angle, in a plane perpendicular to their intersection.

9. State the law of refraction, and explain what is meant by the term, *critical angle*.

The image of a stick immersed in water is inclined to the horizon at an angle of 45° : find the inclination of the stick, $\frac{4}{3}$ being the index of refraction from air into water.

10. Describe the astronomical telescope, and find its magnifying power.

HYDRAULIC WORKS.

Examiner.—CAPTAIN WILLIAMS.

1. Explain fully what is meant by the contraction of the fluid vein, what effect it has upon the discharge, and how the discharge is affected by adjuncts of various forms.

2. What are the greatest bottom velocities to which different soils should be subjected? What velocity is required to prevent the growth of aquatic plants?

3. The mean velocity of water flowing uniformly is nine-tenths of the square root of the product of twice the fall per mile and the hydraulic mean depth. Explain how this formula is arrived at.

4. What is understood by the regimen of a river, and when is a river said to be in train?

5. Describe how to ascertain, within tidal limits, the fresh water discharge of a tidal river.

6. An open trapezoidal channel in soil requiring side slopes of 2 to 1, and with a fall of one foot to the mile, is to discharge one million cubic feet of water in twenty-four hours. Calculate the dimensions of the best form of channel, and give a figured sketch of it.

7. Explain the difference between hydrostatic and hydraulic pressure.

8. What provision must be made to ensure a full discharge in pipes having vertical bends?

9. Describe the works required to improve a shallow river so as to admit of slackwater navigation.

10. In taking water for the supply of a city from such a source as the Hooghly near Calcutta, describe the processes it should undergo, and the works required for the same, to render it fit for distribution.

11. Describe the physical characteristics of the Doabs of

Upper India, and their influence upon the Canal system in force there.

12. Describe briefly the various kinds of vertical and horizontal water wheels, their relative efficiency, and the circumstances under which they may be severally used.

CARPENTRY AND MECHANISM.

Examiner.—CAPTAIN WILLIAMS.

1. Define *Carpentry*, and distinguish between it and *Joinery*.

2. In using narrow beams for a transverse strain, how should the tendency to lateral yielding be met, and what are the advantages of using such beams?

3. In solid built-beams, consisting of several pieces in length as well as in depth, describe the best joints for the upper and lower layers. With a choice of timber, what descriptions should be used for the top and bottom layers, respectively?

4. What joint may be used for connecting wall-plates at the angle of a building? Sketch it.

5. Specify the guiding principles on which a timber-framing should be designed, as respects the transverse form and the length, absolute and relative, of the individual pieces of timber; the figure to be adopted for the component parts of the frame; the joints, fastenings and strains.

6. Give sketches, in proportion, for beams in tension, of—

(1) A scarfed joint without bolts or straps.

(2) A scarfed and fished joint with keys.

What are the rules for the dimensions of the various parts of these joints, respectively?

7. Sketch a joint for a principal rafter on a tie-beam with

a curved abutment and a bridle. State the advantage of circular abutments.

8. State the objection to a collar-beam truss, and the nature of the strain to which the collar-beam is exposed.

9. A beam is supported from below with corbels, struts, and a straining beam. Sketch the combination, and describe the duty of each piece.

10. Enumerate the elementary forms of Mechanism, and refer them to their respective mechanical powers.

11. The rise and fall of the tide is registered by means of a suspended float, acting on certain machinery. How may the varying weight arising from the varying length of the suspending rope or chain be compensated for?

12. Describe bevel gear. Given the position of two axes which do not intersect each other, show how to construct bevelled wheels which shall communicate motion from one to the other.

13. What is the object of a parallel motion? Describe any *one* with which you are acquainted.

14. Sketch and describe a double-acting pump.

15. Enumerate the various self-acting parts of the ordinary condensing Steam Engine (boiler included), and describe how they severally act.

STRENGTH OF MATERIALS AND STABILITY OF STRUCTURES.

Examiner.—CAPTAIN WILLIAMS.

1. Specify and illustrate the various strains to which building materials are subject.

2. How is the strength of a pillar affected by the ratio of its diameter to its length? What form is adopted on this account, when iron is the material employed?

3. State, approximately, the relative ultimate strength of wrought-iron, cast-iron, timber, and brick, in resisting tension and compression, respectively.

4. Assuming the ultimate tensile strain of iron wire to be 45,000 lbs per square inch, what is the least safe deflection that could be given to a telegraphic air-span of 5,000 feet?

5. Describe the action of a transverse load on a beam. When iron is used, how is the material most economically distributed in a girder, and what are the best practicable forms for struts of wrought and cast-iron, respectively?

6. By what consideration is the working load on a beam limited? Specify the ratios of the working to the ultimate load ordinarily adopted for wrought-iron, cast-iron, timber, and brick.

7. State the relation between the length, depth, and deflection of a beam, and explain how the ratio of the maximum depth of a girder to the span is arrived at. What is this depth for a girder of (1) wrought-iron, (2) cast-iron?

8. In what class of structures do the cohesive and adhesive strength of mortar or cement come into play? What are the adhesion to brick and cohesion of good common mortar when set in lbs. per square inch?

9. Investigate a general formula for calculating the pressure against retaining walls. What are the usual ratios of thickness to height for walls retaining (1) water, (2) earth?

10. What are the various plans for resisting the additional pressure against a revetment wall, arising from the saturation with water of the material at the back (1) when it can be efficiently drained, (2) when drainage is not possible?

11. Given the amount and direction of the thrust of an arch, state the points to be attended to in designing the abutment, and show how to calculate its thickness.

12. Show how to calculate the strains on a queen-post trapezoidal truss.

PRACTICE OF BUILDING. No. 1.

Examiner.—MR. J. W. GALWEY.

1. Explain the classification of building stones into *aqueous*, *igneous*, and *metamorphic*; and state to which of these classes each of the following stones belong :—*Basalt, Freestone, Portland-stone, granite, slate.*

2. Describe the most formidable causes of brief duration of timber structures, such as piles, beacons, &c., erected in sea-water, the force of the waves and other violent causes of injury being neglected.

3. What are the different ways of slaking lime, and which is the best? What is the test for cements?

4. Describe the best form of retaining-wall, and state the condition of equilibrium.

5. Enumerate and describe briefly the chief strains by which bodies may be affected so as to have their elasticity or strength called forth; and point out, in respect to some of them, how they may be regarded as being composed of two or more others contemporaneously existing in the same or different parts of the body.

6. Explain what is meant by the *neutral lamina* of a beam subjected to a cross-strain, and state what is the nature of the chief strain it has to resist.

7. How are piles prepared for foundations? What rules should be observed in placing and driving *bearing* piles? What is the object of *sheet* piling? How should it be prepared and driven?

8. How should the thickness of the external walls of a building be generally determined?

9. What are the essential qualities of timber to be used for building purposes? Give the scantling of the strongest beam which can be cut from a tree 22 inches in diameter.

PRACTICE OF BUILDING. No. 2.

Examiner.—MR. J. W. GALWEY.

1. Describe the manner in which the abutments or skewbacks for an oblique bridge are arranged in any approved system you know of, for the construction of such bridges; and explain the reason for their peculiar arrangement as distinguished from that of the skewbacks or the abutments of a direct bridge.

2. Give a description, illustrated by hand-sketches, of all the principal features of a good system of constructing and supporting fire-proof floors for large buildings, such as Mills, Store-houses, &c.

3. Name the three principal parts of an Entablature; and describe what are *dentils*, *modillions*, and *triglyphs*.

4. What is meant by each of the terms *tympanum* and *spandrel*?

5. What is meant by *finials* in Gothic architecture, and what by *mullions*?

6. A brick sewer is required to be constructed for a length of 500 ft. in ground consisting of firm sandy clay. Its bottom inside, or the part in which the water will flow, is to be at a depth of seven feet below the surface of the ground, and its size is to be determined by the consideration that it must be large enough to admit of a man creeping through it for inspection or cleansing, but that such size is more than sufficient for carrying the water required to pass. Give a sketch, with figured dimensions, of the cross-section which you would propose as suitable for this sewer, and furnish a specification and estimate, mentioning the prices of materials and labour, &c. on which the estimate is formed.

7. Describe as fully and clearly as you can, the financial considerations which usually or frequently fall to be taken

into account in making selections between a level crossing and bridge for maintaining the traffic of an existing public road across a proposed Railway, in cases in which, so far as the public convenience is concerned, the two methods are left optional to the Railway Company.

ROADS, RAILROADS, &c.

Examiner.—MR. J. W. GALWEY.

1. Describe the form and surface of a road when in a superior condition.

2. What are the preliminary measures necessary to be taken, on the part of the Civil Engineer, when instructed to advise on the propriety of making a new road, so that loads may be transported from one place to another with the least possible expenditure for tractive power?

3. If it require a force of 160 lbs. to draw a carriage up a road having an inclination of 1 in 40, at the rate of 6 miles per hour, what will be the power necessary to draw the same carriage, including the force of gravity, and at the same speed upon a like constructed road, but having an inclination of 1 in 30?

4. What is the effect of neglecting repairs of roads? And how are roads maintained in repair at a minimum cost?

5. What are the ruling points which serve to guide you in putting the grade lines on a railway section?

6. On a Railway whose gauge is 5 feet 6 inches, what must be the elevation of the external rail on a curve of 30 chains radius; the weight of the train 100 tons, and speed 30 miles per hour?

7. In carrying roads *under* or *over* railways, what circumstances would guide you in adopting an arch bridge, or a girder bridge?

DRAWING.

Examiner.—MR. J. W. GALWEY.

1. Using a common foot-rule, or measure of inches, make a scale of feet by which to take measurements in feet from a plan drawn on a scale of 60 inches to a mile.

2. In DESCRIPTIVE GEOMETRY, given the *projections* of a straight line, it is required to find its *traces*.

3. What is the distinctive character of the class of objects for the delineation of which Isometric drawing is specially suited?

4. Make an isometrical drawing of any simple figure. The required drawing is to be such that the same scale would suit for measurements from it and from the given one.

5. The shadows of a *Cone* and of a *Sphere* are thrown upon the planes of projection, and the light emanates from a point; it is required to construct these shadows, and to shew what parts of the cone and sphere are in the shade.

6. State what is the nature of the curve by which a *strictly true* perspective representation of a globe can be formed on a plane picture surface, and give the reasons for your answer.

7. Given a *Contour-map*, to trace a road of given inclination. Shew also when that road must be *continuous*, and when *zigzag*; and why, when circumstances permit, the *former* should be preferred?

GEODESY.

Examiner.—MR. J. W. GALWEY.

1. Describe the best methods of *staking out* Railway curves on the ground.

2. Describe the various methods of determining on broken side-long ground the width to the right and left of each central stake.

3. State the most convenient formula for determining the cubic contents of excavations and embankments.

4. How would you determine the cubic contents of any portion of earth-work, when the cross-section was very irregular or much inclined?

5. What is the solid content, in cubic yards, of a portion of Railway cutting of which the dimensions are as follow:—

Distance in feet. Height in feet. Side-long inclination.

0 10.06 6 to 1

100 12.13 6 to 1

200 19.45 4 to 1

300 21.50 $4\frac{1}{2}$ to 1

Width at formation level, 26 ft.

Ratio of slopes, 2 to 1

6. Shew how the line of collimation is adjusted in *Gravatt's Level*.

7. What precautions would you adopt to enable you to detect the slightest errors in surveying large towns?

8. Describe the best Astronomical method of determining the direction of a meridian line, and the Magnetic Variation.

9. Give some practical details on the subject of *Mining Surveying*.

10. The following observations were taken with a Mountain Barometer in Latitude 49° —

	<i>Barometer.</i>	<i>Attached Thermometer.</i>	<i>Detached Thermometer.</i>
First Station, ...	30.315 67° . F. 64° . F.
Second ditto, ...	30.140 66° . F. 59° . F.

What is the difference of level between them?

L. M. S. and M. B. First Examination.

BOTANY.

Examiner.—S. G. CHUCKERBUTTY, M. D.

Describe—

1. The structure of an Exogenous Stem.
2. The Elementary parts of a Flower.
3. The food of Plants and the sources whence it is derived.
4. The circulation of the Sap.

MATERIA MEDICA.

Examiner.—S. G. CHUCKERBUTTY, M. D.

1. Give a brief account of the actions, doses, and uses of the following Medicines :—*Strychnia*, *Hydrocyanic Acid*, *Sulphur*, *Iodine*, and *Tartarated Antimony*.
2. Describe the preparations of Mercury, and mention the principal Diseases for which they are used.

MATERIA MEDICA.

Examiner.—S. G. CHUCKERBUTTY, M. D.

1. What are the various actions and uses of *Potassa Caustica*, *Liquor Atropiæ*, *Vinum Colchici*, and *Argenti Nitras*?
2. Describe the principal Acids of the *British Pharmacopæia*, stating their Physical character, Chemical composition, Strength, Action on Animal tissues, and Medicinal

uses, (including their doses and modes of administration when internally given.)

ANATOMY.

Examiner.—S. B. PARTRIDGE, F.R.C.S.

1. Describe the Fibula, giving exact details of the attachments of ligaments and muscles.
2. From what sources does the Rectum derive its supply of blood?
3. Describe the origin, course and distribution of the Phrenic Nerve.
4. Explain the construction of the Gastro-hepatic Omentum, and describe its position, connections and contents.
5. Enumerate the muscles of the orbit, and state the sources from which they derive their supply of motor and sensory nerves.

ANATOMY.

Examiner.—S. B. PARTRIDGE, F.R.C.S.

1. Describe the joints which are concerned in the rotatory and nodding movements of the head.
2. What is the position of the Pancreas? From what sources is its vascular supply derived?
3. Describe the position and formation of the Fourth Ventricle and its connection with the remainder of the ventricular cavity of the encephalon.
4. Describe, in the order in which they would be met with in a dissection, the structures contained in a space bounded—above, by a horizontal line on a level with the alveolar margin of the lower jaw,—below, by a horizontal line

on a level with the upper margin of the hyoid bone,—in front, by the median line,—behind, by the position of the transverse processes of the cervical vertebrae,—and within, by the median plane.

COMPARATIVE ANATOMY.

Examiner.—J. EWART, M. D.

1. The digestive system of Fishes?
 2. The natural history of the Cestoid and Nematoid Entozoa, and point out those met with in the human subject?
 3. Anatomical and physical characters and habits of the Chiroptera?
 4. What are the different modes of Reproduction? and give examples of each?
 5. The circulation, respiration and digestion in Birds?
 6. The nervous system in the Radiata and Reptilia?
-

PHYSIOLOGY.

Examiner.—J. EWART, M. D.

1. The structure and uses of the connective tissues?
2. Minute anatomy and functions of the ovaries?
3. General anatomy and functions of medulla oblongata?
4. Structure and functions of the pancreas?
5. Conditions necessary for healthy nutrition?
6. Epithelium, its varieties and uses?
7. The physiological constitution of nerve-matter?
8. The physiological constitution of the blood?
9. How is the animal heat maintained?
10. Anatomy and functions of the mesocephale.

CHEMISTRY.

Examiner.—F. N. MACNAMARA, M. D.

1. What is meant by specific heat? What discovery has been made concerning the relation of specific heat to chemical equivalents?

2. Give a description of a cell of Grove's battery: what is the theory of its use? what advantages does its construction present over that of other batteries?

3. Describe the different eudiometrical processes for the determination of the amount of oxygen in a mixture of that gas with nitrogen.

4. Give the equivalent numbers of the following elements, and the formulæ of their compounds with oxygen:

Cl — P. — Fe

I — S — Pb

Br — As — Hg.

5. How may a specimen of zinc be purified from any iron or lead it contains? and how may the amount of each of those impurities in the specimen be determined?

6. How is permanganate of potash prepared? what is its action upon organic matter in solution? how may it be applied to the estimation of organic matter in water?

CHEMISTRY.

Examiner.—F. N. MACNAMARA, M. D.

1. 100 parts of morphia yield by combustion

C 71.91

H 6.85

O 16.44

N 4.8

- 100 grains hydrochlorate of morphia contain

Morphia 88.75

H Cl 11.25

The atomic number of H Cl is 37, what is the atomic number of morphia, and what its chemical formula?

2. By what processes can the fatty acids be obtained in a pure state from the neutral fats? Explain the chemical changes which occur during each process.

3. Give a sketch of the chemical history of Indigo, with especial reference to its relations to other bodies; its formation during the process of manufacture; and its employment in dyeing.

4. Give examples of a monatomic, biatomic, and triatomic alcohol; and of the hydrocarbon radicle, aldehyde, ether, and acid which may be derived from each. Give the formulæ of each body in symbols.

5. Give a sketch of the chemistry of urea and of uric acid, with especial reference to their origin, and the part they play in the chemistry of the animal body.

6. Name the normal coloring matters of the blood, bile, and urine; and indicate the probable relations they bear to one another.

L. M. S. Second Examination.

SURGERY.

Examiner.—J. FAYRER, M. D.

1. Describe in detail the formation of an acute abscess: illustrating the various stages and results of inflammation thereby involved; also describe the treatment you would adopt, and give reasons for it.

2. Describe, with anatomical detail, the operation for excision of the superior maxillary bone (not including the malar bone). Give the steps of the operation, and the circumstances under which you would deem it necessary.

3. In a case of injury to the head from a contusion, in which not only the scalp has been lacerated, but the bone denuded of pericranium and bruised, what are the dangers to be apprehended? What would be the symptoms indicating the approach of such dangerous conditions? and how would you treat them, if they arose?

SURGERY.

Examiner.—J. FAYRER, M. D.

1. What are the Characteristics that distinguish the so-called "*Hunterian*," infecting Syphilitic sore, from the other varieties of venereal ulceration? Describe the popular views among Surgeons, as to the treatment of the disease, in its local and constitutional phases. Give also a description of the principal forms in which the latter (constitutional Syphilis) is manifested.

2. Describe the operation of linear extraction of the lens; what advantages does it possess over the various operations employed for the cure of cataract.

MEDICINE.

Examiner.—CHARLES R. FRANCIS, M. B.

1. What different conditions of the lungs are indicated by dullness on percussion, and increased resonance of the voice, together or separately? How would you distinguish between, and treat each?

2. Under what pathological conditions may paralysis of the Portio Dura occur? Give the treatment, and the prognosis, in each case.

MEDICINE.

Examiner.—CHARLES R. FRANCIS, M. B.

1. What is Dysentery? What are the principles of treatment to be observed in the early stages of the disease? What lesions may occur? and how would you recognize, and treat them?

2. Under what different morbid conditions may Diarrhœa occur? What is the significance of the symptom, and the treatment of it, in each?

3. In massing bodies of men together in a building, in a vessel, or in tents, what sanatory principles should be observed to prevent the invasion of disease?

MIDWIFERY.

Examiner.—CHARLES R. FRANCIS, M. B.

1. Give the signs of Pregnancy in each month: which are the most reliable?

2. What are the causes of hæmorrhage, before and after Delivery? What should be the treatment, preventive and remedial?

3. Describe, in detail, the operation of *turning*, (podalic version.) When would you resort to it?

MIDWIFERY.

Examiner.—CHARLES R. FRANCIS, M. B.

1. What are the symptoms of retroversion of the uterus? How would you distinguish it from prolapsus of the organ?

2. What should be the management of a case of labor, with twins?

3. Under what circumstances are Craniotomy and Embryulcia necessary? Describe the operations.

MEDICAL JURISPRUDENCE.

Examiner.—F. N. MACNAMARA, M. D.

1. To what circumstances should a medical man particularly direct his attention when called to a case of sudden or violent death? and what precautions is he to observe in making a post mortem examination in such a case?

2. What symptoms, and what post mortem appearances, would you expect in a case of slow poisoning by a mixture of arsenic and tartar emetic? How would you proceed to seek for the poisons in any portion of the body submitted to you for the purpose?

3. Upon what evidence would you chiefly rely as proof of a child's having been born alive?

4. What means are most commonly employed in this country for producing criminal abortion? and what evidence of the crime would you expect to find upon the body of a woman who had died under their use?

Honor Examination, 1865.

SURGERY.

Examiner.—J. FAYRER, M. D.

1. Describe the symptoms and treatment of the various forms of dislocation and fracture to which the shoulder joint is liable.

2. Give a detailed account of the pathology, symptoms and treatment of the various forms of morbid growth which have received the designation of "Recurrent," or "Semi-malignant." Describe the points in which they differ from the malignant growths.

3. Describe the pathology of the different forms of Hemorrhoids; what are the predisposing and proximate causes of these affections? and how would you treat each variety? State also what circumstances would influence you in reference to the performance of any Surgical operation for their relief.

4. Give the symptoms and treatment of inherited Syphilitic Keratitis, and describe the abnormal changes which take place in the various other structures of the eye consequent on inherited Syphilis.

MEDICINE.

Examiner.—CHARLES R. FRANCIS, M. B.

1. Give a sketch of the several conditions, morbid or otherwise, which affect the quantity, specific gravity, and composition of the Urine; the exact nature of the changes

in this secretion, and the mode of detection, being stated in each case.

2. What are the most recent views of the pathology of Cholera? How are they confirmed by symptoms, by the results of treatment, and by post mortem examinations?

MIDWIFERY.

Examiner.—CHARLES R. FRANCIS, M. B.

1. Give a sketch of the development and impregnation of the Ovum, (including an account of the formation of the Corpus Luteum, with an estimate of its value as a sign of pregnancy;) and describe in detail the provisions made for the nutrition of the Embryo, to the period of birth.

2. What are the distinguishing characteristics of the Fœtus at each month of the intra-uterine life?
